"ALICE DOESN'T LIVE HERE ANY MORE" PLUS "MUSTANG COUNTRY"

D. C. Moore named head of center

MOORE

Don C. Moore, 37, has been named head of Texas A&M University's Center for Urban Programs, it was announced Wednesday.

Engineering Dean Fred J. Benson said Moore will take over the Texas Engineering Experiment Station (TEES) post from Dr. Richard W. Thomas who left the position because of increased duties as associate dean of engineering.

Moore was hired Feb. 1 as assistant director of the center after a stint as assistant director of the Texas Municipal League in Austin. He has been involved with municipal governments since 1969 and is a frequent contributor to the league's "Texas Town and City" magazine for city managers.

Moore is also author of the book "Building Citizen Support: A Handbook for City Officials on Citizen Participation and Public Information."

The Center for Urban Programs was activated as part of TEES in 1972 to accelerate solving technical

problems confronting Texas city and county governments and councils of government. Through the center, faculty from Engineering, Liberal Arts, Business Administration, Veterinary Medicine and Architecture work on problems identified by local government officials.

"We hope to continue the policies of the center and university to provide services and assistance to Texas cities and counties and through this aid to benefit the citizens of the state," Moore said. "It's a privilege to take on the task.

Professor to take leave for research

A Texas A&M University civil engineering professor will take a year's leave of absence to conduct research for the U. S. Army Corps of Engineers in Mississippi.

Dr. Wesley James, a member of the hydraulics and hydrology division of the Civil Engineering Department since 1971, will conduct research at the U. S. Army Engineers Waterways Experiment Station.

His major research will be the formulation of a five-year project in military hydrology aimed at improving the capability of the armed forces to obtain rapid, accurate hydrological information.

"The project will use satellite information and other forms of remote sensing in addition to computer models to estimate soil moisture, runoff, stream flow and stream levels," Dr. James explained. "This will mean a lot of interesting research in the same areas in which we work at Texas A&M."

Dr. James will be senior research engineer responsible for conducting and directing research in the areas of remote sensing, environmental management and water resources engineering. The work will emphasize the use of sophisticated remote sensing to gathering of data on hydrologic and hydraulic conditions in unmeasured watersheds.

Dr. James received his Ph.D. at Oregon State and is now an associate professor. He is also chairman of the executive committee of the aerospace division of the American Society of Civil Engineers.

Mrs. Ella Beasley and Eddie McWilliams (right) accept a plaque Tuesday at Texas A&M honoring the founders of the Police-Community Relations Institute, in its 21st year.

Institute founder honored at dinner

The late Wallace D. Beasley, former head of police training in the Texas Engineering Extension Service, and Eddie McWilliams of Houston were honored Tuesday at Texas A&M University.

The founders of the Police-Community Relations Institute at Texas A&M were cited for their foresight, dedication and work.

Presentations by Dr. Bill Pharr were made at the opening dinner of the 21st institute. NCCJ and A&M have cooperated in the institute here since 1957.

"Wallace and Eddie had a vision for the concept of police-community relations, and were willing to elevate the standards of law enforcement personnel," Pharr, NCCJ Dallas regional director, said.

The institute continues this Friday noon this week, with a dinner, presentations and workshops on how police officers may handle stress. The program features Houston professional stress reduction techniques.

'Unrecoverable' oil tappable in Texas

A Texas A&M University professor told members of the Dallas Desk and Derrick Club today that Texas has 100 billion barrels of crude oil, now classified as unrecoverable, which could be tapped with new technology and a better economic atmosphere.

Dr. Paul B. Crawford, assistant director of the Texas Petroleum Research Committee and professor of petroleum engineering at Texas

A&M, also said there are at least a dozen new oil recovery methods which could be used to increase the oil recovery by 10 billion barrels.

"The use of soaps in a special formulation could be used to get several billion barrels of additional oil," Crawford said. "The use of fire and steam could be used to get a few billion barrels of our heavy crude oil and high pressure gases can be used to recover an equal amount of our light crude oils."

AEROBICS PROGRAM

CONTINUING THIS FALL, THE HEALTH AND PHYSICAL EDUCATION DEPARTMENT WILL SPONSOR ADULT FITNESS PROGRAMS FOR FACULTY AND STAFF MEMBERS OF THE UNIVERSITY.

A "CO-ED" CLASS WILL MEET DAILY, MONDAY THROUGH THURSDAY, FROM 5:15 TO 6:15 P.M. IN ROOM 255 OF G. ROLLIE WHITE COLISEUM. THIS CLASS WILL EMPHASIZE AEROBIC EXERCISES DESIGNED TO IMPROVE CARDIOVASCULAR EFFICIENCY, CONTROL HYPERTENSION, AND DECREASE BODY FAT.

THE NOON EXERCISE PROGRAM, FOR WOMEN, WILL MEET DAILY, MONDAY THROUGH THURSDAY, FROM 12:00 NOON TO 1:00 P.M. IN ROOM 255. THIS PROGRAM EMPHASIZES FIGURE CONTROL AS WELL AS AEROBIC ACTIVITY.

THESE ARE COMPLETELY INDIVIDUALIZED PROGRAMS, WHICH INCLUDE (1) EXTENSIVE FITNESS EVALUATION IN THE HUMAN PERFORMANCE LABORATORY; (2) INDIVIDUAL EXERCISE PRESCRIPTION TO MEET SPECIFIC NEEDS; AND (3) WELL-TRAINED EXERCISE LEADERSHIP AND SUPERVISION. EACH CLASS IS LIMITED IN MEMBERSHIP, ON A FIRST-COME FIRST-SERVED BASIS.

THERE IS A REGISTRATION FEE WHICH INCLUDES FITNESS EVALUATION, EXERCISE PRESCRIPTION, AND EXERCISE SUPERVISION COSTS.

TO REGISTER, CALL 845-6841 TO MAKE AN APPOINTMENT TO TALK WITH ONE OF THE AEROBICS STAFF MEMBERS.

*NOT LIMITED TO UNIVERSITY PERSONNEL, SPOUSES AND FRIENDS ARE WELCOME.
