

# Thousands of Red Chinese sneak into U.S. each year, report says

WASHINGTON (AP)—As many as 4,200 aliens from Communist China sneak into the United States every year, according to secret Justice Department intelligence reports which say some

of the aliens are on espionage missions, and others are involved in narcotics traffic.

Only one in 10 of these illegal aliens is caught and deported, the reports say. Among those identified by the government, many have been traced to the Hong Kong Seamans Union, an organization said by the FBI to be engaged in espionage. Other Chinese aliens taken into custody have been carrying narcotics shipments destined for U.S. contacts.

According to a source in the Immigration and Naturalization Service, the Justice Department section responsible for capturing illegal aliens, the mainland Chinese have been coming for about five years, entering this country by jumping ship in U.S. ports or by way of smuggling operations in the United States and Canada.

Just last week, according to the confidential reports, INS smashed a ring engaged in smuggling Chinese sailors from Vancouver,

British Columbia, into the United States at Bellingham and Blaine, Wash., at \$1,000 a head.

The operation was broken up after the U.S. Border Patrol caught one group of the aliens as they crossed the border on foot a mile east of Blaine. A second group made it to the New York metropolitan area. Three of them were arrested last Wednesday in Newark, N. J., and told authorities they made their first contact with the smugglers in Hong Kong.

According to INS sources, as many as 2,500 mainland Chinese are smuggled into the United States each year. Another 1,700 jump foreign-flag vessels in U.S. ports. The intelligence reports said 5,640 entered that way between 1965 and 1970.

Chinese seamen among the flood of illegal aliens have been traced by the FBI to the Hong Kong Seamans Union.

An FBI intelligence report described the union this way:

"HKSU has voiced vehement opposition to United States military action in Vietnam and dissuades seamen from serving aboard ships carrying materials to Vietnam. Conversely, the HKSU encourages seamen to sail on ships bound for North Vietnam. HKSU has approved a policy of placing Communist seamen on Western ships for the purpose of sabotage or capture in the event of future hostilities.

"Chinese seamen recruited in

Hong Kong serve on ships calling at major world ports, thus providing an opportunity for contact service and intelligence collection."

The FBI report said that Chinese shipjumpers in the United States had arrived in vessels flying Liberian, Norwegian, British Panamanian, Dutch, Israeli, Swedish and Danish flags.

Smugglers bringing aliens into the country charge from \$100 to \$1,000 per person, authorities say.

## A&M grads are decorated by Air Force

Awards and advancement have been received by A&M graduates serving in the U. S. Air Force.

Lt. Col. William P. Cramer of San Antonio completed the Air War College; Maj. Ronald H. Waters of Sayre, Okla., received the Commendation Medal; 1st Lt. Christopher W. Burpo of San Antonio graduated with honors from a technical instructors training course and 1st Lt. Floyd G. Whitehouse of Pearland was selected outstanding instructor pilot.

Commander of a 6th Weather Wing detachment at Hanscom Field, Mass., Colonel Cramer took the Air War College correspondence curriculum to prepare for higher command and staff positions. He received the M.S. in meteorology at A&M in 1963.

Major Waters was cited at Norfolk, Va., for service in space and missile research at Norton AFB, Calif. He presently is attending the Armed Forces Staff College. With degrees from Oklahoma State, he received the Ph.D. in civil engineering at A&M in 1967.

Lieutenants Burpo and Whitehouse are 1968 graduates. Burpo remained at Keesler AFB, Miss., to teach with a unit of the Air Training Command. He studied accounting at A&M and was commissioned through Officer Training School.

Lieutenant Whitehouse serves with an Air Training Command unit at Reese AFB. Commissioned at A&M, he studied mechanical engineering and was Squadron 3 executive officer.

## Open house will be held for travelers

Dr. and Mrs. Haskell Monroe will hold an open house Sunday at their home, 1901 Lawyer St., for all A&M faculty and students making the Christmas holiday trip to Russia.

Dr. Monroe said the open house will begin at 4 p.m. and include slides and talks by local people who traveled to Russia recently.

The get acquainted meeting is for those persons either already signed up for the trip or considering making the tour, Dr. Monroe said. The Monroes will be advisors for the Russia tour, one of the TAMU European Tours '71 sponsored by the Memorial Student Center Travel Committee.

Don Webb, travel chairman, said the tours are open to A&M faculty, staff, students, former students and their families.

## Seaman, Berridge attend conference

Two members of A&M's educational administration faculty will participate this week in the sixth Statewide Conference for Adult Education Directors.

Dr. Don Seaman, adult education director of the College of Education, and Dr. Robert I. Berridge, Community Education Center director, will attend the three-day Corpus Christi conference.

Seaman and Dr. Earl Jones, former A&M education professor now president of Incarnate Word College in San Antonio, will be featured on a Thursday afternoon panel on "Teacher Training in Higher Education."

Berridge will discuss the "Community School Concept" at a Friday morning coffee. He directs the center established at A&M last summer through a Charles S. Mott Foundation grant. Both are members of the faculty in the Education Administration Department, headed by Dr. Harold L. Hawkins.

The Corpus Christi conference is sponsored by the Texas Education Agency.

## McIntyre to present physics colloquium

Dr. J. A. McIntyre, professor in the Department of Physics, will speak at the physics colloquium Thursday. It will be held at 4 p.m. in Room 146 of the Physics Building.

The topic for Dr. McIntyre's lecture is "Nuclear 2-Body Forces in a 3-Body System."
