**Attention: All Freshman and Transfer Students**

MSC Town Hall will be accepting applications for membership to the committee on September 11 through September 15 with interviews the following week. Information and applications available in Room 216, Memorial Student Center.

Let a TI calculator help you make more efficient use of your time. This semester... and for years to come.

**Now, more affordable than ever!**

**TI-57 New low price:**

**\$60.00\***  
**PLUS for a limited time a \$5.00 rebate with the purchase of a TI-57.**

The TI Programmable 57 is a powerful slide rule calculator with statistics and decision making capabilities to help solve repetitive problems... quickly and accurately.

Powerful program memory stores 50 fully-merged steps for up to 150 keystrokes. Computer-like functions include editing, branching, subroutines, and more. Slide rule capabilities include functions of x, as well as log, trig, and statistical functions. Comes complete with an easy-to-follow learning guide. With its new, low price and limited time \$5.00 rebate, the TI Programmable 57 offers an unsurpassed value. Act now to take advantage of this outstanding offer.

**The MBA New low price: \$70.00\***

Do business and financial classwork quickly with this powerful calculator.

For business administration, financial analysis and planning, real estate management, investment analysis, and more. The MBA's financial functions include net present value and internal rate of return for variable cash flows. Payment, present and future value, number of periods for annuities. Also, days between dates, and direct solution of yield for bonds and mortgages. Statistical functions include mean, variance, and standard deviation at the touch of a key. Built-in linear regression. Simple programmability lets the MBA remember a sequence of up to 32 keystrokes.

The MBA comes with a valuable book, *Calculator Analysis for Business and Finance*. Shows you how to apply the power of your MBA to business and financial decision making. At its new, low price, the MBA presents an exceptional value to the business student. See it today.

**Carrels have dual purpose**

Some Texas A&M University students have been cramming already by living in residence halls. Twenty-two men were rooming in study carrels of the Commons dormitories Wednesday, said Glenn Sasse, area coordinator for Commons. This is due to an over assignment of men to rooms. David Bruce is a resident of year dormitory and has two roommates. Bruce says that having people in a room designed for one makes it difficult to study. One problem is that there are only two desks.

their housing applications. "I think that they should be prepared for something like this," Bruce said. Ron Sasse, associate director of Student Affairs, said that three factors caused the overcrowding in men's residence halls: more returning men, fewer men cancelling dorm reservations, and more freshmen signing up for residence halls. "We're trying to get everybody out of a three-to-a-room situation," Sasse said. He added that having two men living in a study carrel is preferable to having three in a room. Sasse said that the only carrels being used as places of residence are located in Aston.

"We're using 13 out of the 20 in Aston for assignments until we can get regular room spaces," Sasse said. Joe Austin and John Herrmann are residents of Aston carrel 373. The carrel comes complete with a dresser, bunk-beds, and brown paper covering the windows to the hall. Austin said that carrel 373 is an improvement over Lounge B, located near Crocker, where he was housed before moving into the

Commons. In the lounge, there were 15 to 20 men in the same room, and the carrel only has two. "You couldn't get any studying done," Austin added. He said that there was always someone coming or going. Herrmann said that the carrel doesn't have any closet space, but it does have plenty of desks. "Moving out of the Commons would be a mistake," Herrmann said. He prefers the carrel to moving to a lounge of a residence hall, or a residence hall outside the Commons.

Both Austin and Herrmann find the carrel a good place to study because it has carpeting on the walls, which deadens sound. They both said that the lighting in the carrel was better than other rooms in Aston. "They're messing with our grades," Herrmann said. "They should be more sure before they promise a room."

Sasse said that one of the married student housing buildings is being used to place male students until rooms are available. The end of the men's housing problem depends on the number of cancellations. Sasse said that as soon as someone withdraws, the vacant space is filled.

Besides the lack of desks, there is only closet space for two. This forces one person to leave his clothes out, which makes it difficult to move around the room, Bruce added. Bruce said having three people in his room is a hassle, and said he believes the university should have a place for students after accepting
