13 co-op students honored for work

Thirteen students attending Texas A&M on the Cooperative Education Plan have received awards for outstanding work.

Assistant Engineering Dean J. G. McGuire, program director, explained co-op students spend alternate semesters on the campus and at places of industrial employment or in research activities here. About 350 students and 60 employing agencies participate.

Dean Fred J. Benson of the College of Engineering joined in the presentation of the certificates Monday in the Architecture Building auditorium.

Speakers for the ceremonies were from the San Antonio Service Board. They were John K. Spruce, manager of construction, and R. O. Bell, superintendent of training. James C. Armke, junior electrical engineering student from Devine who worked for the San Antonio utilities company last spring, also gave a short talk.

Honored for receiving excellent ratings from their spring semester employers were Rodney E. Harrington of Kilgore, senior in aerospace engineering who worked for General Electric in Tyler; Garland W. Horak of Caldwell, senior, mechanical engineering, Atlantic Richfield, Dallas; John F. Lacy of Miles, senior, industrial engineering, Reynolds Metal, Corpus Christi; Richard K. Murphy, College Station, senior, electrical engineering, Nuclear Science Center, Texas Engineering Experiment Station.

Also Raul A. Reyna, San Antonio, senior, electrical engineering, Atlantic Richfield; Robert J. Reynolds, Lufkin, junior, mechanical engineering, Texas Metal Casting of Lufkin; Craig J. Scott, Carrollton, sophomore, electrical engineering, Texas Power & Light; and William C. West, McAllen, junior, electrical engineering, Texas Engineering Experiment Station Nuclear Engineering Research.

Winners in the judging of research papers were Dennis A. Baltuskonis, Houston, sophomore, chemical engineering, Dow Chem-

ical in Freeport; Marc L. Del-flache, Houston, junior, civil engineering, Texas Highway Department, Houston; Michael A. Edwards, sophomore, El Paso, electrical engineering, Nuclear Science Center; Mitchell R. McVay, Ogdallala, Neb., junior, chemical engineering, Texaco, Port Arthur; and Clay A. Noble, Ft. Worth, sophomore, mechanical engineering, LTV, Dallas.

Ten graduating seniors and two receiving master's degrees who participated in the Cooperative Education Program were recognized. McGuire said the program also has at least one graduate who has attained doctoral rank.

Five appointed to Economics faculty

Five new faculty members have been appointed to Texas A&M University's Economics Department, announced Dr. John W. Allen, department head.

Joining the department this fall are Dr. William R. Allen with the rank of professor; Dr. Arthur S. DeVany, visiting associate professor; Dr. Nicolas Sanchez, assistant professor, and Robert T. Kudrle and Richard J. Sweeney, lecturers.

Dr. William R. Allen, no relation to the department head, previously served as chairman of the Economics Department at the University of California at Los Angeles. He specializes in the area of international trade and

finance and has published more than 30 technical papers on the subject. He also is the author of several books, including "International Trade Theory: Hume to Ohlin," "Foreign Trade and Finance" and a textbook entitled "University Economics."

Allen earned his undergraduate degree and Phi Beta Kappa honors at Cornell and Ph.D. at Duke. He is a former president of the Western Economic Association.

DeVany was formerly a research economist at the Center for Naval Analysis at the University of Rochester. He was previously associated with the Environmental Studies Board of the National Academy of Sciences in Washington, D. C.

He earned his Ph.D. at UCLA and has been a National Science Foundation fellow, Earhardt fellow and Lilly Foundation grant-holder.

Sanchez, recipient of a Woodrow Wilson Dissertation Fellowship for 1970-71 at the University of Southern California, just completed his examinations for the doctorate with honors.

Kudrle is a Ph.D. candidate at Harvard, where he received his B.A. degree magna cum laude in 1964. He was a recipient of the Rhodes Scholarship and the Nuffield College Studentship at the University of Oxford, where he received the B.Phil. in 1967. He

Term begins Sept. 13

IES accepting applications

Texas A&M University's Institute of Electronic Science is now accepting applications for the fall term beginning Sept. 13, Chief Instructor Arlie Patton said Tuesday.

The 18-month institute has three six-month terms and prepares graduates for careers as technicians in electronics fields. Spring term graduation is scheduled Aug. 27. Patton said the 17 candidates for graduation all have job offers.

Thirty new students have already pre-enrolled for the fall term, Patton noted, and he expects at least 40 for the start of classes.

To be admitted into the institute the student must have a high school diploma or equivalent, a knowledge of algebra and the ability to comprehend technical information.

Consideration is given to applicants with a background in basic electronics, work experience and armed forces training.

"Depending on background and experience, the student completing studies is thoroughly trained to work with sophisticated electronic apparatus," Patton said.

"This normally includes communications, telemetry, process control, instrumentation, automation, computer and nuclear science," he added.

The institute, located at the Texas A&M Annex 12 miles from the main campus, is adding biomedical electronics to its curriculum for the first time this fall.

Patton pointed out the need for medical electronics specialists is expected to increase by 300 per cent within the next five years.

Humble Oil honored for broadcasts

Southwest Conference football unofficially opened its 1971 season Thursday with the 13th annual Fort Worth Football Rally.

The annual award for outstanding service to the Southwest Conference was presented for the first time to a company rather than an individual. Humble Oil & Refining Co. was honored for its 38-year sponsorship of conference radio broadcasts.

More than 100 radio stations now carry the broadcasts which cover all games played by each of the eight teams in the conference.

Humble was also cited for its annual production and distribution of "Southwest Conference Highlights," a 30-minute film featuring the outstanding plays and games of the past season. More than a million persons view the film each year.

WELCOME BACK, AGGIES

A NEW YEAR - AND A NEW CABLE TELEVISION SYSTEM!

We at Community Cablevision wish for you a productive and enjoyable year and we would like to be a part of your entertainment with Bryan - College Station's only totally new, completely—transistorized cable TV and FM stereo system utilizing microwave facilities for maximum consistency in picture quality.

We offer eleven channels of TV entertainment, including all 3 major networks, one independent station, two educational TV Stations (KAMU-TV is carried on our channel 12), A 24-hour weathercan service with KORA-FM music, a 24-hour country and western FM radio station (KIKK-FM, Houston), and our own cablecasting service (CCIV-Ch. 4) featuring the finest in local programming. Don't miss "We Are The Aggies" premiering in September, plus other shows of interest to you throughout the school year, such as "The Shelby Metcalf Show" and "The Tom Chandler Show."

All this for only \$4.00 per month, with **NO CHARGE** for the installation. Also, for a modest additional cost, you can have our optional FM service connected to your FM radio or tuner. This service allows you to tune the entire band on your tuner, making available a choice of some 20 - 25 FM stations. Call today for full particulars.

Community Cablevision is a local, publicly-owned company and is operated by Aggies whose goal is to provide the finest cable TV and FM stereo service possible. Give us the opportunity to serve you; we'll both be happy!
