SENIOR RING ORDERING PROCEDURE For Students Completing 92 Hours at the End of the Spring '78 Semester
To be eligible to order the Texas A&M Senior Class Ring, an undergraduate student must have at least ninety-two (92) semester hours, with 30 hours at A&M and be in good standing with the University. To order at mid-semester using mid-semester grades to fulfill the above requirements, please note the following instructions:
1. Leave your name, major and I.D. number with the Ring Clerk, Heaton Building, prior to Spring Break if possible, or at least one week in advance of ordering. This may not be done by phone.
2. Bring Mid-Semester Grade Report along when ready to order to verify passing hours.
3. Anyone having failed to leave their name in advance and fail to bring their Mid-Semester Grade Report along when ready to order will be asked to return later to allow time for records to be checked.
4. All rings must be paid for in full when the order is placed. Senior Ring Loans are available through Student Financial Aid in the YMCA Building.
5. Mid-Semester orders will be taken only from March 22nd until April 28th, 1978.
6. Students who do not place their order during this period may order after final grades are posted. (Whenever 92 hours have been completed and are on record, there is never a dead-line, except a monthly mailing date on which we send orders to the factory).
7. The Ring Clerk is on duty from 8 a.m. to 5 p.m. each day, Monday through Friday. However, in order for other duties to be carried out, absolutely no orders will be taken between 11:30 a.m. - 1:00 p.m. or between 4:00 - 5:00 p.m.
8. All rings ordered, regardless of whether on March 22nd or April 28th, will be delivered on the same day which will be approximately June 29, 1978.

Dr. Charles Miller, a Texas A&M University plant scientist, examines the desert plant jojoba (ho-ho-ba).

Plant will save what

EDITOR'S NOTE: This is the first of a three-part series.
Deep in the Southwest desert regions grows a life-giving plant that may one day save thousands of endangered whales.
The plant does not produce medicine. It produces oil — oil so similar to sperm whale oil already been tabbed by many officials as an effective treatment for the whale oil.
Known as jojoba (ho-ho-ba), plants' oil sells today on the market for \$5 a pound.
Dr. Dan Bragg, an economist at Texas A&M University, predicts jojoba will be a new strain of oil-producing plants to be cultivated on a large scale. The new agricultural product is called "petroculture."
"Jojoba produces a wax identical to sperm whale oil," Bragg reports, "and was one of the components of lubricating oil by a million pounds of sperm whale oil were imported by the United States each year."
When the sperm whale oil was declared an endangered species in 1971, all importation of the oil stopped, Bragg said. Industries since been pressured to develop synthetic substitute because of the high expense with performance most insatiable.
Jojoba grows wild in the deserts of Arizona, California and Mexico. Commercial production has been hampered on Indian reservations in California and Arizona, and some small plantings do exist in Texas.
NEXT: Growing Plants to Whales.
