OFFICIAL NOTICE
SENIOR RING ORDERING PROCEDURE
OFFICE OF THE DEAN OF ADMISSIONS AND RECORDS
To be eligible to order the Texas A&M ring, an undergraduate student must have at least one year in residence, credit for at least ninety-two (92) semester hours and be in good standing with the University. A year in residence may consist of the Fall and Spring semesters or one of the above and a full summer session (both the first and second terms). The hours passed at the preliminary grade report period on March 23rd may be used in satisfying this ninety-two hour requirement. Students qualifying under this regulation should leave their names with the ring clerk, Room Seven, Richard Coke Building. This should be done prior to March 23rd in order for all records to be checked to determine ring eligibility. (Any student having completed ninety-two (92) hours at the end of the Fall '76 semester may order at any time. There is never a dead-line once the hours have been completed, with the exception of a monthly mailing date.) Graduate students are eligible to order with proof (receipt) that they have filed for graduation. Orders for mid-semester will be taken by the ring clerk starting March 23, 1977, and will continue until April 26, 1977. Students who do not place their order during this period may order after final grades are posted. All rings must be paid for in full when the order is placed. Please bring mid-semester grade reports along when ready to order. Anyone having failed to leave their names in advance and fail to bring grade report will be asked to return later to allow time for records to be checked. The rings should arrive at the Registrar's Office on June 28, 1977. All rings ordered, regardless of whether on March 23rd or April 26th will arrive at the same time.
The ring clerk is on duty from 8 a.m. to 12 noon and 1 p.m. to 5 p.m. of each week, Monday through Friday. However, in order for records to be checked, orders must be placed prior to 11:30 a.m. and 4 p.m. We hope this information will be helpful and extend our congratulations.
Edwin H. Cooper, Dean
Admissions and Records
Carolyn Wells, Ring Clerk

Ride a bicycle Help keep our environment clean

Bassett
(continued from page 8)
in the right direction. I definitely think more construction is going to be needed. Because the bond issue is really more of a stopgap measure in some respects and as far as getting us up to the level where we need to be. But it is a very large step in the right direction.
Do you support continued development of vocational programs? Yes, I definitely do.
What are your thoughts on future programs for students with learning disabilities and accelerated students? Well like I've already said, I think these are two areas where we need to expand. Consolidated is putting these programs into effect. They

have a ways to go. But they very definitely are going to have to improve.
What do you plan to do about improving the maintenance of physical facilities? I don't know right off the bat. I think changes do need to be made. I think part of our problem is that our facilities have not been maintained and now corrections are having to be made. I would have to take a look at it if I get elected. I think changes are in order.
What do you think could be done to improve the safety and quality of present playground facilities? Again maintenance is one big thing. You need to have first class facilities and make sure you buy equipment that is safe and will not break down and keep this equip-

ment maintained. Right now our elementary schools are having volunteers work on some of their playgrounds. I think this is a good idea. We'll save money and get parents involved in the school district. Once you have these facilities constructed they need to be maintained.
How do you feel about current taxation methods and how do think they could be improved? Right now I hesitate to say anything about that. Some changes are needed. I don't think they're near as bad as some people would make them out to be. We definitely need every penny we're getting right now. There are some inequalities that could be ironed out. But I'd hate to say where they could be changed right now without more information.

Company finds postal system job credible

United Press International
NEW YORK — Talk about mail delivery and everyone has a story about the letter that took three weeks to get across town, the Christmas card that didn't reach Aunt Mary until the following December or the package that never arrived at its destination at all.
Bring up the topic with Fred T. Allen, whose company has a lot to do with the mail, and get ready for an argument.
"Criticizing the mail seems to be a very fashionable thing but the fact is the Postal Service since 1970 has done a pretty credible job with what was an ineffective, inefficient operation that was near disaster," said Allen, chairman of Pitney Bowes Inc. "They are considerably more effective than they were in 1970."
Pitney Bowes makes postal meters and other mail-related equipment but Allen said only about 2 per cent of his company's business comes from the Postal Service. The licenses his company holds on metering machines are not exclusive and are available to any manufacturer meeting Postal Service specifications.
What concerns him, Allen said, is that the Postal Service is not getting credit for the progress it has made and therefore proposals to give private carriers the right to carry first class mail, for example, are gaining support without explaining their consequences.
"I think this would be devastating," Allen said, contending private carriers would only be interested in the profitable high-volume mail routes, skimming the cream from the Postal Service which still would

Life Savers gum is really safe to chew
United Press International
NEW YORK — Life Savers Inc. is trying to track down the source of a story that has children in the metropolitan area wary of buying Bubble Yum for fear of biting into big, black deadly spiders.
According to the yarn, a man bought Bubble Yum — a product Life Savers began marketing in mid-February — and bit into a black widow spider that was living in the gum.
The spider's eggs dropped into the man's stomach and hatched and he died, the tale goes.
The story is not true, but apparently a lot of children believe it and they have stopped buying Bubble Yum.
