## Firemen, police visit council

Members of Bryan's police and fire forces got what they asked for when they visited the City Council Monday night — placement of a civil service act on the April 7 ballot. Wayne Gibson is one of three councilmen whose term expires this year. See page 5.

## Industrial declared

# Davis on bond

**United Press International**  
DUSTON — A district judge Monday declared a mistrial in the murder-for-hire trial of T. Cullen Davis and within minutes the Fort Worth millionaire posted \$100,000 bond in cash and walked away from the jail, arm-in-arm with his mistress, 45, charged with paying an FBI informant \$25,000 to arrange the murder of his ex-wife's lover, Joe Bonomo, in his divorce case. Joe Bonomo smiled and waved as he left the courtroom. "I'm glad to be out. That's the main reason I'm going skiing, pretty soon, but I might not," he said. District Judge Wallace Moore ordered a mistrial after jurors, who had heard 11 days of testimony and deliberated 43 hours, insisted they could not resolve the case. They said they had voted 14 to 10 that the vote was eight to four in favor of a conviction. They would not say which way the vote was split.

Davis, 45, partner with his brother in a \$1-billion industrial empire headquartered in Fort Worth, was acquitted in 1977 of the murder of his stepdaughter, Andrea Bonomo, during a sensational murder trial in 1977. Davis was also accused of murdering his estranged wife's lover, Stan Bonomo, and wounding his wife and a family friend, Cecilia Davis, who still lives in the Fort Worth mansion Davis built for her.

she put flowers on the graves of her daughter and lover earlier Monday. "Today was Andrea and Stan's birthday," said Mrs. Davis.

In the Amarillo murder trial, Haynes argued Mrs. Davis named her husband as the assailant even though she was not sure who shot her. In the Houston murder-for-hire trial, Haynes argued Mrs. Davis and her friends conspired to frame Davis. "I think (Davis) is a very dangerous person," she said. "The only way he's changed since we separated is he's gotten meaner. I made the statement after the verdict in Amarillo that he would try again and I was right."

"It's incredible. I think this time there is more than enough evidence. There is a problem with Haynes dragging things out and I knew that. Haynes has two long suits: he drags things out and tries to divert people's attention to smut that has nothing to do with it."

Jury foreman Mary Carter, 47, a medical secretary, said the jurors were fair and worked hard and conscientiously. Jurors contacted by UPI said they felt evidence against Davis — particularly audio and video tapes of meetings with the FBI informant — was strong, but some said other testimony undermined the tapes.

(Please see Jury, page 7.)

# Fund for profs — \$17 million goal

A&M University officials have announced plans for a \$17 million fund campaign to endow academic chairs and professorships. The initial goal is at least one endowed chair in each of the university's 10 academic or professional colleges and at least one endowed professorship in each of the academic departments, said Dr. Jarvis Miller, Texas A&M president.

These endowments are the top priority development program," Miller said. "We have, we feel, put together one of the most endowed scholarship programs in the nation and it has been instrumental in bringing top academic students to the university."

"We must concentrate on retaining and attracting outstanding scholars who challenge and stimulate our brightest students. Chairs and professorships are the resources and prestige to attract or retain outstanding faculty," he said.

A&M currently has one chair and 10 professorships, Miller said. Robert L. Walker, vice president for development, said a minimum of \$500,000 endow a chair and a minimum of \$100,000 endow a professorship. Walker reported several commitments ending for chairs and professorships established through trusts, wills, and with retained life income and gifts to current gifts.

This is an exciting long-term program, one with potential far beyond our initial \$17 million goal, and we expect it will especially interest individuals considering estate planning," Walker said. It very effectively supports Texas A&M's academic excellence goals.

Walker expects contributions from alumni, friends of the university, businesses, corporations and private foundations. The chairs and professorships can be named to honor individuals, companies or foundations, he said.

The Robert A. Welch Foundation of Houston endowed a chair in chemistry 15 years ago.

The university has recently received funding for the following endowed professorships: the Dresser Industries Professorship in Business Administration and Engineering, from the Dresser Industries Foundation, Dallas and the E.D. Brockett Professorship in Business, Engineering and Geosciences, from the Gulf Oil Foundation honoring the corporation's former chairman and chief executive officer.

Also, the Roy B. Davis Cooperative Agriculture Professorship, from friends honoring the Lubbock agricultural leader; the T. A. Dietz Memorial Professorship in Mechanical Engineering, from the Gulf Oil Corp.; and the Joseph H. Shelton Professorship in Medicine, from his son, Robert Shelton of Houston.

Norman Moser, left, and Royce Wisenbaker chat just before being sworn in as members of the Texas A&M University System Board of Regents.

Regents. Clyde Wells, reappointed for his fourth six-year term, listens in.

# Regents hear San Antonio plans

By LIZ NEWLIN  
Battalion Staff

Committees of the Texas A&M System Board of Regents approved two extension projects Monday — one in San Antonio, U.S.A., and one in Kataka, Liberia.

The board's committee for service units voted to accept 260 acres in land gifts in San Antonio on which to build a vocational training school.

The committee for academic campuses approved an agreement for Prairie View A&M University to assist the Republic of Liberia in upgrading a technical high school in the African country. Prairie View A&M helped in development of the school, the Booker Washington Institute, from 1955 to 1961.

The full board was scheduled this morning to approve or disapprove this and other committee action from Monday. They also were to announce the newly-elected chairman of the board and committee assignments.

Although Clyde Wells, who has been chairman of the board 10 years, was reappointed by Gov. Briscoe, the regents had the option to elect a new chairman during the executive session Monday afternoon.

The two new regents and Wells were sworn in Monday. State Sen. Bill Moore, D-Bryan, gave the oath to Wells, Norman

Moser of DeKalb and Royce Wisenbaker of Tyler.

Moore is dean of the Texas Senate and as chairman of the Senate State Affairs Committee is one of the most influential members of the Legislature. He is also an Aggie.

For the first time the ceremony was on campus. Usually it's in the governor's office in Austin.

Moore said little during the ceremony except that the men were on Briscoe's final list of six potential regents.

Several other state representatives and senators from the regents' home districts also attended.

Following their usual pattern, the regents were scheduled today to vote on recommendations made by the board's committees. Generally the full board follows the suggestion of a committee.

Any disagreement over proposals usually occurs at the committee meetings on Mondays, when regents who are not members of the called committee often attend the session.

Yesterday afternoon the most heated discussion concerned expansion of the Central Texas Regional Training Center in San Antonio. The Texas Engineering Extension Service (TEEX), a part of the Texas A&M System, has administered the training center since last January. During the summer the regents

were offered land by groups in San Antonio for construction of a new regional training facility. They did not accept the land then, and the board was split over whether Texas A&M should continue in that direction — teaching vocational skills or other subjects that junior colleges usually offer.

At the meeting Monday, Regent Alfred Davies of Dallas objected to the San Antonio Center because, he said, the local junior college should be teaching those courses.

"Why should we go in and be big papa," he said, when a junior college exists and when rural areas still need the extension service. He said the center would duplicate courses already offered in the area.

Chancellor Jack K. Williams and Texas A&M President Jarvis Miller defended the center, saying that San Antonio Junior College had dropped the center and asked the system to administer it.

"The junior colleges refused to offer the skills program," Williams said. "They had first chance at it."

James Bradley, director of the Texas Engineering Extension Service, said that it was his practice to stop teaching courses when local colleges offer them.

The order approved by the committee states that the Coordinating Board and institutions in San Antonio have been

assured that the programs "will not duplicate existing programs and will not depart from the published role of the Texas Engineering Extension Service."

The 260 acres of land offered comes from three sources: the Southeast Development Foundation, 30 acres; H.B. Zachry, 30 acres or \$100,000; and the Bexar County Commissioners, 200 acres. The Zachry land is several miles from the other two parcels, which are at the intersection of IH 37 and Loop 410 in south San Antonio.

After the vote, Davies, who chairs the committee, continued his objection.

Another regent, John Blocker of Houston, was also concerned that the system was taking on additional, unnecessary duties.

"We need to decide where we're taking this school," he said. President Miller suggested that the regents visit the San Antonio facility and set aside some time in a future meeting to consider the role of the TEEX. They agreed.

Reportedly, the regents also discussed tenure and promotion of faculty in executive committee and "had no questions" about any of the 90 professors up for tenure or 88 promotions. Other business during the Monday meetings including building contracts, a new option in "engineering geology" at Texas A&M and the system investment policy.

# Texas ex-felon voter system upheld

United Press International

WASHINGTON — The Supreme Court Monday let stand Texas' system of granting ex-felons convicted in state courts the right to vote but denying that privilege to persons convicted of felonies in federal courts or those of other states.

The justices turned down appeals by a Texas couple convicted on federal felony counts of lower-court rulings that upheld their disenfranchisement — denial of their right to vote.

The couple, Claude and Eva Shepherd, were convicted in federal district court. Claude Shepherd, 56, was found guilty of smuggling liquor and received an 18-month suspended sentence and five years probation. Eva Shepherd, 65, was convicted of misappropriating postal funds

and placed on five years probation.

Each was discharged early from probation for good behavior, but in 1975 their voter certificates were canceled.

The Shepherds filed a class action suit, seeking to regain their right to vote, against the Hidalgo County voting registrar, the county chief deputy of voter registration and the Texas secretary of state, the state's chief election officer.

The Texas Constitution denies the right to vote to all convicted felons but permits some exceptions, which, under the Texas election code, include "those restored to full citizenship and right of suffrage or

pardoned." Under the state criminal procedure law, former felons convicted in state court who have successfully completed probation may have their citizenship — including voting rights — restored.

The Shepherds claimed this law, which provides no mechanism for successful felony probationers from federal or other state systems to regain the vote, denies them equal treatment under the law because they were "permanently and unconditionally" denied the right to vote.

The federal district court dismissed their suit and the 5th U.S. Circuit Court of

Appeals affirmed, saying the Texas scheme was "rationally related" to the state's interest in limiting the franchise to responsible voters. A three-judge panel noted that the court in which a person is convicted is "in a particularly advantageous position to gauge the progress and rehabilitation of a convicted felon."

The couple appealed to the Supreme Court, saying that Texas' system is arbitrary because it denies or restores the right to vote on "a wholly arbitrary basis, having no relation to the gravity of the crime charged or the circumstances under which it was committed."

# Parking, grass — 'volatile' issues to be heard by student senate

By DILLARD STONE  
Battalion Staff

Two perpetually volatile issues — the Memorial Student Center grass and on-campus parking — will be considered at Wednesday's Texas A&M University student senate meeting.

Whatever decisions are reached on the two proposals, the outcomes are certain to disturb a significant number of students.

One bill asks the University officially to recognize the grass surrounding the MSC as a "living memorial" to Aggies who have given their lives in defense of the United States.

The bill recommends that shrubbery be planted around the entire perimeter of University Center grounds, although only the grass surrounding the MSC would be memorialized.

J.C. Colton, vice president for academic affairs and co-author of the bill, says that officially recognizing the MSC grass as a memorial is the bill's basic intent. Long-standing tradition is the main reason, he said.

"We've been able to talk with people from as far back as 1955 who remembered the grass as a traditional memorial," said Wayne Morrison, vice president for finance, and the bill's other author.

Tradition holds that the grass is a memorial.

However, many students don't share this point of view. As a result, several conflicts have occurred in recent years between those who view the grass as a memorial and those who don't.

Colton said opposition to the proposal is from two major groups — those who don't think of the grass as a memorial, and those who don't recognize Texas A&M's traditions at all.

"There are lots of people coming into this University with different ideas. Can we traditionalists coexist in a time of progress vs. tradition?" he asked. "I don't

know."

Preserving the aesthetic value of the grounds is another of Colton's motivations in presenting the bill.

"We've always had comments made to us about how beautiful our grounds are compared to other universities," he said. Grounds get torn up through student use, he added, especially with the heavy clay type of soil prevalent on campus.

The parking bill, submitted by Brian Gross and Steve Hageman, suggests several changes in the on-campus parking regulations for male dormitory students.

Under the bill, all freshmen and sophomore males would be classified as "underclassmen," while juniors and

seniors would receive "upperclassmen" designations.

Underclassmen would be required to park across the railroad tracks on the West Campus.

Currently, sophomores are included with juniors and seniors in the upperclass category, and only freshmen are required to park across the tracks.

There would be no proposed change in the current system of female dormitory student parking.

If passed by the senate, the bill would be forwarded for approval to either the University Traffic Panel or Dr. John Koldus, vice president for student services.

# MSC council president: a memorial to be used

By DILLARD STONE  
Battalion Staff

"Respectful use" of the Memorial Student Center grass was a term used frequently by Ray Daniels, president of the MSC Council and Directorate, in describing his opposition to the student senate grass resolution.

"In my mind, it's a memorial, but that doesn't mean you can't use it in a normal manner," Daniels said, speaking of the grass.

A resolution to be voted on Wednesday by the student senate would recognize the grass around the MSC as a memorial to Aggies who died in the armed forces. The bill would also ask for shrubbery to be planted around the University Center grounds to discourage their use.

Such activities as sitting, studying, and playing frisbee "fall well within reasonable and respectful use," Daniels said.

"We shouldn't be so uptight about its

use that people can't use it in a reasonable fashion," he added.

Wednesday's senate vote is crucial, Daniels said, because defeat of the measure could draw attention to the fact that the grass has no official designation as a memorial.

However, he said, "I doubt that people will take it as an encouragement to use it, because there are enough good Aggs around to still discourage its use."

Daniels was unhappy with the student senate for taking action on something he says is under the MSC Council's jurisdiction.

Legally, the council cannot declare the grass a memorial, Daniels said. That is the responsibility of the Board of Regents.

However, in the past, the grass policy has been set by the MSC council. The council's current policy says that the grass is a "living memorial," but that its use will not be discouraged.

# Consol priorities need attention

By KAREN ROGERS  
Battalion Staff

A&M Consolidated School District should begin taking care of top priority maintenance needs as soon as possible, said John Hoyle, chairman of the Maintenance Needs Assessment Team, at a school board meeting Monday.

Hoyle and his staff visited each school in the district and assessed the items that need immediate attention. He said he is not suggesting how the problems be solved but, stressed that "unless these priorities are taken seriously, then it's going to be very difficult to take care of building custodial needs building-by-building."

However, the personnel and equipment are not sufficient to do

what the committee feels needs to be done.

Trustee Elliott Bray said cost for some of the items may be prohibitive. "It may be a high priority item, but I don't know if we can get to them all in order until we know the cost."

President Bruce Robeck suggested the board "look at the resources we have so we're working on preventive maintenance and not simply putting off problems for the future."

After a unanimous vote, the board directed Superintendent Fred Hopson to draw up any necessary administrative policy decisions to proceed with the work.

Some members of the board expressed interest in beginning the actual work.

Trustee Bill Wasson urged members "not to get bogged down in a discussion process" while Trustee Bill Fitch suggested the board "not itemize and take bids, but approximate the cost so the board can take action at the next meeting."

In other action, the board agreed to "draft a somewhat reluctant recruit" to take Bill Springer's position on the Board of Equalization. The position must be filled by May 1, when the board will begin property assessments for district residents.

High school faculty members discussed the possibility of offering additional vocational programs to students. A survey taken last week indicated that 61 students would enroll in the new programs.

The survey also indicated that about 26 percent of the students

Bruce Robeck

plan to enter the work force upon graduation.

"This would seem to indicate the need for additional vocational programs," said Dr. H. R. Burnett, assistant superintendent of instruction.

Robeck suggested that the students should have some way of knowing exactly what the program involves before they enroll. No action was taken.

Overcrowded school buses and too few drivers have been a problem in the district for several months.

The overcrowding has been eliminated in all but the Dowling and College View I routes, where there have been up to 75 and 91 students counted on each route.

John Hoyle
