## Staff expands

John R. Gudleman Jr. has joined the staff of Texas A&M University's Planning and Placement Center. Gudleman's appointment as assistant director of placement was announced by Agriculture Dean H. O. Kunkel.

Kunkel said that Gudleman's duties include primary responsibility for career counseling, arranging placement interviews and working with potential employers of Texas A&M students in agricultural degree fields.

A 1975 Texas A&M graduate, Gudleman has been a research associate in poultry science at the university while completing studies for a master's degree. He majored in animal science as an undergraduate.

Gudleman also has had experience as an Institute of Tropical Veterinary Medicine technician and veterinary assistant in a Houston clinic.

## Women recruited

Dr. Millie Hughes Wiley, a Minn. native and a graduate in chemistry from Tarleton State University, has a chance to become one of the first women astronauts in the United States.

She is one of 120 finalists who will finish the first candidates selected for possible space travel since 1969. Wiley is one of the hopefuls for the mission specialist category, all of which have doctorate or medical degrees or both.

# Long, hot Septembers no stranger to Texas

Summer-like weather here the last few days has many people eagerly watching for a norther, or anything else to shut off the heat.

"All we can do is look forward to October," Professor John Griffiths, Texas A&M University's meteorology department said this week.

Historically, the odds favor a warm latter third of September, said Griffiths, who also serves as state climatologist. "Our records are fairly reliable for the last 60-odd

years," Griffiths said. "Only in the last 20 has Sept. 20-30 been a fairly cool period."

He said that recent warm temperatures, producing record highs generally from Waco northward, are the rule rather than the exception. But he added that local high temperatures are running "within a degree or two" of record levels.

"We are not at present setting records like Waco and some of the other more central and North Texas cities, but we are close," he said.

The period corresponds closely to weather patterns of the mid-1950s, Griffiths said. "Especially in 1956, the Sept. 20-30 period was very similar to what we are having now. The lowest maximum then was 93. The temperature reached 101 degrees one day."

He said the highest temperatures recorded in the 60 years range between 98 and 101 degrees.

"On the other end of the scale, we should currently be seeing sunrise averages in the upper 60s," Griffiths said. "But we are getting morning lows in the lower to mid-70s."

The all-time highest minimums are 76-78 degrees, Griffiths said.

## Congressman asks for info

Former Republican Congressman Charles Mosher of Oberlin, Ohio will make two addresses at Texas A&M University, Oct. 10-11.

Mosher, now executive director of the U. S. House of Representatives' Science and Technology Committee, was invited to talk to the Professional Development Seminar of the Doctor of Engineering Program. The engagement was expanded to a two-part program the first of which is open to the public.

His address entitled "Congress hopes for Better Information" will be presented at 8 p.m. Oct. 10 in room 102 of the Zachry Engineering Center. It will be continued Tuesday afternoon at 2 p.m. in room 342.

Mosher elected to the Congress in 1960 and retired last January after serving eight terms. He was for many years the ranking minority member of the Science Committee and was especially involved in its subcommittee on science, research and development.

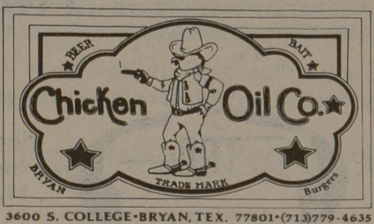

## Engineer groups get \$1,500 grant

Special engineering programs at Texas A&M University received a \$1,500 support Thursday from Monsanto Chemical Co.

Jerry Price, senior group supervisor of the company delivered a \$1,000 grant to the university's Society of Women Engineers. Another \$500 went to the Junior Engineering Technology Society program geared toward outstanding high school students.

Representing Texas A&M were assistant dean of engineering Charles Rodenberger, Society of Women Engineers President Gail Bryant and Drahn Jones, associate professor of civil engineering.

# A big howdy for Miller

About 225 colleges and universities and some 100 learned societies and professional organizations will be represented Tuesday at the inauguration of Dr. Jarvis E. Miller as the 18th president of Texas A&M University.

The delegates will be representing institutions of higher learning from throughout the nation and several foreign countries, says Dean Edwin H. Cooper, chairman of the university's inaugural committee.

Gov. Dolph Briscoe and congressman Olin E. Teague head the list of dignitaries who will bring formal greetings to Texas A&M and Dr. Miller at the 10:30 a.m. ceremonies in G. Rollie White Coliseum.

Dean Cooper emphasizes that the program is open to the public and that neither invitations nor tickets are required for entry to the coliseum.

Classes will be dismissed all day to allow the maximum number of students and faculty to attend. All campus offices are authorized to operate with small staffs during the ceremonies to give as many employees as possible the opportunity to attend, Dean Cooper adds.

Dr. Miller's inauguration was timed to coincide with the 101st anniversary of Texas A&M, the state's first public institution of higher learning.

Ceremonies opening the processional will include (in order of entry onto the floor of the coliseum) U. S. color guard and Ross Volunteers; grand marshal, Dr. R. C. Potts; and floor marshals, Robert H. Baine, Willis S. Ritchey, Loyd F. Taylor and James David Worley.

Also president of the Residence Hall Association and cadet colonel of the Corps of Cadets; student delegates, president of the Memorial Student Center Council; delegates of learned societies and professional organizations; president of the sophomore class; delegates of colleges and universities; president of the junior class; delegates of the faculty; president of the senior class; distinguished alumni; and president of the Graduate Student Council. Also, deans of the university, Texas Color Guard and Ross Volunteers; platform marshals, Robert A. Lacy and Billy G. Lay; Board of Regents, administrators and platform guests; Gov. Briscoe with honor guard of Ross Volunteers; marshals, J. George H. Thompson and A. M. Sorenson, Jr.; mace bearer, Haskell Monroe, and President Miller with honor guard of Ross Volunteers.

Representatives extending formal greetings are (in the order in which they will speak): Robert Harvey, student body president; Dr. John Knox, president, Association of Former Students; Dr. William Basichis, chairman, Faculty Affairs Council; Dr. Lorene Rogers, president, the University of Texas at Austin; L. F. Peterson of the Coordinating Board; Gov. Briscoe, and congressman Teague.

Chancellor Jack K. Williams will preside at the inauguration. Clyde H. Wells, chairman of the Texas

A&M University System Board of Regents, will extend the welcome, make introductions and conduct the investiture.

The investiture will be followed by the president's inaugural address.

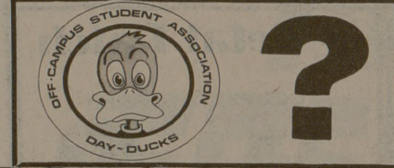

The singing of "The Spirit of Aggieland," the benediction and recessional conclude the program.

The Rev. Bob E. Waters, minister of the A&M United Methodist Church, will render the invocation, and the Rev. W. C. Hall, campus minister for the Wesley Foundation, will give the benediction.

Robert L. Boone will lead the

singing. Susan Miller, daughter of the new Texas A&M president, will play the musical prelude on the organ, and the Aggie Band will play for the processional.

The day's activities conclude with a review at 1:15 p.m. by the Corps of Cadets honoring President Miller.

**Take shelter in the moonlight.**

**BB&L can help you tax shelter part of your second job's income.**

If you have a second job, part of that "moonlighting" income can be sheltered from tax—even if you are already covered by a pension or retirement plan at your regular place of employment.

For details on how you can benefit, call or visit a BB&L savings officer. And do it soon to get full advantage of the tax savings for this year.  
Telephone 779-2800

The Keogh Act (H.R. 10) provides for tax-sheltered savings (and no taxes on that account's earnings prior to retirement) for secondary income.

Secondary income covered under this program includes consulting fees, director's fees, royalties from a book, part-time work from home (such as photography, painting, auto repair, etc.) — virtually any income derived from the performance of a service.
