

A seven-game stand that brings Western Division contenders Cincinnati and Los Angeles to the stadium from July 10 through July 16 will be the next home game for the Houston Astros.

The power-laden Cincinnati Reds will visit on Thursday, Friday and Saturday nights, plus Sunday afternoon (July 10-11-12-13), then the surprising Los Angeles Dodgers will be in town

for night games the next three evenings (July 13-15-16).

Special entertainment highlights of the seven-game home stand will be "country Music Weekend" on Friday and Saturday, July 11 and 12. Two outstanding performers will be presenting 6:45 p.m. pre-game shows—Sonny James on July 11 and Jeannie C. Riley of "Harper Valley P-T-A" fame of July 12.

The shows and the games may both be seen for the regular baseball admission of \$3.50, \$2.50, \$1.50 or 50¢ for children.

One of the Western Division's pre-season favorites, Cincinnati, will bring one of baseball's most impressive offensive teams into the four-game weekend series that inaugurates the stand. Pete Rose, Johnny Bench, Alex Johnson, Lee May, Tommy Helms and Tony

Perez are some of the impressive sluggers for the Reds, who—after a slow getaway—have bounced back into the thick of the fight for the divisional flag.

The Dodgers, who will finish the home stand with three games, have been one of the surprise teams of 1969. Figured near the bottom in most early predictions, Manager Walter Alston's club has confounded the experts by playing first-place or second-place ball almost all year. With outstanding young talent and their usual stingy pitching, the Dodgers should be a threat all year.

The final game of the coming home stand—on Wednesday, July 16—will start an hour and a half earlier than usual, at 6:00 p.m. Otherwise, the usual 7:30 p.m. weekday and 2:00 p.m. Sunday schedule will be in effect for the stand.

Tickets to these and all future Astro home games may be obtained daily at the Astrodome ticket office, all five Foley's stores in Houston, Houston Bank and Trust and at most Texas International Airlines ticket counters. They also may be ordered by mail (Tickets, Box 1691, Houston, Texas 77001).

Aggie Sports Quotes

What other school can boast two current world record holders in track? Texas A&M has shot putter Randy Matson and quartermiler Curtis Mills. . . . A&M added four All-Americans in track as the sprint relay four—some of Scott Hendricks, Mills, Jack Abbott and Rockie Woods finished third in the NCAA meet with 39.5 clocking. . . . Abbott is the only senior on that baton crew. . . .

Gene Stalling's recent trip into the everglades in Florida for the filming of a bass fishing trip to be shown on The American Sportsman (national TV) next fall was a great success. Stallings kept only one fish, an 8-pounder, for mounting. . . . A color, with sound, highlight movie of the Texas A&M News Media golf tournament and spring football game, is in the making and will be ready for public showing within a month. . . .

To be eligible for the initial filling of football ticket orders, fans must get their application in the mail prior to midnight, Monday, June 30, to the A&M

ticket office. Applications mailed after that date will not be filled until the first group has been processed. Nebraska game tickets are \$5.25, and all other Aggie game tickets are \$6 each. Aggie Club members can order directly from the Aggie Club in accordance with 1969 ticket policy. After the June 30th deadline, applications will be filled on a first-come, first-served basis. . . . A&M's home games in 1969 are with Baylor, Oct. 25, SMU, Nov. 8 and Texas, Nov. 27. . . .

Bob Long, named to the first-team All-America squad as an outfielder, is one of the few athletes drafted by both the football and baseball pros. . . . He spurned the Chicago Bears in

football to sign with the Los Angeles Dodgers in baseball and now is with their Class A club at Medford, Oregon. . . .

Texas A&M's 1969 football brochure will be off the presses about July 18. Fans can order same by mailing \$1.25 to Spec Gammon, Sports News Office, Texas A&M, College Station, Tex. 77843 (commercial item).

A spectacular sports weekend is set for College Station next Nov. 8-9. On Saturday, Nov. 8, the Aggies meet SMU in a SWC football contest and on Sunday, Nov. 9, the 200-mile Texas International Can-Am Sports Car Race will be staged at the new Texas International Speedway, 6 miles south of College Station. . . . The race will be over the 3-mile road course. . . .

Construction Underway On Student Services Building

Foundation forms for the \$1 million 12-dormitory services building at Texas A&M are going into the excavation adjacent to Duncan Dining Hall.

The building will house the Texas Aggie Band's practice and office facilities, Cadet Corps uniform storage - distribution and cold-dry storage lockers of the Food Service Department.

Contracted completion date was extended to April 1, 1970 due to inclement weather, according to J. O. Adams, A&M facilities planning and construction director. Temple Associates of Diboll is the contractor.

Work has been hindered by rain, runoff in the excavation and shoring the excavation wall at the east corner of Duncan. The service building will abut the dining hall and parallel Lewis Street.

Planned as a one-story building with a partial basement, the facility will contain approximately 35,000 square feet. It will have a combination masonry and concrete exterior.

Loading docks for laundry, uniforms and food storage will face Lewis Street, across from the drill field where the Thanksgiving bonfire is constructed.

Adams said the basement will take up about two-thirds of the area under the structure, but the additional space has been excavated for possible expansion. Food storage freezers will be located in the basement.

ROTC uniform clothing facilities will be on the west end of the ground level. A through passageway will enable east dorm area students to get to the drill field.

Band practice rooms and offices of Aggie Band Director Lt. Col. E. V. Adams will be on the east end of the ground floor.

The band complex will include

'We've Never Been Licked' On Tonight

Incredulity, humor, pathos and some nostalgia will be viewable tonight on the faces of Grove Theater patrons.

The variety of reactions will come from watching "We've Never Been Licked," a movie about A&M student life in the early 1940s.

"I've seen it four times," one Aggie commented. "The story and scenes aren't nearly as interesting as remarks and reactions from the audience."

A venerable movie that has flickered before the eyes of many thousands of A&M students, "We've Never Been Licked" deals with the goings-on of Aggies, their profts and the usual plot that moves in places and results in considerable action.

Yell practice on the YMCA steps, memorial services in Kyle Field, professor's homes on the site of the Memorial Student Center and dorm scenes—probably made in Mitchell Hall—date the Universal production.

It stars Robert Mitchum, Noah Beery Jr., Anne Gwynn and Martha O'Driscoll. The movie filmed entirely at A&M was Fess Parker's first screen appearance.

First of a Wednesday twinbill, "We've Never Been Licked" shows at 8:30 p.m. in the Grove. "Spiral Road" with Rock Hudson, Burl Ives and Gena Rowlands is in the late spot.

Grove manager Sammy Young of Dallas noted the outdoor theater will be closed Friday and Saturday for the Independence holidays. It will reopen Sunday with "Kitten With A Whip," featuring Ann Margaret and John Forsythe.

a large practice room of about 8,400 square feet, 12 private practice rooms, two ensemble practice rooms, a control room for sound and recording, library and instrument repair areas, receptionist-secretary office and the director's

Conrad Acquired By Dallas Cowboys

Bobby Joe Conrad, a former football standout with Texas A&M and the St. Louis Cardinals, was acquired last week by the Dallas Cowboys.

Conrad played with Heisman trophy winner John Crow and was a member of the 1956 Southwest Conference-winning team.

John Smith Named To Head Library

John B. Smith has been named acting library director, announced Academic Vice President Horace R. Byers.

Smith, the library's assistant director for public services the past three years, succeeds Dr. James P. Dyke who has resigned to become library director at New Mexico State.

Dr. Andrew J. Johnson, director of library services at Lamar State College of Technology, was originally named to replace Dyke but withdrew when offered the opportunity to become academic vice president of the Beaumont school.

A College Station native, Smith received his undergraduate degree in English at Texas A&M in 1960 and master's degree in library science at Columbia University in 1963.

Prior to joining the A&M staff, Smith was assistant law librarian at Columbia. Since joining A&M, he has headed the various library operations designed to serve the public.

Smith is the son of the late Dr. Elmer G. Smith, who served as a physics professor at A&M approximately 30 years until his death in 1961. He is married and the father of two children.

A&M VM Profs' Manual To Come

Publication in 1971 of a veterinary microbiology manual by the National Academy of Sciences involves five Texas A&M University veterinary medicine professors.

The extensive manual is being compiled to serve as a standard reference for veterinary research, biological research and diagnostic labs and suppliers, according to Dr. William L. Sippel.

A&M contributors to the publication include reviewers Dr. Leland C. Grumbles, Veterinary Microbiology Department head, and Dr. John C. Ramage, professor of veterinary medicine and surgery.

Writing articles for the reference are Dr. Richard W. Moore and Dr. Richard J. Hidalgo of A&M's Veterinary Microbiology Department.

office. Outside dimensions of the building will be about 90 by 240 feet. Adams said a walkway between the structure and H. H. Harrington Hall, in which the band resides, will be left open.

He said that because of business and other interests in Texas, had he not been traded he would have quit football.

"The Cardinals have been very nice and the Cowboys have come through," Conrad said. "Now all I have to do is make the team."

The Cowboys gave an undisclosed draft choice for the Clifton, Tex., native. The durable Conrad, 33, averaged 38 catches a year for the last 11 years and in that span had not missed a game. His biggest year was 1963 when he caught 73 passes to lead the league.

Conrad graduated from A&M in 1958 with a BBA.

Meteorologists Write About Sea

Like poets, meteorologists are writing about the restless seas.

Texas A&M scientist Dr. Guy A. Franceschini admits, however, the writings are "quite different" since his profession is interested in determining the factors contributing to that restlessness.

An A&M faculty member since 1952 when he earned his doctorate, Franceschini returned this week after a month of experiments with BOMEX, short for the Barbados Oceanographic and Meteorological Experiment.

Experiments were carried out in the West Indies aboard FLIP, also short for floating laboratory instrument platform.

The work took place in an area of the sea about 100 kilometers east of the island of Barbados. The area is about 290 square miles.

FLIP, towed into position, floods her ballast tanks to become vertical, with only 55 feet of the entire 355-foot length above water. It becomes a stationary platform unaffected by the sea's sometimes turbulent surface.

Franceschini, a professor of meteorology, explained BOMEX is designed to give man a better understanding of the interaction of the air and the sea, including the effect each has on the other and the resulting environment.

"We feel since the atmosphere gets its energy second hand from the earth's surface, and since 70 percent of the surface is ocean, the interaction is very important from a meteorological standpoint," Franceschini said.

"If we're ever going to forecast the weather," he added, "then we're going to have to allow for all of this energy."

"We must know how it is going to take place so we can put it into our numerical prediction scheme," he continued.

"If you can't tell a machine what is going on, you can't expect to get good answers," Franceschini said.

BOMEX is part of a larger international program dubbed GARP (Global Atmosphere Research Project), expected to become operational by 1972, added Franceschini.

Franceschini, sponsored by the Office of Naval Research, said he was concerned primarily with "measuring incoming and reflected solar radiation and net total radiation" as well as taking sky pictures.

His study included the transfer of momentum from the air to the water which produces wind waves and currents.

"I was measuring the structure function of turbulence in the air," he explained further.

Franceschini and his associates conducted 12 of BOMEX's 97 different experiments.

The Church.. For a Fuller Life.. For You..

Landscape Lovers

As soon as we met, I knew Rosie was special. She has an air that says she knows who she is and where she is going. I like the way she paints, too—she's quiet and businesslike.

Everything about her appeals to me. She dances like a dream, plays tennis well enough to keep me on my toes and loves painting as I do. She's my kind of girl.

In a world that seems mad, her outlook is refreshing. Maybe it's because her church and her God are important to her! And she isn't afraid to say so.

We'll be married next month—on a shoestring, but, whatever the future holds, we know God and His Church are the source of all goodness.

Your church has the key to real happiness. It is eager to help you.
