The College Station City Council voted last night to ask the owners of Monaco Apartments to share in the costs of replacing a bridge on Red-

The apartments have had continuing problems with flooding. Engineering studies have determined the bridge is too small to withstand large runoffs. The resulting overflow is flooding the apartments.

Chalon Jones, an attorney for the Luther said violators are treated apartment owner, said he feels the according to their circumstances, not city should alleviate the problem since the city built the inadequate

City engineer Elrey Ash said there are three options to the problem. These are: leave it as is, replace the bridge with one adequate enough to carry heavy rains, or remove the bridge and have a vehicle tur-naround (cul-de-sac) on Redmond

Drive.
The cul-de-sac plan would cost \$5,000, while a new bridge is estimated to cost \$30,000.

Ash said a major disadvantage of the cul-de-sac is that it would double the traffic congestion at Redmond

Councilman Larry Bravenec said the bridge was there before the apartments were built. Since the builders knew the land was in a flood plain Bravenec said he felt the city was not completely responsible. He proposed that the apartment owner and city share the costs of a new

bridge, 50-50. The owner's attorney said he would pass the offer on to the owner.

The council also approved the placement of no-left-turn signs near the intersection of Jersey Street and Texas Avenue. Two breakaway signs will be placed on the Jersey Street median approaching Texas Avenue. Two others will be placed at the Jersey Street exits from Redmond Terrace Shopping Center.

The action was taken because of the danger posed to children traveling to and from the A&M Consolidated Middle School.

The council indicated that if the signs are not effective, then a raised median will be constructed in Jersey

The council also adopted an ordinance calling for a general municipal election on April 3. A resolution authorizing joint election procedures with A&M Consolidated School District was also adopted.

recommendations to come Monday

The A&M Consolidated School Board will meet Monday night to hear recommendations concerning a possible bond election

The meeting will be held at 7 p.m. in the board room of the Special Services Building, 1300 Jersey St.

The Citizens Advisory Committee

and the College Station Education Association (CSEA) will advise the board on district needs for school

space.

The advisory committee was appointed by the board to investigate the facilities needed and their cost. CSEA will report on what the teachers feel are the district's build-

The board also will discuss the possibility of joint election of board trustees and College Station city councilmen April 3. The College Station City Council tentatively approved the joint elections last night.

Aggieland annals record triumphs

Today is Feb. 17, 1976, the 30th day of the spring semester. There are 81 days until Final Review, 87 until the last final exam.

On this date in 1964, 19-year old Randy Matson shattered the indoor world shot put record held by Gary Gubner of New York University with a put of 65 feet, 8-1/4 inches at the Will Rogers Indoor Games in Ft. Worth. The Aggie sophomore then bettered his own record with a put of 66 feet, 2-1/4 inches

On this date in 1924; the headquarters of the 8th Reserve Officer Training Corps in Galveston anounced that the enrollment in the ROTC program at Texas A&M was the highest in the country, ahead of the Massachusetts Institute of

By MARY ALICE WOODHAMS
A scholastic policy designed by corps staff to improve grade point

a.m. and 1 to 4 p.m. Monday through Friday and from 7 p.m. to 6:30 a.m. Sunday through Thursday. A scholastic policy designed by corps staff to improve grade point ratios in the corps has come into ef-

Although 11 per cent of the corps made above a 3.25 last semester, 31 per cent made below a 2.0, said Robert Harvey, corps scholastic

Sergeant.

The scholastic policy consists of enforced quiet hours, limiting free evenings for cadets not meeting certain grade requirements, and regulating corps meeting times.

Call-to-quarters (CQ), is a designated three-hour study period between 7:15 and 10 p.m. At this time all freshmen and sophomores must

be in their rooms studying. Corps-related activities end at 7:15 and may resume after 10 p.m. Other quiet hours are from 8 to 11

minimum disturbance.

Juniors in charge of call-toquarters sit at lighted desks in the dark hallways to insure quiet, sign passes and enforce the new rules. End doors of dorms are locked during call-to-quarters to minimize hall traffic, and hall monitors are not re-

quired to speak to anyone. There is no mandatory C.Q. for underclassmen earning a 3.25 or better last semester.

We had to study all the time. They were constantly watching us,' said one freshman who was a Distinguished Student last semester.

call-to-quarters I don't feel re-

stricted. "They are constantly on us about our grades, asking us questions about them," he said of his upperclassmen.

Every Sunday we post a list of our weekly tests.

Sophomores earning at least a 3.25 are also not required to observe C.Q., and only freshmen with a 2.25

or better get an evening out. Individual Corps units may modify the policy for grade requirements and extending C.Q., but only with the approval of the corps staff.

Dewey Bolton, commanding of-ficer of Company W-1, explained his philosophy behind pressure on academics like this:

"One commanding officer told his freshman at 2 a.m. as they were sneaking off to Bonfire, 'When you go looking for a job, they're not going to ask you how many logs you put on the Bonfire, but they might ask you
