'Yankee' to be featured in slide show tonight

The seventh world voyage of the Brigantine "Yankee" will be discussed and depicted in a slide show by Gordon Richardson of Caldwell at a meeting of the A&M Sailing Club tonight.

Richardson was a crew member of the voyage, which has been the subject of three "National Geographic Magazine" features and a television special.

Sailing Club President Richard Briscoe said the public is invited to hear Richardson's account of the Yankee's voyage. The 7:30 p.m. meeting will be in Room 105 of the Geology Building.

Highlight of the Yankee cruise was the finding of the anchor and other parts of the "HMS Bounty" off Pitcairn Island in the South Pacific. Richardson will display part of the anchor and copper nails used to hold copper plating to the bottom of the Bounty.

Engineers participate in A&M program

Twenty-seven practicing engineers, including company executives and plant managers from 10 Texas cities, will participate in the visiting engineers program at A&M which began Monday.

The engineers will participate in eight programs lasting through Friday, Oct. 8. James H. Earle, head of the engineering design graphics department of the College of Engineering, said: "We

are proud of the high caliber of practicing engineers who will be participating and working on a man-to-man basis with our classes." He noted with this semester, 342 engineers will have participated in this program since it was started in 1960.

Math colloquium to be conducted

A mathematics colloquium by Prof. R. H. Bing of the University of Wisconsin will be con-

ducted Thursday at A&M.

Bing will speak on mappings of E to the third power at 4 p.m. event in Room 297 of Academic Building. A&M Mathematics Department head Dr. R. Blakley said the colloquium is open to all interested individuals.

A member of the National Academy of Sciences, Bing is a visiting professor of mathematics at the University of Texas at Austin.

NASA director praises Apollo 15

SPACE CENTER, Houston (AP)

—Dr. James C. Fletcher, administrator of the National Aeronautics and Space Administration, said here Tuesday Apollo 15's voyage to the moon "produced material and data beyond our wildest speculations" and that the two remaining moon missions may be even more successful.

Dr. Fletcher, speaking at a NASA awards ceremony, said that Apollo 15 "reaffirms our primacy in space, thereby strengthening our leadership in the world community."

He said after Apollo 15's Apollo 17, the last two manned spaceflights not on the moon, but rather for mankind here on earth.

The administrator presented medals and awards to more than 200 scientists and engineers for their work in connection with Apollo 15.

The Apollo 15 astronauts, Dr. Scott, Alfred Worden and James Irwin, spoke briefly, thanking space engineers and scientists for their work.

Lets you make the grade

Pick up a copy of Wiley's *Student Study Guide with Programmed Problems* for Halliday & Resnick.

Suppose thermodynamics is your weak spot. In that chapter you'll find all the *essential ideas* from the text, including heat conduction, First and Second Law, reversible processes, and entropy. . . *detailed examples* to illustrate each idea. . . and *programmed solutions* of problems on thermodynamics.

And the same three aids—the *essential ideas*, *detailed examples* and *programmed solutions* of problems—are in every chapter. (There's a chapter in the study guide for every chapter in the text.)

Look for the *Student Study Guide With Programmed Problems* at your campus bookstore.

It can make the difference.

Student Study Guide With Programmed Problems
