

**IT'S GETTING RIDICULOUS** DOWN HERE -YOU WON'T BELIEVE THE BARGAINS!

-Janet Landers Miss - Information

Christmas holidays, like the snow, have melted away all too fast into our memory and thoughts turn back to school. Making 8 a.m. classes is not easy after sleeping late over the holidays. Turning back to the books is something less than easy, especially in the spring. But clubs and organizations are setting up meetings and making plans for activities and projects for this semester......OPA had its first meeting Monday night. An activity continued from the fall is selling candy to support the national project. There are two types of chocolate bars, almond and crunch, that may be purchased from any OPA member for 50 cents.....Auditions for the New Tradition Singers will begin today and continue through Wednesday, Jan. 24. They are held from 2-4 p.m. in Room 119 of G. Rollie White. Rehearsal will begin Monday, Jan. 22 at 7:30 p.m. in Room 119. Plans are being made for concerts and participation in other activities......Alpha Lambda will have a meeting tonight at 7 p.m. in the Library conference room on the second floor.....According to Sue Edwards, vice-president of Krueger, there are several new faces around the dorm. "Some of the girls are transfer students while others are incoming freshmen who have been waiting to get into the new complex." Residents of Krueger, new or old, will have several activities to look forward to this semester. Voting on the dorm constitution will be upcoming as well as Dorm Council meetings. The first Dorm Council meeting will be at 9 p.m. Wednesday, Jan. 22. Activities are in the planning stages now, but look for picnics, baseball games, and maybe even grass, on the grounds that is ...... Sports clubs will be forming. Information on joining them will be forthcoming... This spring has all the earmarks of a good one, especially for the class of 73 because it will be the last.

# **Elegant Fashion Returns** In Menswear Collection

The elegant international man with conservative tastes is back in vogue for 1973 if recent fashion previews are an indication. British designer Hardy Amies previewed his International Menswear Trend Collection for the Fall of 1973.

There are no way-out presen-tations in the new Amies line.

## **Dust And Polish Indoor Foliage**

Keeping indoor foliage plants clean and attractive requires a little extra effort, says Everett Janne, landscape horticulturist for the Texas Agricultural Extension Service.

"Leaves may be kept clean by using a soft camel hair brush or damp cloth or sponge once or twice a month to remove dirt which collects. Care must be used when cleaning as bruising and kinking the leaf surface will cause discoloration and blemishes," points out the A&M specialist.

To get a high gloss on some plant foliage, gently brush the surface with a soft cheese cloth or a soft, fine brush. Natural oils and waxes on the leaf surface will usually produce high gloss. If leaves are extremely soiled, wash them with a mild soap and warm water solution before polishing, suggests Janne. Allow them to air dry before polishing.

"Several commercial leaf polishes are available. If such materials are used, water the plants several hours prior to treating. This prevents dry plants from

His collection, aimed mainly at the upper crust of the mass volume market, is restrained and in step with the creations of other international men's designers. This means that next year's fashionable male should expect to find that very dark and sombre colors are in; wide knit ties are in; wide and peaked lapels are in; waistcoats are in; pleats and

wide cuffs are in. The look remains long, lean, and flattering. Suits and sportswear of charcoal browns and deep dark greens will give prominence to brighter accessory colors and emphasize the importance of cut and styling.

Jackets will remain long, close fitting, shaped at the waist, and slightly shaped at the shoulder with two-button fastening. Many will have center vents or no vents at all. Lapels will remain very wide, featuring different reverse and top collar treatments. The wide lapels are balanced by wide trousers.

The trouser look is very important. They'll be pleated, fit snugly over the hips and taper out to feature deep cuffs that are generally 25 inches wide and 2 inches deep. Legs will be longer, breaking slightly at the front of the shoe.

Suits wll be complemented with 4 to 5-button waist coats, some of which will be sewn-off at the waist. The vests will generally show more shirt and more tie than their classic predecessors.

Amies emphasizes that acces sories must complement the total look since balance is the basis for styling. Shirts will continue with the elongated collar points || comparison.

THE BATTAL

### **Food Costs Lower With Edible Container** packing costs and

"If predictions of some food scientists are correct, consumers tritious substance to the product. "Water soluble films are alpay for," according to a foods and nutrition specialist.

Karen Kreipke with the Texas Agricultural Extension Service, noted this week that edible containers such as ice cream cones, pie crusts and gelatin capsules may have encouraged food scientists to look for more.

Citing recent developments, she explained that "coatings which act as a release agent in the frying pan, such as Myvacet, have been used on fresh poultry before freezing to reduce moisture losses by 85 per cent.

Bryan

"Some coatings also add a nuready available for packaging instant tea, dehydrated soup and powered drinks.

"Can you imagine dropping an envelope of soup into boiling water and stirring a minutewhile the soup powder, as well as the envelope, dissolve?" she grinned.

Turning to some possible stumbling blocks, Miss Kreipke listed sanitation and strength as problems

"Edible containers must be

to the consumer. "These edible contain must be strong enough stand touching and hand well as strong enough the product.

"So far, no coating h found suitable for all pr she reported.

"Except for beeswax a rind, there are very few en in nature to exploit indu

absorbing the material so rapidly, causing foliage burn. Do not use oil of any kind," cautions the horticulturist.

Plants with pubescent or hairy leaves are more difficult to clean. Occasional syringing of such plants with clean, warm water is beneficial. Do not use water colder than room temperature as it can cause leaf spotting in certain plants. Occasional syringing will also help keep plants free from red spider mites and mealy bugs, adds Janne.

brushup to a thorough review.

to balance the wide lapels. The collar spread will be slightly wider to accommodate wider ties. A most important accessory to

the new look is the high-heeled shoe. Amies believes that a heel 2 to 21/2 inches high is most comfortable for walking and balancing the wide-cuffed trousers.

As for casual clothes, Hardy Amies says his approach is uncontrived and "very functionalpockets to put hands in, gloves in. Collars that button up, zip up, and stay up.
