

Food stamps offset low student budget

The rise of food prices doesn't need to make groceries such a burden on the budget. With food stamps, for an off-campus student, it's possible to buy \$84 worth of food for \$23 if the income qualifications are met.

Eligibility for food stamps is determined by the number of people in the home and the total income after allowable program deductions have been made, says George M. Heyde, local program supervisor.

Allowable deductions cover expenses including alimony payments, tuition and mandatory fees for education, recurrent medical expenses and mandatory deductions from earned income. Child-

care payments and shelter costs may be deductible under specified conditions.

Cooking facilities are required for eligibility, eliminating dormitory students from receiving the benefits. If the applicants between ages 18 and 65 are unemployed, they may be required to register with the Texas Employment Commission.

An applicant can own one licensed car, a home and lot and household goods. A \$3,000 resource

maximum is set for households of two or more including one person age 60 or over. The resource maximum is \$1,500 for all other households.

The total allowable monthly income after the deductions are made for a household of one person is \$194; for two people it's \$280; for three people it's \$406.

Information about the program is available at the State Department of Public Welfare, Food Stamp Office at 408 W. 28th in Bryan.

Participants prepare for 30th symposium

Exhibitors are setting up and participants arriving as registration for the 30th Annual Instrumentation Symposium at A&M got underway Tuesday.

Hundreds of engineers, managers and salesmen checked in at the Rudder Tower registration desk while in the University Center the 47 exhibitor companies are scrambling to finish their displays.

This TAMU symposium dates back to 1946 and is currently called the "oldest and best of its kind in the U. S." by previous participants.

"The conference has been and is primarily concerned with instrumentation applied by continuous fluid flow process industries such as petroleum refineries, chemical plants, natural gas and cycling plants," said R. C. Anthony, symposium director.

"However, many of the principles and equipment involved are common to nearly all types of present-day industry," he added.

The three days of the business

part of the gathering will kick off at 9 a.m. Wednesday with a keynote address by James H. Binger, chairman of the executive committee, Honeywell, Inc.

Binger will present "Instrumentation, Automation and Inflation." He proposes there are many solutions to the present inflationary economy, one of the basic tools within the control of an individual business is increased productivity. Binger will note the key role of instrumentation in automation as a major force in increasing productivity and using scarce resources more efficiently.

The exhibit display on the second floor of the University Center will be open from 3 to 8:30 p.m. Tuesday, 11:30 to 2:45 p.m. Wednesday, 11:50 to 2:45 p.m. Thursday, and 8 to 9:45 a.m. Friday.

Many of these exhibits have never before been seen or displayed in the Southwest.

The new research dollars helped place the current fiscal year total almost \$2 million above the same cumulative figure last year.

The largest research dollar value for December went to the field of geosciences with a \$247,800 figure while the combined total of \$163,467 going to engineering, Texas Engineering Extension Service and Texas Transportation Institute.

The December total boosted the cumulative figure for fiscal year 1974-75 to over \$24 million since September.

Research dollar value figures totaled \$411,267 for the month of December at A&M, reports Robert Berg, director of the Office of University Research.

The suit, which asks for \$100,000

were made by the officers and the phone company on Barron and his family. Later that night the phone company admitted the mistake and apologized to Barron.

The suit also alleged that threats were made by the officers and the phone company on Barron and his family. Later that night the phone company admitted the mistake and apologized to Barron.

in damages, was filed in Federal District Court Judge Woodrow Seals' court.

Dominik Street

The City Council and Dominik Street residents are still considering alternatives in the controversial rezoning of a tract of land owned by Harry Seaback.

The land is behind the homes of Dominik Street residents who are opposing the building of more apartments in the area.

The arguments are currently hinging on the deposition of a strip of land between the Dominik homes and the proposed apartments.

The rezoning request passed, by the council last fall, calls for the building of a buffer zone of duplexes on the land.

Other alternatives include the purchase of the strip by the Dominik home owners. Seaback has made the offer, but one resident has rejected the proposal to date. The City of College Station is reportedly also considering purchasing the land for use as a park.

RV adds color for exposition

Five members of the Ross Volunteers had practice Friday in keeping their eyes front and center.

They formed a color guard for a convention in Houston held at the Albert Thomas Convention Center.

RV Commander Les Harvey of Houston and four members of the elite honor military unit of the Corps of Cadets participated in opening day ceremonies of the three-day affair.

The three-day consumer exposition runs through Sunday.

The RV contingent was surrounded by persons of the opposite sex. The exposition is conducted by the Wide Wacky Wonderful World of Women Inc.

HEROES

SALE

Dear Friends,

In HEROES' usual effort to accommodate first, all those associated with A&M, we have waited until the commencement of classes, **January 20**, to begin our **After-Christmas Sale**. We are now offering all of our fall and winter merchandise, along with other special groups of clothing at 30%, 40% and 50% off.

So come on by to take advantage of the bargains we have.

Welcome back!
