

## Ags take track too

# Baylor harriers trounced by A&M

By PAUL McGRATH  
Battalion Sports Editor

With less than a half mile to go, Charles Cottle, the senior member of the Texas A&M Cross Country team, turned to his running mates Bruce Smith and Kyle Heffner and said, "Let's finish together." The trio went on to do just that as they all tied for first, paving the way for the Aggies' second straight meet victory, this time over the Baylor Bears.

Coach Nelson's harriers placed the top four runners and seven in the top ten to accumulate 17 points to the Bear's 42.

Cottle, Smith and Heffner were clocked at 19:19, a 4:50 pace, pretty good considering the driving rain and treacherous footing plaguing both sides.

Manfred Korhs was the Aggies' fourth man at 19:31. Lane Mitchell was seventh at 20:06, Walter Jachimowicz eighth with a 20:12 and Jacob Yemme number ten at the heels of his teammate with a 20:15.

This was the first four-mile course run by the Ags in almost a month. However the route was 120 yards short, causing about a 17 second discrepancy in the times.

"The weather was pretty good for running, we ran a fast pace. Running on the tar (part of the course was a paved road) hurt some of us," said Smith. "It was a bit slippery. Several guys fell down."

Coach Nelson has been using aerobics to develop his runners, a program that seems to be paying off.

"Basically what it amounts to is that aerobic capacity is brought about by long, slower running. Anaerobic means a shorter, faster run," Nelson said.

The program develops the cardio-vascular system and lets more oxygen reach the lungs to be dispensed throughout the body. Thereby fatigue, which is a combination of lactic acid and a lack of oxygen, can more easily be avoided.

The Aggies run from 85 to 120 miles a week to build up their aerobic levels. Nelson said the runners try to get their heartbeats between 140 and 160 beats a minute in order to strengthen the heart. The athletes pause at certain intervals to

measure their pulse rates before taking off at a regular pace again.

A&M has two weeks to prepare for the Southwest Conference meet held in Austin Nov. 10. The course will cover six-miles.

Both Nelson and Smith voiced

optimism for the team to advance to the NCAA meet later in November despite tough competition from Arkansas and Rice. Four teams from this district are selected to go along with eight individuals who also meet the standard.

## Paralyzed gridiron player files suit for \$3.5 million

BIRMINGHAM, Ala. (AP) — A Texas Christian University football player injured in a 1974 game with Alabama filed a \$3.5 million suit Monday, claiming the artificial playing surface was unsafe.

The action was filed by Kent Waldrep in Jefferson County circuit court. It named as defendants five firms allegedly connected with the manufacture and installation of the

Poly Turf, then on Legion Field in Birmingham.

Waldrep said he was "severely and permanently injured as a result of the impact on his head and neck against the artificial playing surface of the football field," resulting in his neck being broken and his spinal cord injured.

Waldrep, 21, accused the defendants of negligence and said the

playing surface was "unreasonably dangerous and not reasonably fit for use as a football playing field."

Waldrep filed his suit two days after he was a special guest at Legion Field at this year's TCU-Alabama game, won by Alabama 45-0. He received an ovation when his wheelchair was rolled onto the field prior to the game. He is partially paralyzed.

# Amoco is engineering

## ...from your first day on the job.

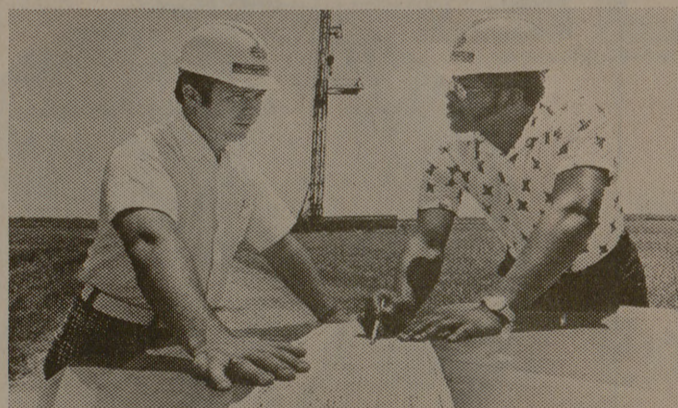

At Amoco Production Company we believe that working is better than watching. Like the young Engineers pictured here, you'll be given a direct engineering assignment the first day on the job. And from your first day on the job you'll be engineering for a leader, a member of the Standard Oil (Indiana) family — the 13th largest industrial firm and the 6th largest oil producer in the country. But our engineering groups are small and individual accomplishments are quickly recognized. Amoco Production Company is a young leader. About 40% of our practicing engineers are 30 years of age or younger, and our salaries and comprehensive benefits are among the best in all of U.S. industry. If you are a Senior majoring in Engineering, we'd consider it a privilege to talk to you about the possibility of employment...as an Engineer, from your first day on the job.

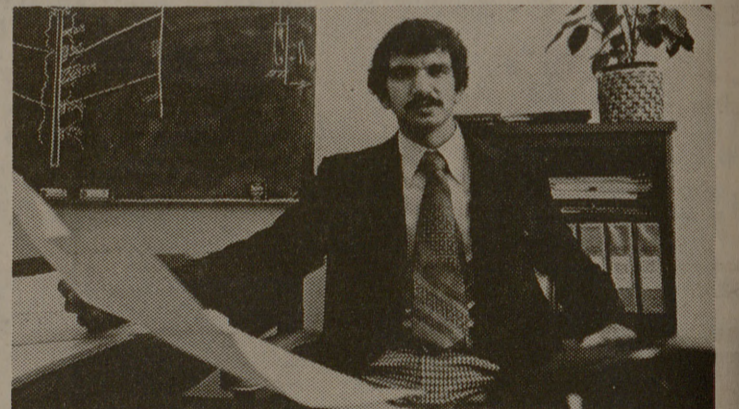

Paul J. Dudenas, Penn State '73: "I am in charge of an oilfield."

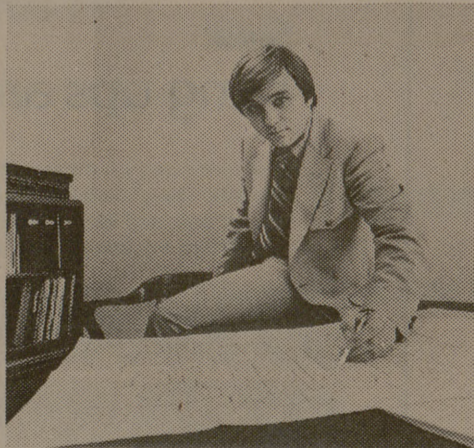

Leslie D. Skinner, Texas Tech '72: "Amoco gives you experience in a hurry."

William J. Grays, right, Texas A&M '73: "You can see your skills blossom."

Steve Shaw, U. of Missouri-Rolla '73: "By 11 am the first day, they wanted my recommendations."

Bruce H. Stover, U. of Oklahoma '71: "I have total responsibility."

Frank D. Henderson, right, U. of Texas '72: "I'm getting all the experience and help I need."
