

Robert Boone featured 'Elijah' to be performed

The presentation of Felix Mendelssohn's "Elijah" Tuesday and Wednesday at Texas A&M University will feature Robert L. Boone, director of Texas A&M's Singing Cadets.

Boone will sing the feature role Elijah of the oratorio based on the Bible's Old Testament prophet. Sponsored by the Memorial Student Center Arts Committee, it will be presented at 8 p.m. each night in the Rudder Theater.

The master work performance also combines efforts of the 86-voice Century Singers and the 43-member Bryan-College Station Chamber Orchestra.

A bass baritone, Boone brings talents to Elijah that have been presented on radio and television and in serious musical works. He is known for performance of spirituals and popular pieces with the Singing Cadets.

Boone's previous work has included oratorios, selections from masses and operatic pieces. He has

performed in Handel's "Messiah" here and in Houston.

Margaret McArthur directs the Century Singers, mixed chorus of Texas A&M students. Dr. Johnson has worked with the local orchestra several years and is a member of the Sam Houston State music faculty.

Tickets to "Elijah," at \$1 per student and \$1.50 for others, are now on sale at the Rudder Center box office.

PERSONAL ELECTRONIC

The TI-57. The super slide-rule that'll get you into programming... fast and easy.

Even if you've never programmed before.

For the student who requires slide-rule functions, the TI-57 delivers an exceptional combination of advanced mathematical and statistical capabilities. From functions such as trig, logs, powers, roots and reciprocals... to mean, variance, standard deviation and much more.

And as long as you're in the market for a super slide-rule calculator, why not buy one that can also put the power, speed and convenience of programming at your disposal? Programming a calculator simply means giving it a logical set of instructions for accomplishing what you want it to do. Programming enables you to solve lengthy and repetitive problems quickly by substituting new variables into the set of instructions which you have already entered into the machine. The end result is more efficient use of your time in problem-solving.

All this and more is explained in our unique, illustrated, easy-to-follow guidebook, "Making Tracks Into Programming." This 200-page book comes with the TI-57. It contains simple, step-by-step instructions and examples to help you quickly learn to use programming functions to make your problem-solving faster, more accurate and fun.
