

# Galveston campus now taking shape

A new campus is taking shape on Galveston's Pelican Island. The 100-acre facility, the Mitchell Campus, will house A&M's Moody Marine Institute. The institute includes the Texas Maritime Academy, Marine Laboratory and various oceanographic installations.

"A&M has committed itself to a major role in oceanographic research and development of marine resources and, with public and private support, will have the appropriate facilities to get the job done," observed Acting A&M President A. R. Lueddecke. Campus master planning calls for a four-stage build-up, resulting in approximately 25 buildings. The campus will eventually be divided into two areas, an academic core for classrooms, laboratories and administrative offices and a recreation core containing dormitories and related facilities.

Foundation work is complete for the campus' first two buildings, a classroom-administration building and technical laboratory for the Texas Maritime Academy. Both structures are scheduled for occupancy next fall.

The facilities are being constructed under contracts totaling \$1,054.11. Epcoc Construction, Inc., of Houston was awarded an \$844,320 contract for the two buildings and Don Trapey Construction Co. of Texas City received a \$209,791 award for paving and utilities.

TMA cadets are already living on the Mitchell Campus—aboard the academy's training ship, the Texas Clipper. The 15,000-ton ship is berthed at the campus docks, which were completed this summer.

The docks, which will serve the university's two oceanographic research vessels, were constructed with \$500,000 state appropriation obtained through the help of State Sen. A. R. Schwartz and Rep. Ed Harris of Galveston and Rep. Dean Neugent of Texas City.

Land for the campus was donated by Houston businessman George Mitchell. The campus is named in honor of his parents, Mr. and Mrs. Mike Mitchell of Galveston.

The Moody Foundation of Galveston provided a \$1 million grant for construction of the first facilities. The Moody Marine Institute honors the late William Lewis Moody Jr., also of Galveston.

Aside from the maritime academy, majority of the activities planned for the Mitchell Campus centers around the university's Oceanography Department and Sea Grant Program.

THESE ARE THE DESIGNS of four Christmas stamps which will be printed on the same sheet. They feature four antique Christmas toys — a horse, a mechanical tricycle, a doll carriage and a tin and cast iron locomotive. A fifth stamp featuring a Nativity scene also will be issued. (AP Wirephoto)

## Jordan fighting stopped; Arabs still oppose Israel

By THE ASSOCIATED PRESS Arab truce terms persuaded Palestinian guerrillas and Jordanian army troops to stop shooting at each other in guerrilla strongholds of northern Jordan Thursday, a spokesman for the Al Fatah guerrilla group said.

The Beirut spokesman said agreement to accept the Cairo-arranged cease-fire was reached in Ramtha, a border town on the Damascus-Amman highway, the guerrillas' principal supply route from Syria.

Ramtha and nearby Irbid, Jordan's second largest city, were quiet, the guerrilla spokesman said, after reports of shelling by Jordanian troops earlier in the day.

In Amman, Jordan's new government said it would recognize only the Al Fatah guerrilla group, the major Palestinian organization headed by Yasir Arafat.

Other guerrilla organizations operating in Jordan will be considered illegal, Information Minister Maj. Adnan Abu Odeh said. He condemned Marxist guerrilla bands, such as the Peking-oriented Popular Front for the Liberation of Palestine that organized the hijacking and destruction of four international jetliners last month and at one point held more than 400 passen-

gers and crew hostage. "I tell you the struggle in Jordan has been between the government and the Marxists," he said, outlining the new government's policy. It replaced the military government that ruled during Jordan's nine-day civil war that left, according to some reports, 20,000 dead.

The death of Egyptian President Gamal Abdel Nasser, who had accepted the U.S.-sponsored Middle East peace plan, brought renewed pleas from international capitals for Arab-Israeli peace talks.

Presidents Nixon and Tito, meeting in Belgrade, issued a general communique calling for negotiation rather than confrontation to meet world problems. Soviet Premier Alexei N. Kosygin, in a Radio Cario broadcast, suggested Egypt's new leadership should follow Nasser's move toward peace. He said the Soviet Union would "continue to extend support to Egypt and the Arab countries" but his country "stands for consolidating peace in the Middle East."

Delegations from 10 Arab countries, meeting in Cairo after Nasser's funeral, said they would "follow Nasser's policy to fight international colonialism and Zionism."

## Research vessels to study Gulf reefs

A&M's two oceanographic research vessels will converge on the Flower Gardens in the Gulf of Mexico next week for the first coordinated studies of the unique coral reef area.

Dr. Richard Rezak, associate professor of oceanography, said A&M researchers will conduct joint investigations of physical, biological and engineering aspects of marine acoustics.

The two ships, the 180-foot R/V Alaminos, and the 100-foot R/V Orca, will be on station at the Flower Gardens Sunday through Tuesday.

The Flower Gardens, northernmost known living coral reefs in the Gulf, are located about 126 miles southeast of Galveston.

Studies of the area are being supported by the Office of Naval Research, the National Science Foundation and A&M's Sea Grant Program.

Dr. Rezak, chief scientist aboard the Alaminos, said operations with the larger ship will primarily involve a bottom sampling and coring program.

He noted a major goal of the cruise will be to gather information concerning the distribution of sediment types around the reef. Such knowledge, he added, will be valuable in petroleum exploration in areas where similar reefs have grown during the geologic past.

The Orca will be the primary acoustical laboratory.

"Knowledge of acoustics in the Gulf of Mexico is extremely limited," Dr. Rezak said. "Such information is valuable in operation of military and commercial fisheries sonars."

Dr. Jerald W. Caruthers, assistant professor of oceanography, will conduct acoustic transmission and reverberation experiments, while Dr. Stephen Riter,

assistant professor of electrical engineering, will carry out experiments in marine acoustical communications. Dr. Thomas J. Bright, assistant professor of oceanography, will gather information concerning animal sounds associated with the reef community.

### Cliff's Notes is having a Ph.D. at your beck & call

Use Cliff's Notes when you study literature — it's like having a Ph.D. at your beck and call. (See list at right.) Cliff's Notes authors are scholars and have taught the works they write about...they know what you need to help you outside the classroom...and you get it in clear, concise form.

Get Cliff's Notes and get more out of your literature courses. See your dealer today.

## MIND CONTROL

AND "ALPHA DYNAMICS"

FOR EVERYONE INTERESTED IN DEVELOPING MENTAL POWER...

On April 2nd, NBC Television carried a Science News Special—"The Unexplained," narrated by Rod Serling—in which one of the most fantastic breakthroughs in modern psychology was discussed. This new science deals with the conscious control of brain waves—the electrochemical activity of the brain. This new science is called Alphenetics, and concerns itself with the Alpha Rhythms of the brain. Dr. Joseph Kamiya, researcher at the University of California, demonstrated on national TV how students can learn to control their brain waves and discussed some of the phenomenal capabilities of man with self-control of his brain waves.

There are four principal brainwave rhythms: the Beta-wave, associated with the outer conscious levels, tension, anxiety, physical activity, etc.; the Alpha-wave, associated with inner-levels of mental activity, tranquility, inspiration, creativity, E.S.P., healing processes, memory, learning, day-dreaming, and other phenomena; Theta-waves, which is related to deeper inner meditation, mental control of pain, and finally the Delta-waves, which are found in deep sleep or total unconsciousness.

Exploration of this almost unknown continent—the human brain—has been pioneered by a soft-spoken parapsychologist, Jose Silva, of the Institute of Psychorientology, of Laredo, Texas. This sincere, dedicated scientist has been training people to control their brain waves for many years.

Twenty-five years ago Silva and his associates began their research in Mind Control, to see if it was possible to increase a person's I.Q. factor. Amazingly, Silva discovered that not only could I.Q. be increased but a person trained in this technique could even control certain areas of the Autonomic Systems, heart beat, respiration, body temperature, etc. The implications of this breakthrough with regards to health and disease was staggering. With Mind Control, it was found that a person could banish pain, accelerate healing, eliminate insomnia, migraine headaches, as well as untold psychosomatic problems.

As research continued, an amazing discovery was made. Volunteer students were found to be surprisingly sensitive to the feelings and emotional attitudes of others. In other words they became more intuitive. In-depth studies revealed that anyone with a normal brain and sufficient training could develop so-called E.S.P. and clairvoyance. Alpha Brain Wave Control actually enables anyone to become a superior human being.

ALPHA BRAIN WAVE CONTROL —Three years ago, the directors of the Institute of Psychorientology, decided they were ready to release their findings to the general public, and offer the M. C. Training Program to everyone interested in developing a better mind.

10,000 GRADUATES —COAST TO COAST—Now there is no longer any doubt as to the great value of

PSYCHOLOGIST—"When we have learned to live and practice the principles of Mind Control, continuously in our homes, schools, churches, businesses and our politico-social structures, what limit can one put on what we can do for our world!"

SALESMAN—"The first month after mind control my sales increased by 75%. I attribute my continued business and personal success to this course."

BUSINESSMAN—"I quit smoking after my first 12 hours of Mind Control instruction — it's amazing." —G.P.K., Montgomery, Alabama.

HIGH SCHOOL COACH—"Mind Control has been most effective in my work with young people, especially in the areas of motivation and problem solving." —A.E., Fort Worth, Texas.

FARMER—"After thirty years of insomnia—it's gone. Through Mind Control I did what no pill or prescription had ever done." —J.R., Chicago, Ill.

MINISTER—"Learning to use 10 minutes of Alpha, to take the place of 4-6 hours normal sleep, has been invaluable to me." —R.S., Wichita, Kansas.

HOUSEWIFE—"Had I learned Mind Control when I was 14 years old, I would have never suffered 50 years of torture with migraine headaches. I now have time for my family, teaching, painting. My gratitude knows no bounds." —Mrs. F., Atlanta, Ga.

COLLEGE STUDENT—"Mind Control has enabled me to concentrate better, solve problems and have more retentive memory." —L.M., Wichita, Kansas.

HOUSEWIFE—"I lost 32 pounds by using the Silva Mind Control Method." —R.S., Oklahoma City, Okla.

RADIO ANNOUNCER—"Mind Control changed our family life completely, from a negative outlook we are now radiating the positive. The subjective training is most rewarding. If only everyone knew about Mind Control it would be tremendous." —J.B., Dallas, Texas.

WITH THIS COUPON. OFFER EXPIRES: Oct. 31

# What the Dickens is Fish & Chips?

"Please, Sir, I want some more."

You think they're just fried fish and potatoes? Good Grief, Sir (or Madam), do you know what you're saying? To call ALFIE'S Fish and Chips "just fried fish and potatoes," is like saying the London Symphony is just a group of fiddlers!! It's like saying Great Britain is just an island!! (The very idea!!) But how to describe ALFIE'S Fish and Chips? The mind boggles!! I can tell you that the fish are tender, flaky filets, fried crackling crisp in fresh, hot oil. That the chips are golden bits of fried potato. But what good? You can't really eat words, that's just a saying! So you'll just have to eat ALFIE'S Fish and Chips! Be sure to splash on plenty of ALFIE'S exclusive imported malt vinegar... which is neither malt nor vinegar... but a zesty, tangy flavoring you'll find only at ALFIE'S! Once you've eaten ALFIE'S Fish and Chips, you'll know what the dickens we're talking about.

ALFIE'S Fish and Chips are Covent Garden, The Beatles, Robin Hood, Mary Quant, Selfridge's, The Red Lion, Piccadilly, Shakespeare... and all the rest!
