VIPs Disappear In Alaska

JUNEAU, Alaska (AP)—The Air Force launched a search for an overdue small plane carrying House Majority Leader Hale Boggs of Louisiana and U.S. Rep. Nick Begich Monday.

"We assume that the airplane is down," a Federal Aviation Administration spokesman said.

The twin-engine plane, carrying four persons, was due to land at Juneau at 5:30 p.m. EDT on a nonstop flight from Anchorage, where Boggs had been campaigning for Begich.

The plane would have run out of fuel at 8 p.m., the FAA spokesman said.

There was no radio contact with the plane after the pilot filed a flight plan 12 minutes after take-off from Anchorage, he added.

The flight plan called for visual flight rules and followed the rugged Alaska coast, lined with mountains 5,000 to 7,000 feet high.

"There could be many circumstances, like a malfunctioning radio or being out of radio range, that could cause us to lose con-

tact, but the plane has passed its fuel exhaustion time and we assume that the airplane is down," the FAA spokesman said.

A search of airfields where the plane might have landed turned up no sign of the aircraft.

In Anchorage, a spokesman for the National Transportation Safety Board said, "Some have suggested because it was a campaign

trip they may have stopped along the way but we have no reason to believe that and really don't." The FAA spokesman said the plane, a Cessna 310, carried crash-location equipment but no signal had been received.

The other persons aboard the plane were Russell Brown, an administrative assistant to Begich, and the pilot, Don E. Jonz.

Death Penalty Bill Killed By Constitutional Ruling

AUSTIN, Tex. (AP)—A rule in the Texas Constitution killed a bill reinstating the death penalty in certain murder cases Monday night.

Senators tentatively approved such a bill Monday, but the constitutional point raised in the House Criminal Jurisprudence Committee will block final action on the measure.

Texas' Constitution says no bill can be considered that was not approved by a legislative committee at least three days before the close of a session. The current special session must adjourn by midnight Tuesday, and the measure considered by the Senate was not acted on in committee until Monday morning.

Rep. Tom Moore of Waco raised the point in the House committee,

and chairman Frank Calhoun of Abilene upheld it.

The measure, as it advanced in the Senate, would have permitted the death penalty in cases of murder for hire; murder of prison guards; intentional homicide during a kidnapping, burglary, robbery, arson or rape; murder of policemen or firemen; murder with "extreme atrocity or cruelty;" and slaying committed during prison escapes.

The Senate eliminated murder with "deliberate premeditation" and second offense murder as crimes for which death could be imposed.

The U.S. Supreme Court recently struck down the Texas death penalty as currently applied, with several justices commenting on the penalty's random application.

Correction

The "Battalion" erroneously reported that Student Senator Steve Wakefield voted against joining the National Student Lobby. He voted for the resolution.

Campus Briefs

Academic Calendar Adopted By Council

The 1973-74 academic year calendar for A&M has been approved by the Academic Council.

Fall semester classes open Sept. 3 preceded by a week of delayed registration Aug. 27-31. Semester graduation will be Dec. 15 with examinations ending Dec. 21.

Spring semester classes will start Jan. 14, 1974. A mid-semester recess is set March 8-18. Classes conclude May 3 with commencement and final review the next day. Spring exams end May 11.

Summer sessions will begin June 4 and July 12.

Saito Gives Graduate Lecture On Compounds

Dr. Nobufusa Saito of the University of Tokyo will give a graduate lecture in "Radiochemical studies of Inorganic Compounds" Oct. 20 at A&M.

The public program is sponsored by the Activation Analysis Research Laboratory in cooperation with the Chemistry Department. Dr. Saito's lecture will begin at 3 p.m. in Chemistry Room 231.

He is considered one of the

world's leading radiochemical researchers. His interests are in chemical analysis, hot-atom chemistry, isotope separation, and geochemistry and applications of Mossbauer spectroscopy in organic and analytical chemistry.

Dr. Warner Presents Agriculture Seminar

Dr. R. G. Warner, animal science professor and assistant director of the agricultural experiment station at Cornell University, will present a graduate-level seminar Oct. 18 at A&M.

The presentation, "Some aspects of Voluntary Feed Control in Ruminants," will be at 4 p.m. in Lecture Room 1 of Zachry Engineering Center.

A&M To Hold Formal Summer Commencement

A&M will conduct formal commencement exercises for students receiving degrees during sessions, President Jack Williams announced Thursday.

The Academic Council set Oct. 17 as the date for the 1973 summer ceremonies. The Friday corresponds with the last of final examinations for the second session of summer classes.

Bread

(Continued from page 1)

Paul Simon, The Byrds, John Phillips and others before becoming a full-time member of Bread.

He arrived in August, 1971, replacing Robb Royer, who left music to concentrate on writing motion picture and television screenplays.

The group's success after two years is not confined to records. They regularly pack houses in concert presentations as well as make television guest appearances.

Tickets for the Town Hall Special Attraction can be purchased at the Student Program Office in the Memorial Student Center. General admission prices for A&M students and dates are \$2.00 each. Reserved seat tickets for A&M students and dates are priced at \$3.50 and \$4.00. General admission ticket prices for other students and patrons are \$2.50 and \$3.

When this 25-year-old researcher wanted to investigate a possible cancer treatment, we gave him the go-ahead.

We also gave him the right to fail.

At Kodak, it's not unusual for a 25-year-old like Jim Carroll to win the title of senior research physicist. Like any company involved in a lot of basic research, Kodak has felt the pressure of modern technology and the need for young, fresh thinking. So we hire the best talent we possibly can, and then give them as much responsibility as they can handle. Whatever their age.

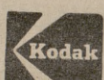

We have departments and divisions, like any company. What we don't have are preconceived ideas about how an expert scientist's time should be spent. So when we received a request from the medical community for assistance in experimenting with lasers as a possible cancer treatment, we turned to 25-year-old Jim Carroll, who is deep in laser tech-

nology, and gave him the go-ahead. He built two half-billion watt laser systems, one of which Kodak has donated to the National Institute of Health.

The lasers proved unsuccessful in treating cancer, but we'd make the same decision all over again. We entered laser technology because we have a stake in business. We let a young researcher help the medical community look for a means of cancer treatment because we have a stake in the future of mankind.

To put it another way, we're in business to make a profit. But in furthering our own needs, we have often furthered society's. After all, our business depends on our society. So we care what happens to it.

Kodak
More than a business.

FRESHMEN

Aggieland Picture Schedule

Deadline for Make-Ups for the Aggieland Has Been Extended Through October 20

Pictures will be taken from 8 a. m. to 5 p. m.

At

UNIVERSITY STUDIO

115 N. Main North Gate 846-8019
