

Arms limitations talks

Progressing but no agreement

Associated Press
MOSCOW — Secretary of State Henry A. Kissinger ended his talks

with Soviet leaders today and flew to Brussels after reporting "significant progress" in nuclear arms negotia-

tions but no breakthrough to an agreement.

"Some very interesting new Soviet ideas have been introduced," Kissinger said as he went into a final session on the Middle East, Angola and other trouble spots with Foreign Minister Andrei A. Gromyko. "I think good progress has been made."

Gromyko also told reporters that there was "movement forward on several matters."

Kissinger emphasized that he was talking about progress toward a new arms limitation treaty and not about Angola, which Soviet Communist party chief Leonid I. Brezhnev brushed aside in his sessions with Kissinger. But the secretary of state said a report by John Scali, the former U.S. ambassador to the United Nations, that Kissinger might resign because he couldn't

persuade the Soviets to end their support of the Popular Movement (MPLA) in Angola was "ridiculous."

Later, at the airport, Kissinger told newsmen, "We settled some important issues which will be passed on to the nuclear treaty negotiators at Geneva. We made good progress on other issues."

"The Soviet side introduced some significant new ideas last night which we now have to study in Washington, and we will come back with an answer in a few weeks — two or three weeks."

"And we, on that basis, expect to continue to make progress."

Kissinger said he did not want to set a target date for reaching another arms control agreement. But he said, "I believe that conditions exist to move toward an agreement."

Congressional hearing to be held on campus

Dr. John C. Calhoun, Texas A&M vice president for academic affairs, heads a list of witnesses scheduled to appear at 10 a.m. Monday at a congressional public hearing on a bill proposing establishment of regional environmental research centers.

The hearing, postponed on campus last fall, will be conducted in Rudder Conference Center 301 by the House Science and Technology Subcommittee on Environment and Atmosphere. The bill was authored

by U. S. Rep. Olin Teague (D-Tex.), committee chairman.

Chairing the subcommittee hearing will be Rep. George E. Brown Jr. (D-Calif.). Also in attendance will be Reps. Larry Winn (R-Kan.) and Charles Mosher (R-Ohio).

Appearing with Calhoun at 10 a.m. will be Dr. John Neuhold of Utah State University. At 2 p.m. session, Dr. George W. Reid of Oklahoma University and Dr. Carl Marienfeld of the University of Missouri-Columbia will testify.

News Briefs

About 300 members of the voted overwhelmingly yesterday to accept the amount as compared to the 4,000 to 12,000 members of the Seminole tribe for 32 million acres covering almost the entire peninsula.

A LEBANESE army spokesman reported a 75 per cent decrease on all battle fronts today.

An official spokesman said the peace plan that all the warring parties accepted yesterday, that the Palestinian guerrillas entered Lebanon to help the Moslem Lebanese against the right-wing Christian fighters be withdrawn.

The Texas Instruments SR-50 and SR-51 . . . standards of excellence at prices you can afford.

Texas Instruments slide rule calculator SR-50A

- Performs all classical slide rule functions—simple arithmetic, reciprocals, factorials, exponentiation, roots, trigonometric and logarithmic functions, all in free floating decimal point or in scientific notation.
- Features an algebraic keyboard with single function keys for easy problem solving.
- Most functions process displayed data only—allows separate processing of data before entry in a complex calculation.
- Memory allows storage and recall of numbers, features sum key for accumulation to memory.
- Calculates answers to 13 significant digits; uses all 13 digits in subsequent calculations for maximum accuracy.
- Computes and displays numbers as large as $\pm 9.999999999 \times 10^{99}$ and as small as $\pm 1.000000000 \times 10^{-99}$.
- Converts automatically to scientific notation when calculated answer is greater than 10^{99} or less than 10^{-99} .
- Performs operations in the order problem is stated.
- Features bright 14-character display—10-digit mantissa, 2-digit exponent, 2 signs.
- Display provides overflow, underflow, and error indications.
- Features the following function keys:

- + Addition Key
- Subtraction Key
- X Multiplication Key
- ÷ Division Key
- = Equals Key
- CE Clear Entry Key
- C Clear Key—Clears information in the calculator and sets the calculator to zero.
- π Pi Key—Enters the value of pi (π) to 13 significant digits into calculations.
- ± Change Sign Key—Changes the sign of the number displayed.
- x² Square Key—Squares the number displayed.
- √ Square Root Key—Finds the square root of the number displayed.
- 1/x Reciprocal Key—Finds the reciprocal of the number displayed.
- x! Factorial Key—Finds the factorial of the number displayed.
- sin Sine Key—Determines sine of the displayed angle.
- cos Cosine Key—Determines cosine of the displayed angle.
- tan Tangent Key—Determines tangent of the displayed angle.
- arc Inverse Trigonometric Key—Determines the angle of the selected trig function whose value is the displayed quantity, when pressed as a prefix to the sin, cos, or tan key.
- sinh Hyperbolic Function Key—Determines the hyperbolic function of the displayed angle when pressed as a prefix to the sin, cos, or tan key.
- DR Angle Change Key—Converts the displayed angle from radians to degrees or from degrees to radians.
- log Determines the logarithm to the base 10 of the displayed number.
- ln Natural Logarithm Key—Determines the logarithm to the base e of the displayed number.
- e^x e to the x Power Key—Raises the value of e to the displayed power.
- y^x y to the x Power Key—Raises y to the power of x.
- √x xth Root of y Key—Finds the xth root of y.
- xy Exchange Key—Exchanges the x and y quantities in y^x or x^y before the function is processed.

Texas Instruments slide rule calculator SR-51A

- Performs logarithms, trigonometrics, hyperbolics, powers, roots, reciprocals, factorials, linear regression, mean, variance and standard deviation.
- Features an algebraic keyboard with dual function keys.
- Three user accessible memories permit storage, recall, sum, product operations.
- Preprogrammed to provide 20 often used engineering conversions.
- Random number generator, automatic calculation of permutations, automatic percent and percent difference computation.
- User selected fixed or floating decimal point.
- Calculates answers to 13 significant digits and uses all 13 digits in subsequent calculations for maximum accuracy.
- Computes and displays answers as large as $\pm 9.999999999 \times 10^{99}$ and as small as $\pm 1. \times 10^{-99}$.
- Automatically converts answers to scientific notation when calculated answer is greater than 10^{99} or less than 10^{-99} .
- Features bright 14-character display—10-digit mantissa with sign, 2-digit exponent with sign.
- Display provides overflow, underflow, error indications.
- Lightweight, fully portable.
- Rechargeable batteries or AC operation.
- Full year warranty.
- AC Adapter/Charger included.

- STO Store Key—Stores the displayed quantity in the memory.
- RCL Recall Key—Retrieves stored data from the memory.
- Σ Sum and Store Key—Adds the displayed number to the number in the memory, and stores the sum in the memory.
- Full floating decimal.
- Lightweight, fully portable.
- Rechargeable batteries or AC operation
- Full year manufacturers warranty.
- AC Adapter/Charger included.
