

Endowed Scholarship Established Honoring Professor

A \$25,000 endowed scholarship has been established at A&M honoring Prof. E. J. Fermier, head of the Mechanical Engineering Department from 1905-1927. Funds for the President's Endowed Scholarship have been provided by James M. "Cop" Forsyth '12, founder and retired president of Forsyth Engineering Company of Houston.

"Forsyth attended Texas A&M from 1908 to 1922," the Distinguished Alumnus honoree said. "Prof. Fermier was perhaps the most instrumental figure in our education. All four of us owe our success to him, and I want to honor him and help this great institution with this scholarship endowment."

Robert L. Walker, Director of Development at TAMU, coordinated establishment of the endowment. "We are grateful to the Forsyths for this significant gift," he added, "which will have a most salutary effect on our continuing drive for academic excellence at Texas A&M University."

Forsyth was instrumental in forming the first class endowed scholarship in behalf of the class of 1912.

"I worked on the first class scholarship for over a year," he said, "and only had about half the funds raised. Bob Walker helped me raise the remainder of the \$25,000."

Walker directs the President's Endowed Scholarships program. Forsyth has endowed two other such endowments besides the class scholarship and the Fermier endowment.

"The President's Endowed Scholarships are awarded to outstanding students on the basis of high school grades, extra-curricular activities and leadership qualities," Walker explained. "Of more than 800 high school students who apply for them each year, 80-100 scholarships are awarded."

"The scholarship provides \$1,000 each year to President's Scholars. The \$25,000 endowment provides for a perpetual payment to the student during his stay at TAMU, and the scholarship is awarded to another student when the original scholar graduates."

Students choosing to pursue mechanical engineering will be given first consideration for the Fermier scholarship, according to Dr. Clifford M. Simmang, head of the Mechanical Engineering Department at TAMU.

A plaque bearing the likeness of Prof. Fermier and Forsyth's name will hang in the Mechanical Engineering Department commemorating the endowment.

Seminars On Environmental Impact Scheduled

Environmental impact will be the topic of a series of seminars scheduled for presentation by faculty and staff members from A&M.

The seminars, planned in New Braunfels, Lubbock, Baytown, Arlington and Corpus Christi, will be funded jointly by the Texas Department of Community Affairs and fees paid by workshop participants.

Milton Radke, assistant research engineer at the Texas Transportation Institute (TTI), a division of TAMU, is directing the workshop program. He will be joined by personnel from TTI, Management, Geology and Civil Engineering Departments of TAMU.

The workshops, according to Radke, will be set up on a regional basis. Enrollment in each workshop, limited to 25 participants, will be offered to city managers, directors of public works, planners, interested community groups and councils, and representatives from Councils of Government.

"The workshops will offer training in various subjects," Radke said, "including land use and development, environmental

design standards, land resource management, and types of demands currently being placed on land."

Radke explained that considerable time will be spent on developing environmental impact statements with respect to noise, urban sprawl, air, water, erosion,

land use, conservation of flora and fauna, densities, congestions and displacement.

Scheduled dates and locations for the workshops are: July 12-13, New Braunfels; July 26-27, Lubbock; Aug. 9-10, Baytown; Aug. 23-24, Arlington; and Sept. 12-13, Corpus Christi.

Two Traffic Engineering Courses Offered

A&M's Texas Transportation Institute and the Texas Highway Department will cooperate in offering two traffic engineering short courses here.

Scheduled for July 9-14 and August 6-10, the identical courses will be aimed specifically at new THD employees.

Course subjects include policies and laws of the department, intersection design and capacity, safety lighting, speed studies and speed zoning and design features for signs and pavement markings.

Freeway surveillance and control systems, public relations and intersection control and signalization also will be covered in the courses.

Sundays Excepted

Scriptures selected by the American Bible Society

Any bill shall not be returned by the President within ten days (Sundays excepted) . . . the same shall be a law. (Article I, Section 7 of the Constitution)

They were conscientious and astute men—those architects of the Constitution. They wanted to be sure the President could never halt the processes of democratic government by delaying legislation. And the phrase "Sundays excepted" shows that our Founding Fathers also respected Sunday as the day of the Lord. To them, it seemed natural to safeguard their freedom and preserve their faith all in one sentence. The document they produced has weathered two hundred years—their faith almost two thousand. Both their Constitution and their creed—the Christian faith—are just as vibrant and important today. Make Sundays an exception to your daily routine—Go to Church!
