Civilian leaders ready for fall term

Preparations for civilian student activities during the 1970-71 school year begin next week at the university.

About 75 civilian student leaders will report early for meetings, freshman orientation and residence hall program initiation, announced Howard S. Perry, civilian student activities director.

A Tuesday (Aug. 25) executive committee meeting of the Civilian Student Council will officially open preparations for the

sonnel from Perry's office and Aug. 28. university officials will meet Wednesday for an informal breakfast.

All freshmen will be on campus by noon Wednesday, Aug. 26. Orientation sessions begin that afternoon. Sessions will be in the morning and early afternoons, with evenings left for an Aug. 26 G. Rollie White Coliwith Gen. A. R. Luedecke, act- dents Thursday, Aug. 27.

Council members headed by ing university president; church Civilian Student Council Presi- night, Aug. 27; and the Memordent Mark Olson of Canyon, per- ial Student Center open house,

> Perry said all 17 civilian residence halls, which house about 3,900 single male students, will be involved in the orientation. Day students and university women participation is also being sought.

The civilian student activities director noted that residence halls Aug. 31 start of fall semester seum meeting of all freshmen open officially for returning stu-

Study assesses impact of resources of ocean

economic interrelationship and An estimated total economic inimpact of the marine resources and industries of Texas has been assembled by the Industrial Economics Research Division for the institution's Sea Grant Program.

A 187-page report, entitled "Economic Impact Analysis of Texas Marine Resources and Industries," incorporates concepts of regional economic growth theory and resource economics to the problems of marine resources and industries, emphasizing the dynamic role each plays within identified growth core areas along the Texas coast. Written by John Miloy and E. Anthony Copp, the study includes 63 counties, in which more than 40 percent of the state's population re-

"The report is an in-depth follow-up to our division's inventory of marine resources activities, made in 1969," noted James R. Bradley, IERD head. "But where 'Marine Resources Activities in Texas' simply cited current economic factors, the economic analysis study makes some projections for future growth."

One section deals with offshore mineral industries—oil and natural gas-and their relation-

put, including employment and sales, was \$2.6 billion for the year 1969.

The section devoted to commercial fisheries reveals that Texas accounts for a substantial portion of the total United States fishing output, with shrimp being the most valuable product. Statistics show Texas has consistently been the primary shrimp-producing state in the nation. According to compiled reports, the commercial fishing industry produced total sales of \$325 million within the state during 1969.

Marine transportation and marine recreation and tourism activities were responsible for an estimated input of \$1 billion and almost \$224 million, respectively, into the state's economy.

Other industries, federal and state governmental departments and agencies, and academic and research institutions participating in marine - related activities are also included in the report's tabulations.

According to the report, the conservative assumption can be made that the ratio of current marine-related employment ship to on-shore activities as to among economic activities to

the same over the next 30 years. Holding to this strict assumption, the investigators concluded that 90,000 persons are expected to be employed directly in marine activities in the Texas marine region by the year 2000, and that more than 56,000 employes will be related directly to marine transportation and off-shore

mineral industries. The study was partially funded by the National Science Foundation's Sea Grant Program. A&M. is one of eight U.S. universities receiving Sea Grant institutional support from NSF. A&M was awarded \$750,000 for 1969-70 Sea Grant activities. IERD is part of the Texas Engineering Experiment Station.

Parents accept decorations for dead son

cluding the Bronze Star Medal, Air Medal and Purple Heart, for Army Pfc. Anthony E. Currie of Bryan were awarded Wednesday to his parents.

Ollie L. Currie, 206 S. Sims, Bryan, and Mrs. Mildred Frazier, Private Currie's mother of Houston, received the awards in a ceremony here.

Currie, 19, was killed in Vietnam on April 15. A member of Company B, 1st Air Cavalry, he died during a mortar attack on a firebase near the Cambodian

The former Bryan S. F. Austin High School student was cited with the Bronze Star Medal for "outstanding meritorious service in connection with ground operations against a hostile force" in Vietnam from January to April, Also among nine encased deco-

rations presented by Col. Jim H. McCoy, A&M commandant, was the Combat Infantryman Badge, Commendation Medal, carbine sharpshooters badge, mortar marksman badge and campaign decorations. Attending the ceremony were

er received his Ph.D. degree from "We are very pleased to have one of his four sisters, Mrs. Joyce West, 1209 Antone, Bryan, these young men joining the and friends and officers of the Texas A&M University staff and Military Science Department here. Currie also was survived accelerate programs in the Soil by a brother. His father formerly worked for the city of Bryan.
