**Shuttle buses will operate this summer**

Shuttle bus service at Texas A&M University will be conducted for summer classes this year. This will be the first summer the service will be offered.

Operations will begin at 7 a.m. on scheduled class days from four off-campus locations and will continue at half-hour intervals until the final bus leaves the campus at 6:45 p.m.

Efforts will be made to provide three bus pick-ups per station between 7 and 8 a.m. on class days to accommodate passengers who need to reach campus early.

The four off-campus points where service will begin daily are Fairway Apts. for the north route, University Terrace Apts. for the two south routes, Tanglewood Apts. for one east route and between Plantation Oaks and Briarwood on O'Hara Drive for the other east route.

Routes will remain the same as are presently served but less equipment will be in use this summer.

**All-weather helmet**

Some people will do anything to keep dry when it rains. Texas A&M student Gary Williams discovered that wearing his motorcycle helmet was the best method of keeping dry when it rained.

**Energy discussions on TV each Thursday**

Persons in the Bryan-College Station and the Waco television viewing areas can hear two aspects of the energy situation discussed by Texas A&M University professors each remaining Thursday in April.

Dr. Wayne LePori, Prof. Howard Chevalier, and Dr. Jeff Morehouse will appear in taped interviews on "Ten Acres," a noon program hosted by Johnny Watkins. The program airs on KBTX-3 in Bryan, and KWTX-10 in Waco.

Dr. LePori, assistant professor of agricultural engineering, will

appeared on the show yesterday and discussed the possibilities of using crop and agricultural residues as energy sources.

The April 21 show will feature Prof. Chevalier, assistant professor of aerospace engineering, who will discuss the outlook for utilizing wind energy and will explain a wind energy converter which he has constructed and is now testing.

Solar energy and its future uses will be discussed on the April 28 show by Dr. Morehouse, assistant professor of mechanical engineering.

**Spring II program offers 36 courses**

By MYRA KYLE

Belly dancing, oil painting, macramé and ballet are only a few of the 36 courses offered by the Spring II Community Education program at A&M Consolidated schools.

Community Education is a program that provides people with the opportunity to take courses in subjects that are of special interest to them.

Registration for Spring II classes will be tomorrow in the A&M Consolidated High School cafeteria from 10 a.m. to 1 p.m.

Charles Greenwalt, coordinator of Community Education, said that if a person is unable to attend registration, he may register at the Community Education office (1300 Jersey) or call 846-3820 after tomorrow.

Material costs are not included in the tuition fee. Material and supply lists, where applicable, will be provided at registration.

Full refunds will be made if a class is cancelled by Community Education, according to a program brochure.

It also states that students withdrawing anytime prior to the second class meeting will receive an 80 percent refund. No refunds will be made after the second class meeting.

**Management seminar begins**

Participants in the third annual physical distribution management conference begin arriving on Texas A&M University campus Sunday.

After registration and welcoming remarks, conferees will begin their first full day Monday with an 8 a.m. panel on effects of future economic, legislative and international factors on the physical distribution management picture.

Other portions of the program will feature general sessions on "Computer Applications to Physical Distribution Management Operations," "Computer Service Requirements," "Physical Distribution Management Operations Forecasting and Planning" and "A Shipper's View of the Transport Decision."

The seminar is designed for management personnel responsible for their firm's distribution and related activities. Updating and development of skills is emphasized through active participation, trend interpretation and a faculty drawn from both industry and academia.

Speakers will come from professional associations, industry and government.

At the end of the seminar, conferees are awarded continuing education certificates.

The conference is sponsored by the Executive Development Programs Office of the College of Business Administration in cooperation with the Continuing Education Office at Texas A&M.

**Tiny Leichtenstein almost trouble-free**

United Press International

VADUZ, Leichtenstein—tiny principality of 23,700 people and 62 square miles said it is doing right economically despite trouble elsewhere in the world.

For instance, unemployment dropped in 1976 from 58 to 17 percent and the number of partially employed declined from 139 to 10, State Bank said. There were 10 opportunities.

Gross National Product last totaled \$264 million, which means per capita income of \$10,560.
