Costa story published

Dr. Richard Costa, Texas A&M University English professor, has become the second faculty member to have a short story accepted by the Texas Center for Writers. The story will be published in the center's initial anthology next spring.

Texas A&M will apparently be well represented in the anthology. Professor Frank Peirce was notified that his work has also been accepted for the anthology, "Texas Stories and Poems, Number 1." Several other faculty members have also submitted works to the Dallas-based center.

Costa's work is entitled "The Adventurers" and Peirce's is "The Caterpillar Hunter."

Solar energy to be used in new prison

Associated Press

BASTROP — Rep. J. J. Pickle announced yesterday that a \$1.13 million solar energy heating and cooling system — one of the world's largest — will be part of a new federal prison for youths here.

"The Federal Youth Center will be the most advanced of all youth centers in the nation and the solar project will put us in the spotlight of the country's research program," Pickle, D-Tex., said at groundbreaking ceremonies for the center.

The \$11.3 million center will be a medium security prison for 500 first-time offenders between the ages of 18 and 25. It is scheduled to open in January 1978 and will have a staff of about 150 with an annual operating budget of approximately \$4.5 million.

It will serve an area roughly bounded by Houston, San Antonio and Dallas-Fort Worth. Young federal offenders from this area are now being sent to federal prisons in Oklahoma and Kansas.

It will be on a 48-acre tract at old Camp Swift. Each inmate will have a private room.

Pickle said the solar system will show central Texans — "who have been the hardest hit by soaring utility bills" — how technology "can be used to provide heating and cooling for a large facility."

Electrical engineers receive \$600 TP&L scholarships

James Van Glynn of Brownwood and Carl Wayne Lott of Tyler were named the winners of two \$600 scholarships Monday at Texas A&M University.

Dr. W. B. Jones, Jr., head of the electrical engineering department, said the awards came from the Texas Power & Light Company of Dallas for good scholastic record, interest in a career as a power systems engineer and active participation in student affairs.

Glynn, the senior recipient, is the son of Mr. and Mrs. James A. Glynn of 2203 10th Street, Brownwood. In high school, he was president of the science club and earned honors in band activities. Glynn was employed by Texas Power & Light Company during the summer of 1974.

The junior recipient, Lott is the son of Mr. and Mrs. Ray Lott of 2005 Clubview in Tyler. He graduated from Robert E. Lee High School in 1974 and after attending Tyler Junior College, Lott transferred to Texas A&M. During one semester at A&M he earned a grade point average of 3.8125 out of a possible 4.0.

BULLETIN BOARD

TUESDAY

Cepheid Variable, Symposium "Art in Science Fiction," 701, 8 p.m.

Voter's Registration, MSC Floor, 9-5 p.m.
