an

Dr. Margaret Mead, internaionally known anthropologist, Thursday called for the establishsame as is ment of a universal ethic during attempts the next 25 years.

She said that this uniform code asn't bein of mores would have to be esanswere tablished during the next generation to be effective.

the susper Speaking to a crowd of 4,500, e wrist Dr. Mead presented the keynote half a ye address of the three-part "Man, Morality and Society" seminar had bee sponsored by Great Issues. She by a me discussed "Culture and the New mer's sut Morality." ference. H

she understood that there was no dean of women at A&M.

"Women students at most other universities are trying to get rid of their deans," she said, "it's odd to find a campus where they

want one." Often controversial in the past, Dr. Mead confined her address to conventional viewpoints of ethics and morality.

Welcomed by a standing ovation and frequently interrupted by laughter and applause, Dr. Mead defined morality as customs that a people think are ethical. She said that people outside these groups have varying views of these customs, and that many

of them are likely to look "out Many people are concerned about the wide diversity of cus-

toms, she said, but Americans lent of the Association of Women are great believers in situational Students, Dr. Mead remarked that ethics and are willing to examine are universally accepted," she

the circumstances in which the custom occurs. "No particular act of any sort can be regarded as absolutely good or bad," Dr. Mead said. "Cultural relativity means that

the custom depends on the situation "This causes many anthropologists to worry about the world without a universal ethic," she

said. The thing to do, she said, is to find something common to all these peculiar customs.

"Man is capable of ethical behavior," Dr. Mead said. "He accepts the concepts of right and wrong. Even his animals develop a conscience. Dogs and even cats have ethics. Of course," she said to scattered laughter, "cats go ahead and do what they want to anyway."

"There are three ethics that

"We are increasingly living in one world and increasingly depending on the morality of people all over the world," she said. "A universal ethic must be es-

tablished for war and peace, environment and population control," she said to loud applause. "There must be one ethic for all nations-white or non-white, capitalistic or communistic, small or large."

"We have the same choice now of whether to adopt a universal language or to evolve into several major ones," she said.

If we adopt a universal language, then each nation can keep its own languge. Otherwise a few widely-spoken languages will become prominent, she said.

"We now have a tremendous gap between people who grew up before World War II and those who grew up after the war," Dr. Mead said. "There has been a real break in experience. After the Kinsey report came out, the difficulties began.

"Before the report," she said, "parents were pretending to their children that they were far better than they were. This has broken down. Younger people no longer want to be told that people are better than they are.

"They don't conceal things," Dr. Mead said. "They want to live in sin publicly. The new morality is as ethical as the old. Any system that treats its members with dignity is ethical."

A panel of four faculty members screened written questions from the audience. Dr. Robert L. Skrabanek, head of sociology; Dr. Arnold D. LeUnes, psychology professor; David R. Woodard, history professor; and Dr. William P. Kuvlesky, sociology professor, relayed questions to Dr. Mead.

Dr. Mead, in response to the first question, said that mari-(See Universal Ethics, page 2)

Luedecke said he has some problems. plans for the university in mind, but has not set about determin-

In an interview with The Battalion, the retired Air Force general said his former responsibilities with the university did not offer him the opportunities for the close contact with students he now says is essential in his new role.

Gen. Luedecke, 59, was elevated Monday by the A&M Board of Directors from associate director of Texas Engineering Experiment Station and associate dean of engineering to acting president of the University and A&M System.

He said that his energies will be devoted to the continuation of the programs initiated by his friend and fellow classmate, the late Gen. Earl Rudder.

The soft-spoken native of Eldorado pointed out, however, that he will not balk at making major changes if he believes they are necessary.

Gen. Luedecke said he believes 26-year military career when he that the past relationship between retired from the Air Force in the administration and the stu-1958 to become general manager

Propulsion Laboratory at Calistudents this year has been as a member of the Memorial Student fornia Institute of Technology, where he played a major role in space research. He was among 100 distinguish-

ed Texans who helped determine goals for attainment by the university prior to its centennial in 1976. He was a member of the Century Council established by the board of directors in 1961 to conduct a detailed study of the instituion and make longrange recommendations.

Luedecke has been employed by a university for only two years, returning to A&M in 1968. Nevertheless, he said he has been in close contact with universities since 1946, when he became involved in the Atomic Energy Commission.

He noted that he has worked at one time or another with nearly every college and university in the nation, aiding them in some way with some phase of nuclear research, especially in relation to construction of cyclotrons and reactors.

A 1932 A&M graduate in chemical engineering, Gen. Luedecke has a son, Alvin R. Luedecke Jr., who is a senior civil engineering student here.

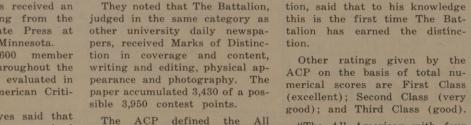

## Issues in CS Council Race

tion.

The Battalion has received an American rating from the ssociated Collegiate Press at e University of Minnesota. Approximately 600 member wspapers from throughout the nited States were evaluated in CP's 82nd All American Critial Service.

Editor Dave Mayes said that cording to a letter received Thursday from the ACP offiials, student newspapers pubished during the fall semester ere judged on coverage and ontent, writing and editing, ditorial leadership, physical apearance and photography.

Marks of Distinction for suerior achievement may be warded in each of the five cateories and a paper must receive our such credits to be rated All American, judges said.

sible 3,950 contest points. The ACP defined the All American award as one given to newspapers who have "... that extra spark of liveliness, imagination and appeal that distinquishes really top publications. We cannot ignore that the best

newspapers have made these intangible qualities an important part of truly excellent achievement.' Jim Lindsey, chairman of the standing job fully aware of both

Student Publications Board and the opportunities and obligations director of University Informa- of a free and responsible press."

### BULLETIN

The Physics Building and Exchange Store were evacuated briefly this morning after university police received an anonymous bomb threat.

Police took a telephone call at 9:50 a.m. from a man who said bombs were scheduled to be ignited in the two buildings at 10:30 a.m.

University police searched the facilities shortly after 10:30 but found no explosives.

"We considered the call a prank but couldn't afford to ignore it," noted University Police Chief Ed Powell.

The call was received by Mrs. Sherry Gytkowski, office secretary. She attempted to transfer the call to one of the officers, but the caller declined to talk to anyone else and hung up.

## Fallout Presents 'The Brig' To Begin Spring Season

"Sir, prisoner number two reporting as ordered, sir."

"You are a mess, maggot, do you know that?" "Yessir."

"Yes, yes you are a mess, boy. Say it. Say you are a mess."

"Sir, I am a mess, sir." "I am going to be watching you among the rest of my lice, and if you are not squared away . . . I will clean up the deck with you. Is that clear, Two?"

"The Brig" is the story of a Marine brig in Japan in 1957. It is the day in the life of six prisoners and two guards.

Kenneth H. Brown had just gotten ont of a Marine brig when he wrote the play. It was first performed on the Living Theater stage in New York. Opening night, Brown and the director were arrested for "creating a disturbance.'

The Aggie Players are presenting "The Brig" at 8 p. m. Saturday in the Fallout Theater behind Guion Hall.

Jim Dennis, the director and a Marine veteran of four years, said the play is fairly true to life. "It hits hard, but it's honest," he said.

Bob Robinson plays the part of the brig's warden, and Dennis Turner plays Sgt. Tepperman, the second guard. Both are on the day watch and seem to get pleasure out of baiting the prisoners, pushing them as hard as possible.

University National Bank "On the side of Texas A&M." -Adv.

Six, the oldest prisoner of the brig, played by Randall Cater, finally cracks under the strain. He had been in the Marines 16 years.

Five, played by Gary Cummings, gets out after only 25 days. His sentence had been reduced five days for good behavior.

Three, played by Kline Reeves, is almost third in command. His position is easiest of the prisoners. He is the only one not picked on as long as he does his duties as ordered.

Two, at the beginning of the play, is the newest of the prison-

ers. Scott Wilson is Two. One is brought in during the play and initiated into the brig accordingly. One is played by David Campbell.

Eight, played by Mike Mc-Caswill, has been in the brig a long time. He and Two are the ones to have the privilege of singing the warden's favorite song, "The Marine's Hymn."

"The Brig" is the first Fallout Theater production of the spring semester. The Fallout is an area built by the Aggie Players in the basement of Guion Hall for the purpose of showing student-directed and, in many cases, student-written plays.

Next Friday, "Who Gives Charlotte Headaches," a one-act play written by Jim Dennis and directed by Melanie Haldas, will be performed.

GREAT SAVINGS PLANS made even better by new legal rates at FIRST BANK & TRUST. Adv.

To Be Made

Honorary Ags

The three Apollo 12 astronauts - including UT graduate Alan Bean - will be made honorary Aggies today at a Houston dinner honoring Gerald Griffin, A&M graduate, who directed the latest moon shot.

Joining Bean in the Aggie circle will be Charles (Pete) Conrad and Richard Gordon.

The dinner honoring Griffin, who earned his aeronautical engineering degree at A&M in 1956, is being sponsored by the Southeast Harris County A&M Club. The 8 p.m. program will be held at Holiday Inn-NASA.

A spokesman for A&M's Association of Former Students and the Apollo 12 astronauts will be among the first to receive the honorary Aggie awards.

### **Civilian Weekend Tickets** Available

Civilian students may exchange their dorm activity cards for Civilian Weekend barbeque and dance tickets according to Raleigh Lane, Civilian Student Council public relations chairman.

The fall dorm activity card is good for a dance ticket and the spring activity card is good for a barbeque ticket, Lane said.

The dance ticket is good for the student and his date. The barbeque ticket is good for only student. Students must purchase tickets for their dates.

Students may pick up these tickets from their dorm counselor through Monday, April 20th. Students that don't have dorm activity cards may purchase the dance tickets for \$3 per couple and the barbeque tickets for \$1 during the same period.
