

# "I'VE COVERED A LOT OF MILES . . ."

"For the last few months I've been traveling throughout Brazos County and visiting with as many people as possible. To me, meeting the citizens of the county is important, because I strongly believe that our County Judge should be a people-oriented person. I've found that the majority of those I've met think that elected officials must communicate more with their constituency. . . that too many hide behind closed doors and make decisions without consulting the people who will be affected.

"Both in my personal meetings with voters and in my campaign advertising, I've stressed that I plan to be a strong County Judge and an effective County Judge, but I also will be open and accessible to the citizens of Brazos County. The County Judge must be that kind of person—an effective administrator, a man with ideas, a hard worker, and someone who realizes that day-in and day-out he is working on behalf of the citizens—all of them.

"I've discussed the issues during the campaign. I've talked about the need to eliminate the duplication of services by city and county governments that is costing tax dollars. I've spoken out about the need for a uniform fire protection policy, and about creating a healthy climate for economic growth in Brazos County. And about protecting and enhancing the quality of life that we enjoy.

"In my meetings with you it has been clear that my personal beliefs and philosophy are similar to those of the majority of the people in this county. I am a Christian and a conservative. I have the same fears about too much government and ineffective government that you do. I share your concern about taxation and the wasting of government money. I have a home and a business in the county, and I'm raising my family here. I'm affected by the decisions our county government makes as much as anyone. I want to have a hand in making those decisions, with input from all concerned.

"I'm asking for your vote Tuesday because I know I can be an effective administrator of county affairs. I have ideas for improvements in county government and a desire to make the Brazos County of the future a healthy place to live for all of us."

John Raney  
Candidate for Brazos  
County Judge

**John Raney has the desire and ability to be  
our Brazos County Judge. Let's elect him  
November 7.**

# JOHN RANEY

## The Wise Choice for Brazos County Judge

Political advertisement paid for by John Raney for County Judge Committee, Jacob Beal and Dr. James I. Lindsay, M.D., co-chairmen, Mrs. Katy Kowierschke, treasurer, 2315 Bristol, Bryan, Texas.

## Heat may slow rate of cancer

United Press International  
LOS ANGELES—Tests indicate heat, under some conditions, can prevent the spread of cancer, a New York researcher told a meeting of the American Society of Therapeutic Radiologists Friday.

The tests, called clinical hyperthermia, apply hot water or microwaves to the tumor area, usually before and after radiation therapy, said Dr. Eric W. Hahn of Memorial Sloan Kettering Cancer Center in New York.

He said the tests were conducted on both humans and mice to learn whether heat spreads cancer cells.

"Quite the contrary," Hahn said. "Not only did hyperthermia by itself have no adverse effect, but heat alone actually prevented metastasis (spread) under certain circumstances.

"In addition, radiation alone was effective in preventing metastatic spread and was most effective when combined with local tumor hyperthermia."
