Oceanography Department, Seminar, Don Olson, "Rings and Things—The Spin Down Problem," Oceanography-Meteorology 112, 3:30 p.m.

5 to 10 treated weekly

# Strict bed rest best for mononucleosis

By RENE OGLETREE

To a sleep-lacking college student a medical order for strict bed rest may seem like a heaven-sent answer for tiredness, but after a week of lying in bed even this grows old.

Approximately five to ten students are sent to their beds each week for treatment of mononucleosis, commonly known as the kissing disease, according to Claude B. Goswick Jr., M.D., A. P. Beutel Health Center director.

The close confines that students live in and attend classes in make the high school and college age person more susceptible to the viral infection than younger or older persons are, Goswick said.

Mononucleosis received its nickname, "the kissing disease," since it is spread by intimate contact, such as kissing, Goswick explained that a person could also be

come infected by just being in the room with an infected person.

Symptoms may include a sore throat, often thought to be tonsillitis, fever, enlarged lymph nodes in the throat and a general feeling of weakness and malaise, Goswick explained.

Many students do not realize that they have contracted the illness and continue on with their normal activities causing other persons to come into contact with them and therefore mononucleosis, Goswick said.

The contagiousness of mononucleosis is only slightly less than that of the childhood diseases, such as chicken pox or mumps, which are high contagious, he said.

If the patient goes without the prescribed treatment of rest, complications, such as hepatitis, meningitis, or pneumonia, may be added to the initial illness, Goswick added.

In an illness that takes from several weeks to several months to recover from, the person who has previously had mononucleosis is not immune from reinfection or relapse of the illness as sometimes thought, he said.

**THE DEAN OF BEER'S QUICKIE QUIZ.**

**Q: Chill-Lagering is:**  
a) A popular German country and western singer.  
b) A Scandinavian winter sport played without clothes.  
c) A new ethnic TV comedy about the owner of an ice cube factory.  
d) The right way to age beer.

**A: (d) Sorry, Chill-Lagering is not Olga and Svend running around in a snowstorm in their birthday suits. Chill-Lagering is the way Schlitz ages beer. They age it cold. Very cold. Down to 29.5 degrees. The result is a beer with sparkling clarity. A beer that's crisp, clean and bright. I suggest you look into one right now.**

THERE'S JUST ONE WORD FOR BEER.

AND YOU KNOW IT.

Siglinda Steinfüller  
Dean of Beer
