Reference is made to the headline of the Thursday, Feb. 22 edition of The Battalion, entitled, "Two Former A&M Students Nabbed for Major Theft." It seems to me that such a headline gives us some adverse credit which frankly I feel is undeserved, particularly for the front page. Succeeding pages contain many favorable statements concerning Aggieland while front page status has been given to a couple of misfits that are more importantly students of another institution rather than A&M.

Would it not have been more appropriate to have titled this article "Two Richland JC Students Nabbed for Major Theft from Texas A&M"? In the article it could have been mentioned that at one time the two individuals did attend Texas A&M University.

I take great pride in being an Aggie even though I am a halfbreed (B.S. from Texas Tech), and I am proud of Texas A&M, its spirit, its service to mankind through its goals and objectives, and the continuing contributions of the former students to society around the world. Let's be positive — take our licks when we deserved to the deserving.

N. J. Rowan Though The Battalion may be considered by some as strictly a public relations organization for the University, we at the Batt believe otherwise. We try not to create the news, that is the function of the students and faculty and up until now these two have done a good job of it.

Also we question your rationalization in the analysis that "Two former A&M students" (second par., first line of the story) cannot be considered "two individuals who did at one time attend Texas A&M."-Ed.

\* \* \*

I have not been able to figure provoke me into writing an unout the problem the laundry has in maintaining the proper service needed to insure contentment among their patrons at A&M. It appears that writing a letter about the inefficiency of the laundry to The Battalion will soon be added to the long list of A&M traditions.

Almost every semester someone writes a letter on how they have been screwed by the laundry and almost every semester noth-

Aggie Players Review —

## 'Caligula' Ca Captures

By VICKIE ASHWILL When the curtains rose with

the opening performance of "Caligula" Monday night it looked as though the Aggie Players were about to rehash the traditional "Julius Caesar."

But the players, in one of their best performances, proved tradition entirely incorrect. Set in a Roman atmosphere, the play by Albert Camus took a slightly different approach to the Shakespearean type plot.

Richard Taylor, as Caligula, the audience into the grasp of the performance. His ability to act the part of the power-mad remarks with the ability of a pro. ruler, lonely without killing people and eccentric from all aspects, captured the audience's attention whenever he was on the his performance.

Taylor was able to change his moods from angry to passive to completely insane within the that took a while to become actime span of a few seconds. Taylor did an excellent performance cold, she generally warmed up

in the part of Caligula, the man whose goal in life was "concerned with making possible that which is not possible."

Walt Meissner in his role as Scipio did a heartwarming performance as the emotional young poet. The freshman geology major is in his first appearance with the Aggie Players and added the warm, emotional aspect needed in the play.

The patrician Cherea, played by Audie Beeson, was the intel-Richard Taylor, as Caligula, lectual in the play and led the was the main factor in pulling plot to destroy Caligula. The senior Aggie band member was able to whip out his sarcastic

Beeson's anger and hatred for Caligula seemed natural and gave the idea he was really a part of

Caesonia, the only speaking woman in the play, was played by Yvonne Schmitz with a style customed. At first distant and

**Audience** with her performance.

Even though Caesonia was the basic-snob type individu,al Schmitz did not act as if she could fill her hole until the second act when she came out with a flair for being hateful and

Helicon, loyal patrician, was played by Charles Tyler in his first performance with the Aggie Players. Devoted as he was supposed to be to Caligula, Tyler's acting style took some getting used to before he was convincing in his part.

At times Tyler seemed to be very much a part of the performance, yet at other times, he seemed to act as if he were a robot in his role.

All in all, the play was good with a captivating performance by the Aggie Players. "Caligula" will continue every night this week through Saturday at 8 p.m. in the A&M Consolidated Middle School auditorium.

Admission is one dollar.

In the Wednesday, Feb. 21 issue of The Battalion, there was an article concerning the health care of the female students here at A&M. In this article, Dean of Women Toby Schreiber is quoted as saying that A&M girls do not get pregnant. Being an A&M girl myself, I would like to know the basis for this statement.

Do A&M female students not become pregnant because a) they do not know how, b) are they somehow exempt, by virtue of being A&M students, c) or have they already been to a gynecologist elsewhere? Surely, at A&M, it is not from lack of opportun-

No matter what the answer to this question is, it is still no reason for not having a gynecologist here on campus. I feel that the dean of women is side-stepping the issue of improved women's health care.

Helen Mehan

Dean Schreiber denies having made the remark as Gillian Parker stated it at the Wednesday meeting of the Women's Awareness group and at the same time acknowledges sex at A&M, whether in its pure or refined form.-Ed.

# on ESP and mind control

## FOR EVERYONE INTERESTED IN DEVELOPING GREATER MENTAL POWER

**FANTASTIC RESULTS** 

Several years ago, Motivation Research Center began experiment-ing with various mind control methods, including Yoga, Zen, Autoconditioning, Hypnosis, Auto-genics and Meditation. Motivation Research Center was intrigued with the fantastic results some people seemed to obtain using some of these methods. What strange powers of mind were involved? Could such powers be harnessed for the good of all? If so, could the best of these methods be combined, simplified and refined for the use of the average man or woman?

MRC realized that if man hoped to harness even a fraction of the full potential of his mind/brain complex, a new, easy to learn method of mind control would have to be developed... A system that could have far-reaching implications for

MODIFIED BRAIN WAVES

By 1969, with only a few hours of classroom training, individuals began to develop incredible "mental tools." Testing revealed that the training also seemed to influence an

individual's brain wave patterns.

Although there are four basic brain wave patterns, Alpha, Beta, Delta and Theta, it was observed that these training techniques specifically enhanced a person's Alpha brain wave activity and, in fact, most students could actually influ-

most students could actually influence these brain waves at will.

MRC found that students could use the 8 to 12 cycle per second Alpha brain wave as a parameter for a "special" state of consciousness. The term "Alpha level" of mind and the excess was a warn. evolved, and the system was even-tually named ALPHA DYNAMICSI Alpha brain wave enhancement now sets this unique system of mental exercises apart from other tech

As research continued, another startling discovery was made. Many students were beginning to use ESP in their daily lives. Executives were increasing corporate profits, students were improving grades, wives and mothers were sensing and solving problems with extra sensory

At about the same time that the Ar about the same time that the American Association for the Advancement of Science (AAAS) was acknowledging ESP as a human capability, worthy of the serious attention of scientific research, MRC had begun to develop and refine methods that now enable 90-95% of the population to develop and use controlled ESP routinely.

MIND CONTROLS BODY

genic methods, many students learned to control their heartbeat, blood pressure, skin temperature and gal-vanic skin response. In fact, a signif-icant part of the so-called autonomic nervous system could be con
