### McIntosh becomes newest Army general

Carl McIntosh, Waco-based professional engineer, became the nation's newest Army general Saturday in promotion ceremonies at the Army Reserve's 420th Engineer Brigade headquarters here.

Brigadier General McIntosh, who took command of the 420th five months ago, was presented the stars of his new rank by Maj. Gen. Donald Rattan, deputy commander of 5th Army and commander of Army Readiness Region VII.

McIntosh has been an active Reservist for 30 years. He first saw military duty in 1945 as an enlisted man, when he left Texas A&M University after his freshman year to enlist for the nation's war effort.

War's end found McIntosh back at Texas A&M to complete a mechanical engineering degree in 1948.

McIntosh, who succeeds retired Brigadier General O.D. Butler as commander of the 4,000-man Army Reserve unit, lives with his wife, Janis, at 4824 Pecan Terrace in Waco.

### Chemistry professor to receive Yale medal

Dr. F. Albert Cotton, Robert A. Welch Distinguished Professor of Chemistry at Texas A&M University, will receive the Kirkwood Medal next month from Yale University and the New Haven Society of the American Chemical Society.

The prestigious award is presented approximately every other year for research contributions in the physical sciences. Five of the medal's nine recipients have later become winners of the Nobel Prize.

Cotton, considered one of the top inorganic chemists in the world, came to Texas A&M in 1972 from Massachusetts Institute of Technology where he was Dreyfus Professor of Chemistry.

The Kirkwood medal is the latest in a long list of awards Cotton has received. Earlier ones include the Baekeland Medal in 1962, the Pauling Medal in 1976, as well as numerous other prizes from ACS sections and regional groups.

Cotton has had more than 500 papers published, served as a

guest lecturer at dozens of institutions here and abroad and has written several textbooks. One of these, "Advanced Inorganic Chemistry," has had three English editions and nine foreign language translations.

### Stephenson heads campus news service

Lane Stephenson has been appointed director of the University News Service at Texas A&M, said Dr. Jarvis E. Miller, president.

Stephenson, succeeding Jim Lindsey who retired Feb. 1, joined Texas A&M as assistant director in 1966 and was named assistant to the chancellor for public information last fall.

The former Dallas resident served as a public relations representative for Braniff International before joining Texas A&M and was a reporter for the Tyler Courier-Times and Morning Telegraph earlier in his career. He holds an undergraduate degree in journalism from North Texas State University and a master's in English from Texas A&M.

### PACK'S PLASTER AND CERAMICS

One of the largest selections of plaster in Texas. Art supplies, ornamental concrete and candles.

Tues., Wed., Thurs. 1 p.m.-9 p.m.  
Saturday 10 a.m.-5 p.m.  
Sunday 2 p.m.-5 p.m.

FM 2223, Old Wheelock Road (off Tabor Road)

## Consol contract dropped

By BETH CALHOUN

The board agreed to let local contractors submit proposals within the allocated budget. These will be presented to the board building committee for consideration.

The board will choose one of proposals and ask for bids to be submitted on the proposal.

Once a proposal is accepted, the plans for the project will be drawn up by another architect.

In related action, the energy committee's motion to adopt a boiler and distribution system for heating failed on a 3-3 vote.

The system would have been for the new fifth and sixth grade facility

and a vocational building at the high school.

This system would have allowed the school to change from one fuel to another if prices became too high. The current fueling system uses gas. While the new boiler would also have used gas, it would have enabled the school to change to solar energy if a world system is developed.

Converting to the new system was estimated at \$58,000 more than originally allocated.

In closed session the board extended the one-year contract of principals and vice-principals to two years.

# CASH RESERVE

All you do is write a check.

At most banks the procedure for getting a loan is pretty simple: All you need to do is call for an appointment, drive to the bank, see a loan officer (after a short wait), explain your plans, complete some paperwork, etc.

The procedure for a Bank of A&M Cash Reserve customer is even simpler: All you do is write a check.

Cash Reserve is a pre-arranged line of credit for Bank of A&M customers. It's easy to qualify for, and the credit you establish is yours to use on a revolving basis over and over.

No gimmicks. And absolutely no cost — until you write yourself a loan. And the best part: repayment is automatically deducted from your checking account monthly (at terms and amounts you authorize in advance). No coupon books, no late payment fees.

For cash reserve checking, see the Bank of A&M. We're more than a bank because you're more than a customer.
