NOON AND  
EVENING**

**ROAST TURKEY  
DINNER**  
Served With  
Cranberry Sauce  
Cornbread Dressing  
Rolls - Butter  
Tea or Coffee  
Giblet Gravy  
and your choice of any  
two vegetables  
**\$0.99**

For your protection we  
purchase meats, fish and  
poultry from Government  
inspected plants.

Dutchmen on the Brazos—Martine and Jacobus Van Den Heuval of Delft, Holland, take in scenes on campus during an eight-week work-study visit at the university. He is assigned to the hydromechanics lab through the International Association for the Exchange of Student for Technical Experience (IAESTE).

**Smith fills position  
in business college**

Dr. Eugene B. Smith has been appointed associate professor of business analysis in the College of Business Administration, announced Dean John E. Pearson. The 1970 Ph.D. graduate of A&M will also continue as head of the Marine Resources Information Center, a part of the Sea Grant Program, a National Science Foundation-funded program. Smith, 38, currently is information science coordinator in the Vice President for Programs office. His appointment is effective Sept. 1. Dr. Smith received B.S., M.S. and Ph.D. degrees here, the latter awarded last May. His bachelor and doctor's degrees are in engineering and the master's is in computer science. A registered Texas professional engineer, Smith holds memberships in the American Institute of Industrial Engineers, American Society for Information Science, Association for Computing Machinery, Data Processing Management Association, National Microfilm Association and Upsilon Pi Epsilon professional fraternity. He has been an instructor of computer science at Texas A&M, Baylor University College of Medicine and the University of Houston. His work experience includes a two-year tour in the U. S. Army, and civilian employment with IBM, Mosher Steel Co. and as manager of the Baylor College of Medicine Computer Science Program. While here he has also served as project director for the Information System Project funded by the Office of Water Resources Research, U. S. Interior Department. Dr. Smith, his wife and four-year-old daughter live at 1312 Timm, College Station.

**Gangi takes part  
in recent session**

A method of determining pressure-temperature interdependence in the earth's crust was described by Dr. Anthony F. Gangi at a recent symposium in Boulder, Colo. The Geophysics Department faculty member participated in the symposium on "The Structure and Physical Properties of the Earth's Crust" on invitation. The week-long event was jointly sponsored by the Office of Naval Research and Cooperative Institute for Research in the Environmental Sciences. CIRES is a joint undertaking of the Environmental Sciences Services Administration and University of Colorado. Gangi's talk, "An In Situ Method of Determining the Pressure Dependence of Phase-Transition Temperatures in the Crust," was co-authored by Air Force Maj. Neal E. Lamping, A&M geophysics doctoral candidate of Dallas. "The existence of a relationship between temperatures and pressures in the earth's crust would imply that they are representative of a phase-transition," Gangi explained. At the phase-transition, material in the crust would undergo changes in basic properties, such as wax becoming pliable when hot and hard when cold. "It is possible to infer which of a host of possible phase-transitions are most likely to exist on the basis of the actual temperature-pressure relationship," the geophysics professor said. The geophysical-geological measurements involved in the process are made at or near the earth's surface and various models are used to infer temperatures and pressures at depth. The multi-disciplinary geophysical-geological measurement program is being undertaken by Lamping to determine pressures and temperatures at various velocity discontinuities in the crust. At the symposium, Gangi also attended working sessions at which future research programs were outlined to resolve possible conflicts of interpretation of the earth's crustal structure.

**August Special  
MAKE YOUR OWN DEAL!**

We have Eleven Homes From 14 X 60 to 12 X 50 ft., All Completely Furnished.

Browse through our sales lot at your convenience. We are open from 9:00 a. m. to 8:00 p. m. Mon. - Sat. So come on in and let's make a DEAL.

**A&M one of series of stops  
for Dutch honeymooners**

A Dutch couple's second honeymoon has brought Mr. and Mrs. Jacobus Van Den Heuval here for one of a series of stops in North America.

The Netherlands civil engineer who goes by the nickname "Koons" ("It sounds like the way you say Roosevelt," he said) is one of four international students here through the International Association for the Exchange of Students for Technical Experience (IAESTE).

Koons, 24, and his wife Martine are from the Delft University of Technology, where senior Bob Ramsey of Houston spent 10 weeks through IAESTE last year.

"We attended a tidal power conference in Halifax, Nova Scotia, and visited on the East Coast, in Montreal, Chicago and New Orleans on the way to Texas A&M," Van Den Heuval explained.

After several weeks here, the young couple will do some more sightseeing before going home.

"We plan to stay in Mexico a week, visit relatives in Los Angeles, go to Boston and fly to Ireland, England and Belgium on the way," smiled the blue-eyed Martine, who is also putting her training to use with some American business experience.

A native of Brussels, Belgium, she studied interior design at the

Royal Academy of Brussels. Martine works for the architecture firm of Matthews and Associates in Bryan, applying her specialty in the design of a new Temple bank and the new Bryan high school.

"Koons" works for Dr. John B. Herbich in the hydromechanics lab of the Coastal and Ocean Engineering Division of the Civil Engineering Department.

"In Holland," he pointed out,

"water is everybody's interest. We say 'The Lord made the world and the Dutch made Holland.'"

Half of the Netherlands' land area has been claimed from the sea and three-quarters of the population lives in this area, he pointed out.

**The Church..For a Fuller Life..For You..**

**WHEREVER  
WE LIVE**

Harold assured Davie and Tommy that moving day did not mean the end of life for us. In fact, we were not going to the end of the earth. Many people would still be around us. Of course, not our same favorite people . . . whom we will keep on loving even though we don't see them . . . but new friends who would find places in our lives.

And that's the way it happened. Our new neighbors opened their hearts to us. Our boys brought school friends home with them to play and sometimes to eat dinner. Best of all, our family found a new church home — among people who welcomed us because they loved God. Anywhere we go in our country, there is always a church where we can worship with other people. You, too, can find one wherever you move—and right where you are now.
