## Senate - House conferees agree on cancer bill

WASHINGTON (AP) — Senate House conferees agreed Tuesday on a \$1.6-billion bill to mount a concentrated campaign against cancer.

The compromise retains most of the organizational provisions contained in a bill that had passed

the House, including retaining the cancer program within the National Institute of Health.

Sen. Edward M. Kennedy, D-Mass., and Rep. Paul G. Rogers, D-Fla., leaders of the legislative drive, said the compromise retains the best features of the House bill and one which had passed the Senate.

They said they expect the compromise will have the approval of President Nixon and the American Cancer Society.

Earlier in the day, President Nixon had sent the conferees word he would accept either version of contested sections of the bill in order "to gain prompt passage of the legislation."

The President, in a letter to Kennedy and eight other senators who requested his views, said the differences which still exist "are largely a matter of detail."

"It will insure action by providing government and science with the tools to do the job," Kennedy told a reporter following the closed conference committee session.

"I think everybody will embrace this bill, including the President," Rogers said.

The House's version passed 350 to 5, while the Senate's bill had been approved 79 to 1.

The bill charts a three-year program aimed at helping science find the cause and develop a cure for cancer.

The American Cancer Society had argued for the Senate's organizational approach, which was designed to create an independent "conquest of cancer agency" within NIH but give the agency budgetary freedom and direct access to the President. The Senate bill had put no ceiling on funds.

The House's version was aimed at expanding the authorities of the National Cancer Institute and the NIH to advance the national attack on cancer, with responsibility for coordination of the program resting with the director of the National Cancer Institute.

### Humble makes grant of \$16,500

A Humble Companies Foundation grant of \$16,500 was presented Thursday to A&M, continuing a program initiated by Humble 30 years ago.

President Jack K. Williams received the check from J. H. Galloway of Houston, vice president and member of the Board of Directors of Humble Oil & Refining Company. Galloway was graduated from A&M in 1931.

Seven other Humble officials including two A&M graduates accompanied Galloway for the ceremonies. The Aggies are C. S. Fleischmann of Houston, manager, Eastern Marine Division, and P. W. Edge, Jr., of Dallas, manager, Western Region.

"We still want more quality A&M graduates," Galloway said in presenting the check to Williams. Ceremonies were held in the president's office.

Williams assured the Humble leaders that the grant "will be used to good advantage in our teaching programs."

The \$16,500 grant will be distributed among 12 units of the Colleges of Engineering, Business and Geosciences.

The gift to A&M was part of a total of \$397,000 awarded by the foundation for the 1971-72

academic year to 97 higher educational institutions in the nation.

Companies participating in the Humble Companies Foundation, a non-profit organization, are Humble Oil & Refining Company, Humble Pipe Line Company, and Esso Production Research Company.

### Chevrette, Little chosen officers of Texas association

Two A&M health and physical education professors were selected for positions of leadership next year in the Texas Association for Health, Physical Education and Recreation.

Dr. Carl Landiss, department head, said Dr. John M. Chevrette was named chairman-elect of the association's measurement and evaluation section and Dr. Mildred Little was chosen chairman-elect for the professional education section.

Drs. Chevrette and Little, both associate professors, were elected at the group's 48th annual meeting in Abilene.

### Veltman to speak on land planning

James A. Veltman, ecological planner for George Mitchell and Associates of Houston, will discuss "The Ecological Approach to Land Planning Practices" Thursday at A&M.

Veltman's 2 p.m. lecture in the Architecture Building auditorium is sponsored by A&M's Landscape Architecture Department.

Prior to joining the Houston land development firm headed by a 1940 A&M graduate, Veltman was associated with the Philadelphia firm of Wallace, McHarg, Roberts and Todd.

## Remember these ads?

We ran them in a lot of college newspapers last year. Their purpose was to answer some of the critical questions students were asking about our company.

Maybe you saw them. A lot of students did. And a lot wrote to us about them. In many cases the ads triggered additional questions, questions so provocative that we've decided to expand our communications with college students.

We're doing it in several ways. We've already started to have conferences of student opinion leaders and GE people at our various

plant locations. These conferences permit deep probing of sticky questions. They help us to understand the concerns of students. But they involve relatively few students and GE people.

So we're going to share some of the questions and answers (like the ones above) with you by continuing our ads in college newspapers.

And we'll make sure our people see your questions, too—through company magazines and plant newspapers.

We think your concerns are important. And we think you should know how seriously we take them.

GENERAL ELECTRIC

# Thanks Old Army...

for a great year. We appreciate your business, and we want you to know it. We sincerely hope that our dealings have been as pleasant for you as they've been for us. And for the men that are leaving, come on in and let us buy your books one more time. We'll pay the best price - as always - and shake your hand one more time.
