HOME OFFICE - BIRMINGHAM, ALABAMA

Oil execs urge deregulation

United Press International
AUSTIN — Oil industry executives were unanimous Tuesday in advising the federal government to deregulate prices.

Executives from 23 oil and gas companies and drilling associations, including all the major oil companies, testified before the Railroad Commission at Texas' annual "state of the industry" oil and gas meeting at a local hotel.

"As a businessman, I don't need the government to tell me when I'm charging too much," Texaco President John K. McKinley said. "The consumer tells me that through his purchasing decisions."

"I do need someone to tell me just what government officials mean by windfall profits, or obscure profits or a just price."

"If the government chooses to tax us (the oil industry) for so-called windfall profits, will they then reimburse us for windfall losses?" McKinley asked.

The president of Mobil Oil Corp.'s U.S. Division, Allen E. Murray, agreed that today's energy problems are caused by over-regulation.

"We can continue to rely on regulation to implement an energy policy or we can return to the free market system," Murray said. "It's clear that regulation has failed."

The Mobil executive, along with others at the meeting, also blamed fluctuating government energy policies and an ever-increasing dependence on foreign oil for a worsening energy shortage in the United States.

Most warned that a crisis situation could develop this year because of the cutback in Iranian oil exports unless strong conservation measures are developed.

L. A. Ramsey, executive vice president of Gulf Oil Exploration and Production Co., warned, "We could begin to approach crisis conditions as early as October of this year if substantial Iranian supplies are not available."

"If there is one lesson we, in the United States, should have learned by now, it is the lesson that serious conservation does not occur without the persuasive factor of higher prices."

Other executives gave recommendations for conservation and for passing laws to encourage increased production in the United States. But the most pervasive recommendation from the oil industry was clearly spoken by the executive vice president of Exxon Co.

"One of the most effective actions would be to eliminate the outmoded federal government controls on crude oil and petroleum products that have been in place since 1971," Exxon's F.C. Ackmar said.

Registration required of reporters?

United Press International
BOSTON — The Massachusetts House gave initial approval to a bill that would require investigative news reporters to register as private detectives.

But Monday's initial House approval may prove to be the first step in an effort to kill the measure, which has been denounced as unconstitutional by at least two news media associations.

The bill, already passed by the Massachusetts Senate, requires certain news reporters and photographers to pay the state Department of Public Safety a \$750 private detective registration fee and to obey laws regulating detectives' conduct.

The measure would extend the state's definition of a private detective to include reporters who do not identify themselves as such while researching stories and photographers who use cameras for surveillance of subjects of such stories.

In voting its preliminary acceptance, the House turned the bill over to a committee responsible for reviewing all legislation before final action is scheduled in the House and Rep. Philip Johnston, an opponent of the bill, said, "... it will never come out."

Johnson said the House leadership determined that the bill could be killed most effectively in the committee, rather than in a vote on the House floor.

"If you debate something like that in this place, it might pass and this governor might sign it — with relish," he said.

Gov. Edward J. King's relationship with the Statehouse press corps has been tense ever since he launched his campaign for the job last year.

The bill was introduced by Sen. Denis L. McKenna, who has filed related legislation to require reporters who cover the Legislature to submit annual financial disclosure statements to the secretary of state.

FIGHT NIGHT IS HERE!

Boxing Between TAMU Organizations, Dorms, Fraternities & Corp of Cadets

OVER 80 ENTRIES

ADMISSION: **150 KEGS OF BEER**

\$1.00 W/ID

STEP INTO THE FUTURE

WITH AIR FORCE TECHNOLOGY

★ IMMEDIATE OPENINGS ★

TECHNOLOGICAL CHALLENGES. Lasers. Space systems design. Electro-optic sensors. Nuclear energy. Air Force scientists, engineers, and other technology-oriented personnel are at the forefront of technology's fast-moving and complex frontiers.

YOU CAN JOIN THIS GREAT TEAM if your degree is in a technology-oriented field such as engineering, computer science, mathematics, meteorology, or physics. Completion of Air Force Officer Training School launches you on a challenging career and into the future.

We Offer:

- ★ ADVANCED EQUIPMENT
- ★ CHALLENGING WORK - MODERN PROGRAMS
- ★ AN EXCELLENT SALARY
- ★ CHOICE OF JOB AND ASSIGNMENT LOCATION
- ★ 30 DAYS PAID VACATION

FIND OUT what else the Air Force can offer you. Air Force representatives will conduct personal interviews and discuss available career opportunities on:

Monday, March 26

For further information, call **AIR FORCE**

A great way of life.
