

Texas Residents Claim Numerous UFO Sightings

ASSOCIATED PRESS

Unidentified flying objects, the occurrence of some accompanied by strange phenomena, were sighted at widespread points in Texas again Monday night.

Some observers were airline pilots, and one was an astronomy laboratory instructor.

Residents in the east Dallas suburbs of Mesquite and Balch Springs reported seeing green flashing lights over the community in telephone calls to the police dispatchers.

In the same vicinity, a larger

UFO and a smaller version reportedly bore red and green lights and moved in an easterly direction.

Just 30 miles to the west in Fort Worth, an astronomy instructor and about 15 students looked to the heavens and saw an object they estimated to be moving at about 4,000 miles per hour.

"The object had a neutral, dull-white color with an amber

tinge," said Larry Brown, an astronomy lab instructor who was holding a class at the Texas Christian University observatory.

He and the students estimated its altitude at more than 50,000 feet.

"The object did not look like anything I had ever seen before," Brown said. "It is out of the realm of our understanding of physical or natural phenomena. I have nothing to associate it

with."

At the air traffic control tower at San Antonio's International Airport, radar operator Jim Stephens spotted a bright object about 2:20 a.m.

Stephens said the object appeared to have wings on both sides and a red light on top which finally seemed to flicker out, said Stephens who inspected the object through binoculars.

While it was flying approxi-

mately two miles west of the airport tower, the object was viewed by pilots flying Braniff International and Eastern Airline planes.

Unlike reports from Brownwood, neither airport nor area police agencies reported communications or electrical interference during the sightings in San Antonio. Radio Station KEAN reported transmitter fluctuations when the mysterious

objects glowed in the sky west of town.

A reported crash of a UFO was related by residents of El Paso away Lake south of El Paso. They said the object appeared across the international border in the mountains of Mexico.

Another such object allegedly then moved down to low altitude and hovered near the spot where the first cracked up, they said.

Discrimination Of Males Trial Scheduled

WASHINGTON (AP) — The Supreme Court agreed Tuesday to consider for the first time a sex discrimination case brought by a man. The case involves Florida tax advantages given only to widows.

The court will hear arguments this winter on a challenge by Miami widow Mel Kahn to the state's \$500 real estate tax exemption for widows.

In several decisions last term, the court showed a sensitivity to women's rights and to discrimination based on sex.

Florida Atty. Gen. Robert L. Kahn could justify its aid for widows by demonstrating statistically that women heads of households suffer greater economic ills than their male counterparts.

Kahn's attorney countered that as property owners, widows and widowers should be entitled to the same treatment.

In other action, the court refused to interfere with contempt of court fines assessed against two newsmen who reported on a public hearing in violation of a concededly illegal gag order.

The two newsmen, Larry Dickinson of the Baton Rouge, La., State-Times and Gibbs Adams of the Baton Rouge Morning Advocate, argued that their \$300 fines should be rescinded because the U. S. District Court order against publishing "accounts" of the hearing was so obviously illegal that it could be ignored.

The U. S. Circuit Court in New Orleans agreed that the order by U. S. District Court Judge E. Gordon West was indeed illegal but refused to lift the contempt finding.

West claimed that newspaper accounts of the hearing could prejudice a future state criminal proceeding, but the newsmen's lawyers said such considerations would hold "freedom of the press as we know it . . . hostage to the fertile imagination of Judges."
