Regent accepts consultant post

Dr. John B. Coleman, a physician and member of the Texas A&M University System Board of Regents, has accepted an invitation from the Texas Medical Association to serve as a consultant to the TMA Council on Medical Education.

The invitation to help advise the council was extended by Dr. Mario E. Ramirez, TMA president.

A TMA official explained the council is involved in activities ranging from studies regarding physician education programs to evaluation of licensure provisions.

Dr. Coleman, who has served as a Texas A&M regent since 1977, is chief of obstetricians and gynecologist at Riverside General Hospital in Houston and is president of Cullen Women's Center, also in Houston. He is former vice president of the Houston Medical Forum.

Muse to take over BA college

Dr. William V. Muse, selected to become the next dean of the College of Business Administration, will take that position July 1.

Muse has held two similar positions during his career as an administrator both as dean of the college of Business Administration at Appalachian State University in North Carolina and the University of Nebraska.

In both positions, Muse was instrumental in the organization of the college's curriculum and various programs.

Muse will take the position vacated after the resignation of Dr. John Pearson on August 31, 1978.

During the interim period, Dr. Clinton A. Phillips held the position of acting dean of the college.

"I'm having fun doing this job," Phillips said in a recent interview.

"But I fully understand and appreciate the fact that it is not on a permanent basis."

Frymire named A&M consultant

Thomas R. Frymire of Dallas has been appointed to the board of consultants for the Center for Education and Research in Free Enterprise, Clyde H. Wells, chairman of the Texas A&M University System Board of Regents, announced last week.

Frymire, chairman of the board of Frymire Engineering, will serve out the five-year unexpired term of Norman N. Moser of DeKalb. Moser resigned from the board earlier this year when he was named to the Texas A&M University System Board of Regents.

"I recommend Thomas Frymire for this post because he is committed to the enterprise system and has an outstanding record in the business field," Texas A&M President Jarvis E. Miller told the regents. "He is also a strong advocate of individual initiative and the work ethic within his own organization."

Frymire, a 1945 graduate of Texas A&M, has endowed two major scholars at the university and is an active member of The Aggie Club, the fund-raising organization assisting student athletes. He was also chairman of the fund-raising effort that sent the university choral group, the Singing Cadets, on a goodwill tour to Romania several years ago.

The free enterprise center was formed two years ago with a \$300,000 grant from Texas A&M's Association of Former Students and Development Foundation, stipulating at the outset that no public funds would be used to operate the center.

Its objectives include educational programs for precollege and college students, and continuing education programs. Research is geared to assist management, businessmen, the press and the general public.

Gulf Oil gives \$4,420 award

The Gulf Oil Co. has presented Texas A&M University \$4,420 which includes a fellowship for petroleum engineering graduate Bruce Damron of College Station.

The gift was presented by H.E. Brautig Jr., environmental affairs manager, Gulf Oil Exploration and Producing Co.

It includes unrestricted funds for use by the Petroleum Engineering Department. Damron and the department head, Dr. Douglas Von Gonten, accepted the award. Brautig received a degree in petroleum engineering at Texas A&M in 1940.

Damron completed undergraduate studies in the department in 1971. He worked in the oil industry several years before returning to Texas A&M for graduate degree work.

Two students get economics awards

Daniel Ellwood and Edward Ollington Price III have been named this year's recipients of the Alfred F. Chalk economics award at Texas A&M University.

The \$500 awards are presented annually to the outstanding graduate and undergraduate economics students at Texas A&M.

Ellwood, son of Mr. and Mrs. C.B. Ellwood, Beeville, graduated magna cum laude in economics in May and will attend the University of Texas Law School in the fall.

Price, son of Mr. and Mrs. Ollington Price Jr. of Bryan, will receive a doctorate this summer and become an assistant professor at Oklahoma State University in September.

The award is named for Professor Emeritus Alfred Chalk, a member of the economics faculty at Texas A&M for 41 years. The presentations are made possible by donations from students of A.F. Chalk and the Center for Education and Research in Free Enterprise.

Wedding reception a real riot

United Press International
SAN LEANDRO, Calif. — Here comes the bride — and there goes the groom, tossing the wedding cake in her face.

Before the ensuing fracas was over, five wedding guests were arrested and three police officers had been injured.

The wedding reception at the Blue Dolphin Restaurant had just

begun Saturday when the unidentified newlyweds suddenly began arguing loudly in front of 300 astonished guests.

The heated exchange climaxed with the groom grabbing the wedding cake and tossing it at the bride. An enraged relative of the young man started throwing dishes, and the fight was on.

Two policemen rushed to the

scene, but 30 more had to be called in as the wedding guests began breaking chairs, smashing mirrors and wrestling with the officers.

When the fracas ended 30 minutes later, no one seemed to know the whereabouts of the bride and groom — or whether they had settled their argument.

OLMECA. THE HEAD TEQUILA.

Their heads still stand. Nine feet high. Eighteen tons strong. The Olmec civilization in Mexico that miraculously carved them out of stone is now ancient history. But, from this same land in Mexico; an imposing Tequila is made. It's made in Gold and in Silver and it's made to taste sensually powerful, but mellow. Olmecca is made as a monument for all tequilas that follow.
