Coach Adamson named Professor Emeritus

Arthur D. Adamson, former A&M swimming coach who taught in the Health and Physical Education Department 32 years, has been named Professor Emeritus, announced President Jack K. Williams.

Adamson retired in 1970. Dr. Williams cited him for devoted service to A&M as a professor and coach.

Adamson, 66, coached 34 Texas A&M swim teams. He was recognized by those with whom he

worked as the "idel teacher-coach," according to Walter Penberthy, department head during Adamson's early years on the faculty.

During the longest-tenured Texas A&M coach's year here, he became best known for summer programs in which many Bryan and College Station youth learned and became proficient in swimming. He was instrumental in the formation in 1941 of the present College Station Recreation Council.

Adamson, a two-time 100-yard freestyle national champ, coached five All-America swimmers, had SWC champions in 1945 and 1956, shared the championship in 1944 and fielded national water polo champs in 1939 and 1965.

Range science sets lecture on forage

Dr. John L. Launchbaugh of the Kansas Agricultural Experiment Station in Ft. Hays will give a Range Science Department-sponsored lecture Thursday at Texas A&M University.

The 7:30 p.m. Plant Sciences Room 112 program is entitled "Influence of Site and Grazing Systems on Forage Plant Composition and Production."

Automotive society wins Bendix award

The Society of Automotive Engineers has won the Bendix Award for the fifth time as an outstanding student branch.

A plaque and \$150 check will be presented to the local branch by Dick Woodbury, national SAE director, April 19, at the Gulf Coast Section meeting of the national organization. Students also will present a technical program at the session.

Shell schedules geology field trip

A geology field trip conducted by Rufus J. LeBlanc, senior geologist for the Shell Oil Company, is scheduled April 6.

Advanced undergraduate and graduate students, faculty and staff of the College of Geosciences are welcome to attend, noted a Geology Department spokesman.

The field trip will cover the aspects of modern sedimentation

in the Brazos alluvial and deltaic plains and the Galveston barrier island complex.

The spokesman said field trip participants must provide their own lunch.

Three engineers named life members of ASCE

Three civil engineers now retired from A&M have been presented lifetime membership certificates by the American Society of Civil Engineers.

Those honored were Spencer J. Buchanan, Codie D. Wells, and Dr. S. R. Wright.

Dr. Charles H. Samson, head of the Department of Civil Engineering made the presentations at the March joint meeting with the Texas Society of Professional Engineers.

King Cotton to be crowned April 13

Miss Ann Andres, Cotton Pageant Queen in 1969, will crown King Cotton during A&M's 37th Annual Cotton Pageant and Ball April 3.

King Cotton is Billy Mayfield of Lorena, a junior plant and soil sciences major. He was chosen by Agronomy Society members in recognition of his active record of service to the organization.

The pageant, which starts at 7 p.m. in the Bryan Civic Auditorium, honors cotton as the state's main cash crop. The ball will start at 9 p.m. in the Ballroom of the Memorial Student Center.

Speech-controlled machines discussed

A bioengineering seminar presentation at A&M by Lewis S. Berger, senior research scientist at Southwest Research Institute of San Antonio, centered around the control of machines by spoken commands, reports Dr. Paul H. Newell, program head.

Newell said his A&M bioengineering group is interested in developing voice-controlled assist devices for disabled patients, such as wheelchairs. Automatic word recognition systems would be a key component of such aids.

Berger discussed methods of representing the speech signal in the design of automatic word recognizers.

Campus study said outdated

WASHINGTON (AP)—In a report three members called outdated, a Senate committee said Tuesday that campus disorders have been stirred up by groups seeking to create "rebellion, revolution and eventual destruction of the 'system'."

The Committee on Government Operations said such groups have exploited alleged campus grievances, but that it is important for the nation's universities to set up procedures for dealing with legitimate complaints.

It called on college administrators to make clear to both faculty members and students the standards of conduct expected and the penalties for violations.

The report was criticized by Sens. Abraham A. Ribicoff, D-Conn., Charles Percy, R-Ill., and Jacob K. Javits, R-N.Y. Percy said it is "clearly out of date, has been overtaken both by events and superior treatment of the subject and might well make a negative rather than a positive contribution."

The report was based on hearings conducted from 1967 to 1969 by the committee's permanent subcommittee on investigations. College disorders were reviewed as part of the panel's over-all probe of riots and disorders around the nation.

"The campuses are a focal point for groups whose clear motive is to create chaos and anarchy," the report stated, asserting that such groups generated confrontations by inducing support from "otherwise well-intentioned students" on the basis of some longstanding campus grievances.

The report said many leaders and instigators of campus disorders

came from other schools and nonstudents. "Testimony establishes that Students for a Democratic Society and the Black Panther party, as well as affiliates of those organizations and others of similar philosophy, are guiding forces in a large percentage of the campus disruptions in recent years," it said.

The subcommittee studied disruptions at these colleges: University of California at Berkeley, Stanford, Harvard, Columbia, City College of New York, Howard, Brooklyn College, North Carolina Agricultural and Technical State University and Vorhees Junior College in Denmark, S.C.

Chess Club wins tournament

The Chess Club won a tournament at San Jacinto College Saturday. Competing in the tournament from A&M were Rudy de la Garza, Bill Kostura, Tris Roper, Bob Sims, Joe Turner and Tom Weaver.

The final result was 14½ to 9½

in favor of the Aggies.

The club plans to participate in a championship tournament in Houston in April.

The next meeting of the club will be Thursday at 7 p.m. at the University Lutheran Student Center.
