Hensel Apartment area, Hase said. The woman driving the car that struck Miss O'Malley's vehicle readily admitted to Campus Security officers investigating the accident that she was at fault. Other witnesses also backed up her statement.

Despite this, said Miss O'Malley, no tickets were given and the report made by the officers said that they could not determine who was at fault.

Since no tickets were given and the report said the police could not place blame, Miss O'Malley has had difficulties in collecting insurance, Hase said.

In a letter from the insurance company from which she is trying to collect was the statement, "We were told that the Campus Police

investigated and could determine no responsibility for the accident. In reply, Maddox said that the

investigators use their own judgement in determining who is at fault. Most of the men, he said, have been trained in accident investigation. Also criticized by Hase at the

meeting was the way intersections are marked or not marked. as the case may be. Hase said explaining that his job primarily that an absence of signs often covers investigation of thefts.

seems to cause difficulties for pedestrians and drivers.

Maddox agreed that, in some places, especially on Houston Street between the Memorial Student Center and North Gate, there are hazards to pedestrians. However, he said, the danger lies with the drivers ignoring signs and crosswalk markings, not with the design or placement of signs. Chief Powell said that the signs are erected following plans developed for the university by the Texas Transportation Institute.

He also said that a studentfaculty traffic committee makes suggestions on the placement of signs and the disposition of parking spaces. These suggestions are then analyzed by Campus Security and put into effect if they have merit, he said.

Another question Hase asked was why some thefts in the Hensel and College View areas went uninvestigated last year.

In the interview, Powell said that these areas were patrolled at least three times a shift by one of the 14 men on the force. An investigator also has been added to the force since the beginning of last year, Powell said,

None Injured In Accident

No one was injured in a twocar accident Thursday afternoon in parking lot 49 near Kyle Field, according to Campus Security officer Ray Rosier.

Rosier, who investigated the accident, said the car driven by Marion Crips of Law Hall collided with the car driven by Scott Petty, a sophomore in Company

E-1. Rosier estimated the damage would total \$600.

Marine Corps Team Here Next Week

The Marine Corps' officer selection team will return to the campus next week to interview and test students interested in one of the Corps' commissioning programs.

Headed by Lt. R. E. Crane, the team will operate an information booth 'Monday through Wednesday in the Memorial Student Center.

Lt. Crane also will participate in a 7:30 p.m. meeting Tuesday of the A&M chapter of the Semper Fidelis Society, the Corps' national collegiate organization. The meeting will be conducted in

Bryan, Texas

The group will attend the Texas A&M-Baylor football game Saturday night.

A&M set a national defense Proctor and James W. McFai record in 1939 that still stands towon a top award in the an day. Three team members won student paper competition s All-America honors and 10 were sored by the Institute of All-Southwest Conference playagement Sciences.
