Vol. 67 No. 143

College Station, Texas Wednesday, September 6, 1972

There's One Thing
To Be Said For
Trouble; It
Always Accepts.

THURSDAY—Partly cloudy to cloudy. Afternoon thundershowers. Wind southerly 10 to 15 m.p.h. High 91, low 73.
FRIDAY—Mostly cloudy. Afternoon thundershowers. Wind southerly 10 to 15 m.p.h. Becoming northerly in late evening. 10 to 15 m.p.h. High 87, low 73.

845-2226

Betty Named Honor Grad As Corps Sweeps Awards

Gerald R. Betty, senior on the 1972-73 Corps staff at A&M, was named the Distinguished Honor Graduate of a Ranger School class that completed training Thursday at Fort Benning, Ga.

His ranking gave TAMU Army and Air Force ROTC cadets a clean sweep of top awards during 1972 summer field training.

Betty also won the camp commanders leadership award to go with the Distinguished Honor Graduate citation.

Honor graduates of the rugged Ranger Training, in effect winning second and third places, were Scott L. Tarkenton of San Antonio and Richard B. Hall of Bellaire. Edward P. Rumold of Phillipsburg, N. J., was Distinguished Honor Graduate of an earlier Ranger school.

Ranger school involving mountain and jungle training phases was taken in lieu of regular field training at Fort Riley, Kan., where Texas A&M also had the No. 1 cadet in both summer cycles. Other TAMU Army cadets took airborne and jumpmaster training.

An A&M cadet finished at the top in enriched field training for Air Force ROTC cadets at Eglin AFB, Fla.

Betty is adjutant on the Corps staff. An agricultural economics major, he is the son of Mr. and Mrs. Earl T. Betty, Rt. 2, Box 133, Springtown. Betty's brother Randall was corps adjutant last year.

Tarkenton is 1st Battalion executive officer in the corps, a marketing major and son of Mr. and Mrs. James C. Tarkenton Jr., 3211 Bent Bow, San Antonio.

Platoon leader in Company G-1, Hall majors in education and is the son of Mr. and Mrs. N. D. Hall, 4901 Imperial, Bellaire.

All three seniors are members of the Ross Volunteers. There were also top A&M cadets in every other camp phase in which A&M participated this year. The top-ranked cadets were selected on the basis of military criteria and included class standing, military proficiency and leadership.

The Class of 1973 leaders are Robert J. Miller, Army ROTC cadet of Brecksville, Ohio; Robert

L. Jones, Air Force ROTC cadet of Las Cruces, N.M.; Rumold; Leslie C. Lyons, Honolulu, Hawaii, and Betty, Army cadet.

Lyons was the No. 1 cadet of both 5th Army camp cycles at Fort Riley, Kan. Miller was the best cadet of his cycle. Jones was the top-ranked AFROTC cadet at the Eglin AFB, Fla., enriched camp for cadets from military-rated institutions.

Coy R. Morris, Army cadet of Waco, was Army Commander Leadership award recipient for the highest leadership potential score in his camp cycle.

Cast Named For Comedy

The cast of "Forty Carats," Aggie Players fall semester production, has been announced with Mary Hana in the role of the 40-year-old divorcee.

A two-act comedy that recently completed a Broadway run, "Forty Carats" concerns the efforts of Ann Stanley, a 40-year-old woman whose marriage went bad, to make it on her own.

The Aggie Players, directed by C. K. Esten, will stage an adaptation of the play by two Frenchmen. It will open Oct. 6 for a six-night run.

Accompanying Miss Hanna on the cast, Esten announced, are John Steele as Peter Latham, an intelligent young man seeking Mrs. Stanley's attentions, and Jan Holmes as Mrs. Margolis, Ann's secretary.

Also Jan Colp as Trina, an impetuous young lady of the new generation; Pat Lockstedt, Maud, a match-making grandmother; Nanette Zeig, perennial dissatisfied client, Mrs. Adams; Linda Pettett, Mrs. Latham, pseudo-sophisticate; Dan Powell, her husband, a power and money seeker who goes his own way and let's Mrs. Latham go hers and Rusty McInturff, as Eddy Edwards.

Saturday Prediction: Cool

The first fall weather system will dominate weekend conditions for Texas A&M's 1972 football opener with Wichita State University at Wichita, Kan.

Developing now in Southern Canada and Montana, the system will trigger brief thundershowers here Friday afternoon, drop Saturday morning temperatures into the low 60's and provide virtually ideal conditions for the game, according to Jim Lightfoot.

The TAMU Meteorology Department meteorologist predicted persons traveling to Wichita for the game will have optimum conditions outside of the Friday afternoon showers marking the first frontal passage here since July 4.

"The system will be in North Dakota Wednesday and then move southeastward into the Great Lakes area," said Light-

foot, whose five-day forecasts are available to TAMU faculty-staff.

"A front trailing off the system will move into our area Friday at about 2 or 3 p.m., accompanied by a line of thundershowers. These should be of short duration," he stressed. "The front should ram on into the gulf, become stationary and then move back inland."

Wichita weather Saturday will have a morning 47-degree low and 68 high with partly cloudy skies all day, the department weather station manager forecast. Clouds are expected to dissipate at sunset.

At the 7:30 p.m. kickoff, the temperature should be 62, dropping into the 50's before the game ends. The return trip will encounter partly cloudy skies and widely scattered thundershowers and rainshowers, Lightfoot said.

Noon Physical Fitness Program Resumes Monday

A&M faculty, staff and students resume the noon physical fitness program Monday.

Former and new participants will meet at 12 noon in Kyle Field with Dr. John M. Chevrette of the Health and Physical Education Department. The inclement weather site will be White Coliseum.

For persons interested in better health through individually-structured activities, the program has been a popular department activity for several years.

Chevrette said families of faculty-staff members and graduate students, particularly wives, find the program beneficial. Many participants are in the noon

program, but others run in the early morning and individuals such as Dr. Johannes van Overbeek, biology head, swim at Wofford Cain Pool.

The program consists basically of a preliminary assessment of condition at the department's Human Performance Laboratory and exercises such as running, jogging, or walking with a noon group.

Chevrette stressed that the exercise is arranged to suit individual condition.

"Beyond that, the program is not structured," the health and physical education professor commented. "Individuals can go as far as he or she wants to go.

We provide leadership and guidance."

New participants may make advance appointment at the lab for condition assessment between 12 noon and 1 p.m. weekdays, by phoning Miss Jackie Lambert or Dr. George Jessup at 845-5924.

Persons who cannot make the noon sessions may wish to contact Dr. Roger Feldman (845-2651) about joining a group that runs in the early morning. It starts at 6:30 a.m. and concludes in time for members to get to work at 8 a.m.

"Many faculty members use Wofford Cain Pool for noon exercising," Chevrette said. A fee schedule for such use is available at the Health and Physical Education Department, 845-6841.

Specific information about the fitness program can be obtained from Chevrette at the same number.

Jews Collect For Murdered Israeli Athletes

The Jewish Community of Bryan-College Station is accepting donations for the families of the 11 murdered Israeli athletes who were killed Tuesday at the Olympic Games in Munich.

Donations can be mailed or brought to 800 Jersey St. for the Israeli Martyr's Fund or brought by Room 127 of the Chemistry Building.

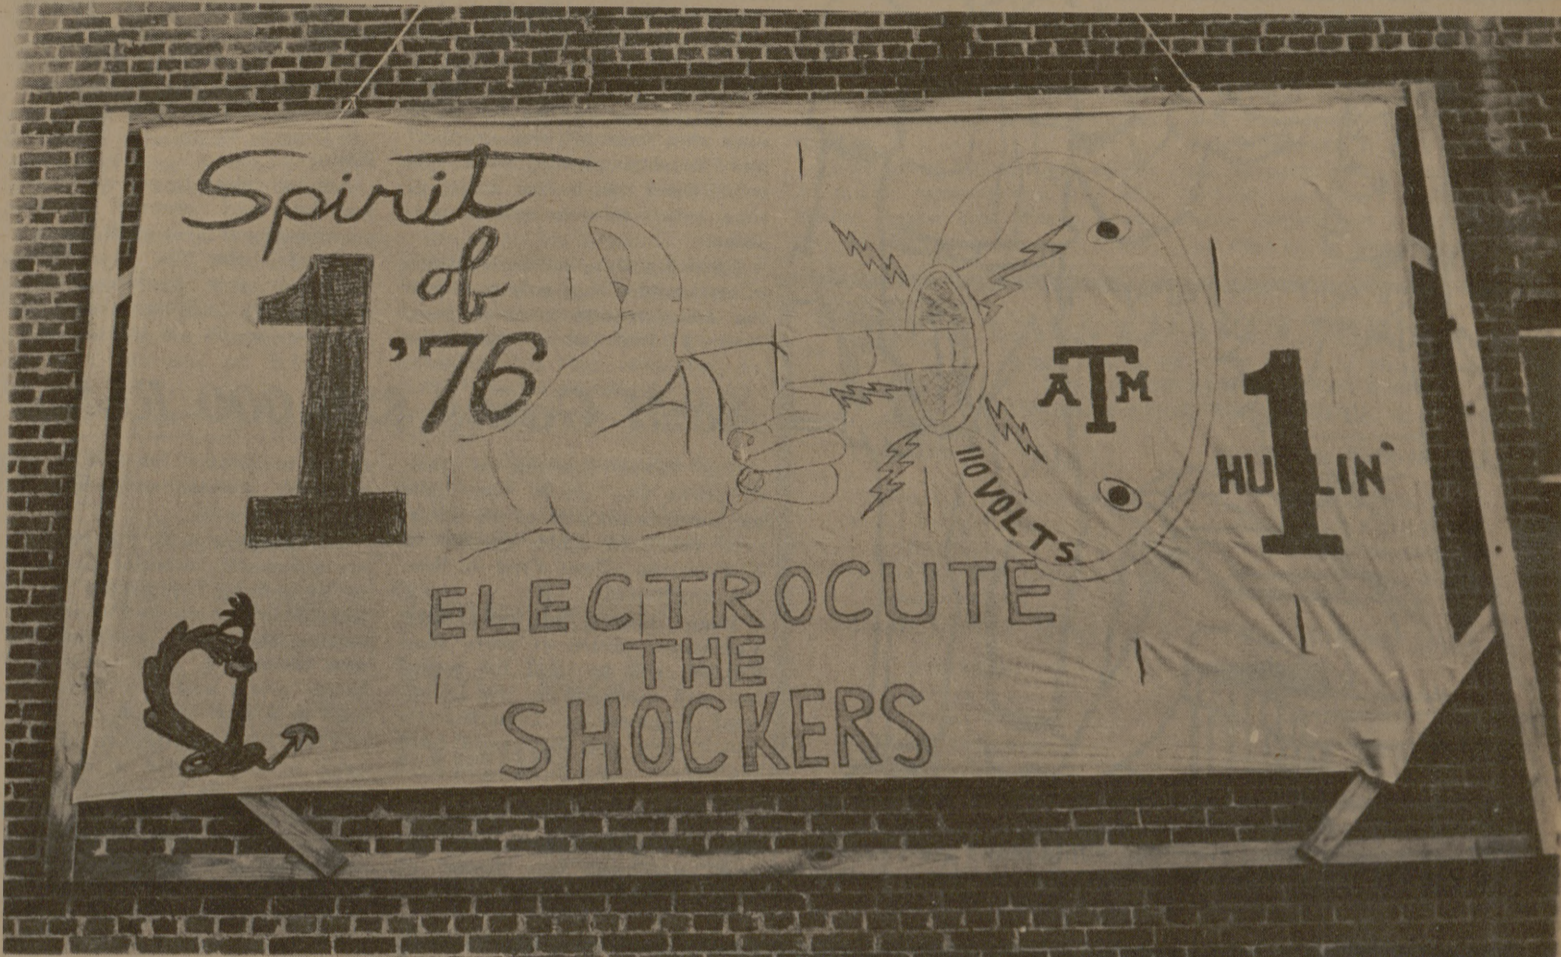

Physics Colloquium

Dr. R. E. Allen will describe "Surface Physics at TAMU" at the A&M physics colloquium Thursday.

The program begins at 4 p.m. in Physics Room 146.

Dr. Allen, assistant professor of physics, will describe research conducted by V. E. Kenner, W. M. Saslow and himself.

JOINING IN the 'spirit' of things this week were several corps units as exemplified by Squad 1's spirit sign for the Wichita State-A&M game this Saturday in Wichita.

This is one of several being displayed by dorms across the campus. (Photo by Gary Baldasari)

Speakers Of The Month

Jim McKay, William F. Buckley On GI Agenda For Year

Current topics will be discussed by well known speakers in a Speaker of the Month Series, as a result of a change in the Great Issues programming this year, said T. C. Kone, chairman of the Great Issues Committee.

Host of ABC's Television show, "The Wide World of Sports," Jim McKay, will arrive at A&M on September 28, a week after his return from the summer Olympics in Munich. He has previously done extensive work at the 1968 summer and 1968-72 winter Olympic games. McKay has won two Emmys for his work, a television first for a sports commentator.

"The 1972 Elections: A Correspondent's Report," will be the

topic discussed by Irving R. Levine, NBC News Washington Correspondent, on October 24. Levine will evaluate the issues, campaigns and men of the 1972 elections.

Anthropologist/author Robert Audrey will speak November 13. Audrey is the author of *African Genesis, Territorial Imperative, and Social Contract* and has also added several new dimensions about man's behavior and origins to the scientific world.

The Occult, witchcraft, ESP, ghosts and other facets of the supernatural will be part of a talk to be given by Daniel Cohen. The editor of *Science Digest*, Cohen will speak December 6 on his experiences and knowledge of the unusual and unexplained.

January 24 brings William F. Buckley to the campus. Founder of the National Review and a member of the Advisory Commission of the U.S.I.A., Buckley will speak on Current Trends in the U.S.

The GI Committee will have a 25¢ admission fee for students with activity cards and a \$1 fee

for anyone else on the Speaker of the Month Programs. The Buckley program will cost 50¢ and \$1.50.

Plans are in progress to have

supplementary programs open to all students and public free of charge. The GI office will welcome any ideas on topics or speakers.

'Pap' Test And Birth Control Pill Policies Reviewed By Powe

Dr. W. H. Powe Jr., newly appointed director of A&M University Health Services, reviewed university policy Tuesday concerning 'Pap' tests and contraceptive issuance.

With regards to performing 'Pap' test smears, Powe said, "We have the facilities to perform the lab test, if in the doctor's judgment there is a need for it other than for the purpose of initiating birth control."

"We do not deal with this aspect of health care for the same reason we don't handle dental work," said Powe. "Lack of adequate funds to employ a full time gynecologist to perform the service is a major reason."

"Our job is to take care of sick and injured students and to pro-

vide the best medical staff and treatment possible," asserted Powe. "We have to time to perform routine examinations."

Powe. "We have no time to percents could qualify for treatment by the Family Planning Center, which does perform 'Pap' smears and prescribe birth control pills.

Birth control pills do not come under the heading of necessary medicine and are not issued by the clinic, although they can re-issue a prescription for the pills.

He listed as two problems the increased workload on the present staff and social and political reasons as the probable basis of the present policy.

Powe contends that breaking with tradition in a conservative state would bring about possible repercussions.

"I think it would be more appropriate to have chest X-rays on a larger scale because of the higher probability of problems in that area," Powe said.

Powe concluded that he foresees no change in the administration's policy toward issuing contraceptives but plans to discuss the issue with the board of directors for clarification.

Free University Night Tonight

Free University Night is slated to be held at 7 p.m. tonight in the Memorial Student Center Ballroom.

The Free University is a new concept in education whereby none of the traditional limitations of grades, credits and requirements are enforced. The only requirement is that a group of people be willing to learn.

Five courses have been added to the list of those being offered. Fencing, folk music, gourmet cooking, photography and 'The Law and You' are the recent additions.

Free University is a small do-it-yourself program, brought into being by professors and students. It does not involve the traditional university limitations such as credit hours, course requirements and grade points.

The Free University is sponsored by the Student Government and the MSC Council and a total of 13 courses will be offered. The Reading Improvement course had to be dropped from the list.

Students may register at the booths which will be located in the MSC, Academic Building, Engineering Center and the Library until the end of the week.

Additional information may be obtained at Free University Night or by calling the Student Government office at 845-1515.

Mixer In The Grove Friday

The Civilian Student Council, along with the Student 'Y' Association and the Corps of Cadets, will sponsor two mixers this weekend in an effort to acquaint campus men and women.

Civilian Student Council President Mark Blakemore said "Six Easy Pieces," a rock band from Beaumont, will play for the Friday and Saturday night affairs.

The Friday night mixer will be from 8 p.m. until midnight in the Grove. Saturday night is a chance to support the Fighting Aggie Football Team in their devastating victory over Wichita State. The game will be broadcast at 7:15 p.m. over the P.A. system onto the Main Drill Field. There will be free refreshments and a yell practice during halftime. Both mixers are open to all students free of cost.

According to Blakemore, the Corps came up with the idea at the same time as the CSC. As a result the CSC is sponsoring the band; the Corps is in charge of the arrangements and the manpower; and the Student 'Y' is handling the publicity.

"If the mixers go over well, we may try to have them again next weekend when the Aggies play Nebraska," said Blakemore.

New Apparel Industry Is Taking Survey For Student Employment

The Industrial Division of the Bryan-College Station Chamber of Commerce is distributing an employment survey for a large apparel industry in the Bryan-College Station area.

Persons 18 years of age and older interested in potential employment should complete the survey form appearing in local newspapers this week and return it in person to the Chamber at 401 S. Washington, Bryan, between 8 a.m. and 8 p.m. Saturday, September 9.

The firm, a major national manufacturer of men's trousers, is considering locating a plant in the area employing 500 seamstresses.

"This industrial prospect is aware of the living, educational and cultural benefits of locating in our cities, as well as other economic factors," explained Pat N. Mann, Chamber Executive Director.

The company must be convinced that an adequate labor supply exists, so it is important to get a good response.

Further developments toward location of the plant hinge on the outcome of the survey. The company is not presently committed.

Mann emphasized the company's desire that individuals return the completed form in person to the Chamber of Commerce.

WORKERS PLACED temporary benches at all of the on-campus shuttle bus stops this week, much to the relief of those having to wait in the heat. New benches are on the way, as these were taken from the grove. (Photo by Mike Rice)
