Continuing Education, Enrichment Program series designed to expose exceptionally gifted seniors from area high schools to college-level material. Lectures are on "Slavery in the Ante-Bellum South" and will be delivered by Dr. Haskell Monroe, dean of faculties. Lectures will be presented 9:30-11:45 a.m. today and again March 3 in Rudder Tower.

New techniques help doctors spot cancer

United Press International
NEW ORLEANS — A Tulane University engineering student predicts that within 10 years doctors will be able to determine if a woman has a cancerous breast tumor without undergoing the trauma of a biopsy.

"One of the more traumatic things a woman can go through is to be taken into surgery for a biopsy not knowing whether she will still have a breast when she comes out," said Rikki Weichman, who is helping develop a new X-ray technique

called micromotography. Weichman, one of two women in Tulane's graduate engineering school, said the technique enables doctors to spot tumors one-fourth the size of the smallest mass visible on conventional X-rays and mammograms.

Micromotography can literally see on film the difference between a cancer with octopus-like tentacles reaching into surrounding tissue and a benign tumor which joins surrounding areas smoothly, she said.

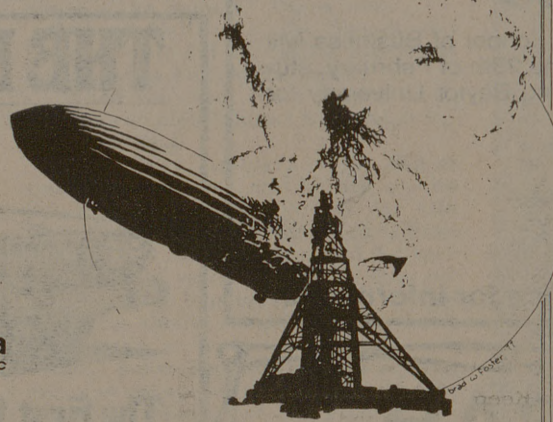

"It's a super diagnostic tool to discover any cancerous lesion in any part of the body," Weichman said. "From everything I understand, its potential is practically unlimited."

Weichman recently reported her findings to the Cancer Association of Greater New Orleans and received funding from that group and the National Cancer Institute.

She has worked on the project for two years with Dr. Hal Becker of the university's Laboratory for Clinical and Behavioral Engineering.

The challenge.

Here's the challenge. You'll need a watch in numerical order. When you've reached and a pencil. Start with number 1 in the center of the ribbon. Then, as quickly as you can, cross out every number, one at a time less than three minutes, you've met the challenge.

56	2	47	9	38				
10	37	57	16	19	46	35		
33	24	7	51	21	42	4		
32	54	43	12	60	52	31	41	55
39	23	15	1	45	50	25		
13	22	28	34	53	48	26		
49	27	14	59	20				
58	30	11	40	8	29	3		
36	6	44	18	5	17			

When there's a challenge,
quality makes the difference.

We hope you have some fun with the challenge. There's another challenge we'd like to offer you, too. The Pabst challenge: We welcome the chance to prove the quality of our beer. We challenge you to taste and compare Pabst Blue Ribbon to any other premium beer. You'll like Pabst better. Blue Ribbon quality means the best tasting beer you can get. Since 1844 it always has.

PABST. Since 1844. The quality has always come through.
