SAN FRANCISCO — Fugitive newspaper heiress Patricia Hearst and three radical comrades were arrested Thursday, ending one of the longest and most bizarre manhunts in American history.

Almost by chance, FBI agents spied two of Miss Hearst's fellows in the Symbionese Liberation Army jogging on a San Francisco street. William and Emily Harris were taken without a struggle.

Miss Hearst and Wendy Yoshimura, an artist linked to the radical movement, were apprehended about an hour later, taken into custody at an apartment in the city's Mission District.

"Thank God she's all right." Miss Hearst's mother, Catherine, said in a barely audible voice when in-

formed of the captures.

Her husband, Randolph A.

Hearst, was in New York on business and said as he boarded a plane for San Francisco, "I am very pleased that things turned out the way they did.'

Hearst said that despite the bank robbery charges against his daughter, "I don't think anything will happen on that score; after all she was a kidnap victim, you must re-

In a crowded courtroom 21/2 hours after her arrest, Miss Hearst was arraigned on charges that included bank robbery and federal weapons violations.

Her hair a reddish-brown coler, cut in a shag style, the slightly built Miss Hearst listened as the charges against her were read by U.S. Magistrate Owen Woodruff. She wore tinted glasses and appeared quite pale.

Miss Hearst was kidnaped from her Berkeley apartment Feb. 4, 1974 by the then-mysterious SLA.

Within two months, she had joined her capters and declared herself a revolutionary.

In addition to federal charges, Miss Hearst and the Harrises face state charges that include kidnaping and robbery. Asst. Dist. Atty. John Howard in Los Angeles said the three would be brought there next

week for arraignment. William Harris, 30, and Emily, 28, were arraigned after the 21year-old Miss Hearst was taken

from the courtroom. Bail for all three was set at \$500,000.

Compromise fails

Rates rise

The cities of Bryan and College Company on Thursday failed to reach a compromise concerning the phone company's request for an increase of \$1,073,193 in local rates.

Representatives from General Telephone met for more than two hours with officials from both cities trying to reach an agreement on the rate increase request in order to avoid a possible court battle.

The offer by both cities, about 21 Station and the General Telephone per cent of General Telephone's original request, was submitted in a letter to the phone company.

In the letter, the cities said "the difference in the amount proposed by General Telephone Company of the Southwest, and the amount proposed by the cities, arises from a difference in opinion as to the law and accounting principles to be applied in arriving at the fair rate of return.

Erwin said the phone company plans on Monday "to declare the franchise (granted by the city to the phone company) 'null and void' and to put the scheduled rate increase into effect.'

While the Associated Press reports a decline since 1964 in the average scores of high school graduates on the Scholastic Aptitude Test (SAT), the scores of entering freshmen at A&M have risen

The average score of 4,617 entering students this fall was 1041 (combined verbal and math). The latest national average score on the SAT is 906, 135 below the A&M average.

steadily.

This year's average score, however, was below A&M's 1974 average of 1057. Auston Kerley, director of counseling and testing, was not concerned with the drop.

"There's no answer for the drop," Kerley said. I think it's because more and more students are taking College Entrance Examination Board (CEEB) tests and broadening the base. The drop in averages here is not significant, merely a fluctuation which occurs from year to

SAT scores are required for admission, but Kerley added that the CEEB never intended for these scores to be used alone for admission to any college or university.

"We tie the SAT scores to the high school record," Kerley said. The better the record, the lower the scores are required.

Entrance requirements at A&M say that students in the first and second quarters of their high school classes must make at least 800 on the SAT. Students in the third and fourth quarters of their high school classes must make 900 and 1000 respectively.

Students are also required to take CEEB achievement tests but minimum scores have never been set. Kerley said these scores are used for placement and credit by examination.

SAT test scores have only been used for admission purposes since 1963. Kerley said the tests and the results were studied for two years by the university to be sure they

were fair.
"We still feel they're fair," Kerley said. "We have held to the same standards we set in 1963 and have found no need to raise them. They were never set for image purposes, only to help determine whether or not the student can profit from training at the university.

Nearly 90 per cent of A&M's present undergraduates were in the top half of their high school class. In 1974, 67 per cent of the entering Why are the percentages so high? 'Part of it is because A&M's

Campus crime rises sharply

By CATHY RANDALL

Crime has definitely increased on the Texas A&M campus, Campus Chief Police O. M. Luther says.

And County Attorney Roland Searcy said he intends to vigorously prosecute university cases. Both officials expressed their concern about the increasing

crime rate at A&M University in separate interviews Thursday. "It's too early to tell about this year," Luther said, "but in the past two years crime on campus has increased 20 per cent." Searcy said he has noticed an overall increase in arrests since school started in September.

Parking lot thefts account for much of the increase, Luther said, with tape decks and citizen band radios being primary

months to 99 years, Searcy said. The University police have added three men this year to lighten the case load, bringing the total campus force to 40.

Luther advised students to properly secure bicycles, lock dorm rooms, and record serial numbers of all valuable property.
