

DINING NOTICE

The Tower Dining Room will be closed each Saturday effective May 18, 1975, except when major campus events such as football games are scheduled. Special dining events may be booked any evening and each Saturday in the tower by telephoning 845 - 1118 or 845 - 1119, except during major campus events.

State plan shows recreational needs from Millican low With the implementation of the been forced by Congress out of the Odle, Bryan city manager, said the

proposed Millican Dam and Reservoir, College Station residents could have a 1,000-acre recreational facility resting on the shores of a 55,000-acre lake less than 10 miles south of town.

But, with an 11,460-acre reservoir (Lake Somerville) lying 25 miles west of the city, will the increased recreational benefits be justified?

Area recreational needs

The U.S. Army Corps of En-gineers will build the dam, pending further Congressional approval, but is required by law to coordinate its recreational development proposals with state master plans for outdoor recreation.

Texas' plan is prepared by the state Parks and Wildlife Department and has recently been updated, showing recreational needs in urban and rural areas from 1968 to the year 2000.

The proposed Millican Lake would lie in the middle of rural Region 21 of the master plan, an area consisting of Brazos, Grimes, Madison, Robertson, Leon, Burleson and Washington counties.

According to the master plan, the rural portions of seven-county region need no additional acres of water for recreational use through 1980, while only 88 acres of water are needed within urban areas. By the year 2000, only 1,487 acres of recreational water will be required in both rural and urban areas. (Millican's 55,000 acres would more than surpass that need.)

The presence of the 11,460-acre Lake Somerville within the region, no doubt accounts for the abundance of recreational waters. The Corps of Engineers operates six parks totalling 1,935 acres on the lake

(Although Somerville provides recreational water, the master plan says campsites, boat ramps, and "designated freshwater swimming areas" are high priority require-ments in the region by 1980.)

Responsibility The Corps of Engineers is required to find a local entity to provide recreational facilities on their reservoirs. Up until recently the Corps itself would often take the bulk of that responsibility, but has

recreation business. For the Millican Reservoir pro-

ject, the Brazos River Authority (BRA) has committed itself to meet, on a matching grant basis, the minimum recreational requirements outlined in a plan for the dam, which should be prepared early next year. The operation and maintenance of these facilities will also be the river authority's responsibility

The BRA's main interest in Millican Reservoir is not for the future recreational needs of the area. The BRA, a state agency concerned with water development in the Brazos River Basin, sells water from the reservoirs in its jurisdiction to industries, municipalities and for agricultural use. Millican would provide the BRA with another revenue source and the group's general manager, Col. Walter Wells, says that justifies the expense on recreational development.

Wells said the BRA did not want to get involved in recreation, but 'no one else would do it." As has been the case with other lakes in the Brazos River Basin, Wells said he will encourage the Texas Parks and Wildlife Department to pick up the operation and maintenance of lake. parks.

Neither College Station nor Bryan have expressed an interest in setting up city parks adjacent to Mil-

Omega Phi Alpha is one Texas A&M campus organization that • The giant preview issue in July. Provides the experts' goes unbeaten every season. In terms of good works and helping hands, they're at the top of everybody's Top Ten. Heck, they've got a winning streak longer than old man river. Just color them No. 1. Color Texas Football magazine No. 1, too. Because it's the very best. In a state where football always wears the crown, Texas Football is the magazine they all read and then read again. Both the fans AND coaches. "It's a best of breed," judged Jim Trinkle, the Fort Worth Star-Telegram columnist, back in 1962. It still is.

Now the champions are teaming up. And urging you to join the team. Omega Phi Alpha members have just been designated Texas Football magazine's official representatives at Texas A&M, which means the top women's organization on campus henceforth will be selling Texas Football subscriptions as a fund-raising project to support its many worthwhile ventures.

So what had been a good deal becomes a great deal. Now when you sign up for your favorite football magazine's matchless 20-issue package (see details at right), you will be contributing significantly to a great Texas A&M organization as well.

And this is the year, remember, when you are going to want Texas Football more than ever. And enjoy its many insider Newsmagazines and Newsletters, available only to subscribers. Because this is the year when the heavily-armed Texas Aggie football team has its sights clearly set on being No. 1, too.

- preseason predictions ranging from Southwest Conference to the high school scene . . . all about each SWC team: the team analysis, two-deep roster, best newcomers, and marvelous game-action color photographs ... and a matchless schoolboy section.
- August Countdown Newsletter. A look at the key developments at all levels as the players begin to assemble for the start of fall two-a-days . . . the summer schoolboy allstar games.
- Four In-Season Newsmagazines. One each in September, October, November and December, each packed with special features, columns, opinions, exclusive photographs on the SWC, college, pro & schoolboy fronts. September: Two-a-day predictions, developments, notes and quotes. October: How top scouts rate each SWC team. November: An appraisal of the best all-SWC candidates as graded by the coaches themselves. December: An exclusive checklist of best schoolboy recruits.
- Ten In-Season Newsletters. These eight-page newsletters provide special inside information every week of the football season except for those weeks when the monthly Newmagazines are published. They include player interviews, columnists' views, special pro reports.
- Special Football-Basketball Newsletters in January and February. The emphasis is on recruiting, who the best prospects are and who the recruiting leaders are. But there's also special basketball coverage
- The 96-page Spring Roundup in March. Giving exclusive assessments of the recruiting returns, latest SWC developments, a special look at the schoolboy champions, and a sizeup of the NFL draft.
- Spring Practice Newsletter in late April. Four special pages for insiders as SWC spring practices pass the half-way mark . . . plus basketball recruiting.

REMEMBER: Only subscribers receive all 20 issues of Texas Football around the calendar, and at the special price of \$10 (by subscribing, you save \$4.00 over single-issue purchases).

fourth birthday, measles and rubella vaccination and a TB test.

Robert Garner, A&M Consolidated kindergarten director, has announced that pre-registration for kindergarten and first graders for the 1975-76 school year is being held today and tomorrow
