GIANT MOLES HAVE TAKEN OVER A&M— Not really, but with mounds and mounds of dirt scattered about due to the intense campus construction, they may as well. This picture was taken near the new \$20 million MSC complex center. (Photo by Peter Leabo)

Alice School Head Presented Award

Alice Schools Superintendent Dewey Smith has been presented the first Community Education Leadership award at A&M.

Made at the School Administrators and Supervisors Conference, the award cites Smith's leadership in setting up the Alice Community Education Program and spreading information about its success. It had more than 2,500 participants in the last school year.

Dr. J. W. Edgar, Texas commissioner of education, presented Smith the award.

The award will be an annual one. Dr. Robert Berridge, director of the TAMU Center for Community Education, said Smith was the hands-down choice for the inaugural presentation.

Smith told Edgar and conference participants the plaque was earned by Alice citizens and will be located for their benefit.

The Alice ISD, under Smith's guidance, was the first to initiate community education in Texas.

He met with Dr. Tom Pope, Region II Education Service Center director, and Berridge initially to get information about the community involvement project. It was shared with the Alice district's Administrators Council and received unanimous approval.

The Alice program accelerated after Smith asked a group of cit-

izens to form an advisory board.

A fulltime coordinator was employed, groups, agencies and organizations were informed and publicity received. At a town meeting, community residents donated \$6,000 to help support the project. A door-to-door survey was conducted by lay people to assess Alice citizens' wants and needs.

Berridge also credited Smith with leadership in sharing Alice's story with other educators.

MSC Needs Local Bands

Local bands are being sought for Memorial Student Center summer dances.

"Any group that is interested should contact us at the Student Program office," noted Shirley Ashorn. The MSC office phone is 845-1515.

The MSC summer directorate plans three more dances, possibly more.

"We've had good turnouts for earlier dances," she added. "A group would get good exposure."

Zachry Engineering Center Used In Temperature Study

A portion of the Zachry Engineering Building has been used in a research project funded by Silbrico, Inc., a Hodgkins, Ill., insulation firm.

Dr. William B. Ledbetter, professor of civil engineering at TAMU, has been monitoring temperature sensors in the roof of the structure to evaluate the effectiveness of the insulation materials manufactured by Silbrico.

Monitoring of temperatures was accomplished by measuring resistance to sensors placed in three locations in the roof. The project has been operated continuously since the large structure opened early last year.

Inside temperatures in the building have been maintained at a constant level between 70 and 75 degrees while roof temperatures ranged from 20 degrees to more than 140 degrees.

Five resistance thermometers were placed at each location, with two of them being permanently installed during building construction.

"We have found the insulation to perform as the company expected," Dr. Ledbetter said. "They wanted the study made to evaluate their product in this environment, and it seems to be hold-

ing up very well."

A \$500 extension grant was awarded by the company to sup-

port continued monitoring. The original project was funded with a \$5,000 grant from Silbrico.
