

Bugs still problem on campus

By DANA CARDINAL
Move out before the bugs move in. If a dorm room becomes infested with bugs, dorm residents can move all their belongings out and exterminators spray with insecticide.

E.C. Oates, safety and maintenance supervisor, said that roaches, ants and crickets are the major problem. "Insecticide is applied three times a year routinely," Oates said. Exterminators spray before the fall semester, around Christmas, during spring break, and sometimes after the spring semester.

Oates attributes the problem to food scraps and bad sanitary conditions. "All the fighting you do will not be effective if you don't get rid of the food," he said.

Oates said that he hopes students take care of their rooms and will inform the resident adviser if they see a need for an exterminator.

L.R. Johnson, associate director of custodial services, attributed problems to various causes.

"The major reasons for bug problems are food, grease, and drink machines," he said. "Also, the climate contributes to the cockroach problem."

"Bugs are less of a problem as years go on," Johnson said. "Our program of scheduled inspection and treatment has been a contributing factor."

"We spray the areas where the complaints originate and any adjoining areas that are infested," Johnson said.

Custodians are responsible for dorm room interiors and building perimeters. The grounds maintenance department cares for the area outside the building perimeter.

Options for handling the insect problem are spraying insecticide or using roach hives, a cardboard trap with bait.

"We use the USDA approved insecticide for the particular application," Johnson said.

Summer School is for YOU... at Lamar University!

Who wouldn't want those extra college hours when next fall comes around! Register NOW for summer. Deadline for Session I is May 29, and for Session II, July 6. For further information, contact Elmer Rode at (713) 838-7610, P. O. Box 10009, LU Station, Beaumont, Texas 77710.

Lamar University... growing with the community.

MODEL SP-3000

TWO-WAY HIGH FIDELITY SPEAKER SYSTEM FEATURING THE SHARP TRI-BASS ACCELERATOR

- Tri-Bass accelerator increases speaker efficiency and reduces distortion while increasing low bass output.
- Sophisticated 8" woofer for good bass propagation and excellent power handling.
- Special 3" wideband tweeter assures smooth, extended highs with excellent dispersion characteristics for good stereo imaging.
- Newly designed filter network assures equal energy response over entire musical spectrum.
- Sturdy enclosure to reduce spurious resonances. Exterior is simulated wood grain vinyl on wood product material.
- Elegant appearance and finish.
- Size: 24-7/8" x 15" x 9-1/2"
- CTN./Unit Weight: 2/50-lbs.

REG. \$69.97 PAIR

\$96.88

THE TOWER-1

A UNIQUE FLOOR STANDING HIGH FIDELITY SPEAKER SYSTEM WITH EXCEPTIONAL FREQUENCY RESPONSE FEATURING THE SHARP TRI-BASS ACCELERATOR

- Double driver bass section (Two 8" woofers) produces exceptional bass response with very low distortion.
- Special 3" wideband tweeter extends high frequency response to beyond audibility.
- Newly designed filter network assures equal energy response over entire musical spectrum.
- Cabinet is sturdily constructed to reduce spurious resonances. Exterior is simulated wood grain vinyl on wood product material.
- Tower design takes up very little floor space simplifying speaker placement.
- Tri-Bass Accelerator increases speaker efficiency and reduces distortion while increasing low bass output.
- Size: 31-3/8" x 11-7/8" x 11-7/8"
- CTN./Unit Weight: 1/35-lbs.
