USC has Aggies' number, win Olsen opener 5-2

By DERRICK GRUBBS
The Texas A&M baseball team finally got to play a game in its new \$2 million stadium Tuesday and in doing so, dropped a 5-2 decision to nationally-ranked Southern California.

C.E. "Pat" Olsen Field was officially dedicated in ceremonies at home plate preceding the game between the Aggies and the Trojans.

Pat Olsen, a 1923 graduate and former baseball player at A&M — the man for whom the facility is named — threw out the first ball from the pitcher's mound as a highlight to the ceremonies.

The Aggies faced one of the premier pitchers in college baseball in sophomore lefthander Bill Bordley. Bordley was 14-0 for USC as a freshman last year to become the first Trojan pitcher to go undefeated in a season, a feat not even accomplished by former USC hurlers Tom Seaver, Bill Busby, or Bill Lee, all of whom are now pitching in the major leagues.

Bordley ran his 1978 season record to 4-0 in holding A&M to just four hits through nine innings on the mound.

The Trojans scored first on a two-run homer by rightfielder Keith Brown in the top of the first.

The Aggies narrowed the margin to 2-1 in the second on a solo home run by first baseman Kyle Hawthorne. It was Hawthorne's eighth four-bagger of the season, leaving him just one shy of the A&M school record.

USC scored two more in the fifth when first baseman Dave Hostetler walked, moved to second on a fielder's choice grounder by third baseman Dave Engle, and scored on a single by designated hitter Gerald Price. A sacrifice fly by John Wells scored Engle for the Trojans' fourth run of the day.

A&M scored its only other run in the bottom of the fifth when leftfielder Gary Bryant led off with a single, went to second on a throwing error by Bordley, and advanced to third on a wild pitch. He scored when shortstop Robert Bonner lofted a sacrifice fly to right.

The Trojans scored the final tally in the eighth when Wells singled, stole second, and scored on a throwing error by second baseman Randy Woodruff on an attempted double-play throw to first.

Aggie starter David Pieczynski had a shaky start as he gave up three bases on balls and the home run in the first inning, but settled down to retire USC in order over the next three innings.

He gave up two runs in the fifth, however, which prompted A&M coach Tom Chandler to bring in junior Mark Ross to pitch the final four frames.

Pieczynski got the loss, dropping his season record to 2-3.

Bordley struck out six in recording his 18th consecutive win without a loss as a Trojan.

The Aggies produced four hits, one each by Bonner, Hawthorne, Bryant, and third baseman Robert Verde.

USC got only five hits off Pieczynski and Ross, led by Brown who was 2-for-3 including the round-tripper in the first which was his third of the season.

A&M drops to 16-7 on the year while USC upped its season slate to 15-4.

This afternoon, the Aggies host Minnesota in a 1 p.m. game, at Olsen Field, followed by a rematch with USC at 3 p.m.

Today's three-team doubleheader will be highlighted by the presence of three of the top college baseball coaches in the nation. A&M's Tom Chandler, USC's Rod Dedeaux, and Minnesota's Dick "Chief" Siebert have 88 years of combined college coaching experience between them. All three are members of the American Association of College Baseball Coaches Hall of Fame.

The starting pitchers for A&M in the twinbill will be freshmen Perry Swanson (2-0) and Rodney Hodde (1-1).

A long afternoon
A&M pitcher David Pieczynski had a long afternoon against the USC Trojans. The senior from Richardson yielded five runs in five innings as the Ags lost to the Trojans 5-2.

Aggie notes and quotes

The Texas Aggies open spring football training Tuesday afternoon, March 28 and will finish with the Maroon-White game at 7 p.m., Saturday, April 22.

The Aggies will work at 4:30 p.m. Tuesdays through Fridays and Saturday's scrimmage times will be determined each week.

The Aggies lost 12 lettermen from last year's 8-4 club. They return 45 lettermen, 42 from last year's squad and three who won letters in 1976.

There will be a gigantic track extravaganza when the Texas A&M Relays are held at Kyle Field Saturday. There are 22 teams entered in the university division and 32 high school teams in the third annual women's invitational meet.

The university division has a very strong field including defending A&M Relays champion Texas A&M, defending Texas state champion Texas Women's University, 1976 national champion Prairie View A&M, the University of Wisconsin which finished 10th nationally last year, Oklahoma State, Oklahoma and Florida State. Other university teams are Texas, UT-El Paso, UT-Arlington, West Texas State, North Texas State, Tarleton State, Stephen F. Austin, Houston, Texas Tech, Texas Lutheran, East Texas State, Southwest Texas State, Texas Southern, Lamar and Texas A&I.

The university field events will start at 9 a.m. with the high school events at 11 a.m. Preliminaries in the running events will begin at 9 a.m. The finals in the running events in both divisions will start at 6 p.m.

Texas A&M's Linda Cornelius posted the top USA score in the team pentathlon between the United States and Canada held in Colorado Springs. The Aggie junior was third overall.

On the way to a score of 1842, Cornelius set a new and USA indoor pentathlon record with an 8.5 in the meter hurdles. She will be competing for A&M in the Texas A&M Relays Saturday in Kyle Field.

The Texas A&M women's golf team finished ninth for ninth place in the Betsy Rawls Invitational Tournament in Austin last weekend. A&M had 976.

Individually for the Aggies, Kim Bauer had 230, Aguilera 240, Betty Ghio 245, Carol Berry 257, Andrea Welch 285. The next competition for the team will be in the Lady Paladins Invitational in Greenville, S.C., March 30 through April 1.

Texas A&M women's tennis coach Ellen Buchanan has announced the signing of Pam Hill, one of the top high school players in the nation. Hill has won the straight Class AAA state singles titles at Beaumont, South Park and has held USTA ranking since the age of 14. She had a 36-1 match record as a junior and is Speedy this season. She has also been all-state three years in volleyball. She is due to graduate at the top of her class and is president of The National Honor Society.

"I'm thrilled that Pam has decided to attend Texas A&M," Buchanan said. "She is an accomplished athlete and will play a strong part in helping A&M develop a national calibre team."

"We are very pleased to have an outstanding athlete said Kay Don, Assistant Director for Women's Athletics, will definitely be a fine asset."

Hill will compete in the Texas Sectionals this summer and will play in the Maureen Connally Brierley Tournament as well as other national tournaments.

Join TI in MOS Engineering.

In Houston, you've got the Gulf for a playground.

You can cruise up the coast to New Orleans or down the coast to Mexico. Or you can play in your own port — on the water or on the town. Houston is Big City in size and sophistication. Except for New York, it's the only U.S. city that has fully professional companies in all four of the performing arts. The cost of living is well below the national urban average. And there is no state income tax.

... and a green light.

We give you the Gulf...

At TI—Houston, you'll work with industry-leading products.

High-density MOS memories; 16k RAMS and EPROMS; and 16-bit microprocessors and minicomputers. You'll get to prove how good you are working with a broad scope of job opportunities with MOS semiconductor memories and microprocessors—the latest LSI devices.

Your technical expertise will address a wide range of applications: computers; automobiles; appliances; industrial controls; toys; and many others.

MOS Microprocessor Design Engineers

Member of a design team responsible for specification, design, and testing of MOS microprocessors and microprocessor peripheral devices. Will be responsible for MOS

system, logic and circuit design, planning and supervision of chip layout, development of test programs, device testing, and characterization.

MOS Microprocessor Systems Engineers

Responsible for the specification, design and programming of microprocessor-based systems from concept through production.

Product Engineers

Work with a team of process engineers, device and system designers, and production personnel to implement new products into production and into the market. Quickly assume responsibility for test generation, yield improvement, cost reduction, and device characterization of MOS LSI devices.

Product Marketing Engineers

Handle all product marketing responsibilities for geographic area

for MOS memory or microprocessor products. Provide customer presentations, proposals, spec evaluations, and price and delivery negotiations. Develop penetration programs for market area and coordinate resources to pursue.

Applications Engineers

Apply microprocessors and/or memories to systems designs. Basic design requirements include digital, analog, and systems programming from concept to prototype debug.

Each of the above requires a BS in EE or CS. If you qualify for any of the above positions, please indicate "MOS Engineering" on your resume and send it to: Staffing Manager/P.O. Box 1443, M.S. 605/Houston, TX 77001.
