TAMU honors Moore, Presnal

State Sen. William T. "Bill" Moore and Rep. Bill Presnal received a lesson in cooking omelets Thursday night.

They also received standing ovations and commemorative plaques from top Texas A&M officials for their service to the University and agriculture specifically and to the state generally.

The two legislators were special honorees at a cook-it-yourself dinner at which four retiring Texas Agricultural Extension Service and Texas Agricultural Experiment Station administrators were formally recognized for superior service.

"In attempting to assess the value of the service that Sen. Bill Moore and Rep. Ralph Presnal render to this institution is one of those rare instances when no matter what you say you don't run the risk of exaggerating," observed Clyde H. Wells, chairman of the Texas A&M University System Board of Regents. "To say they represent us well is a gross understatement."

Texas A&M President Jarvis E. Miller echoed that sentiment, telling the two lawmakers that their alma mater "owes you a tremendous debt." Moore is a 1940 Texas A&M graduate, and Presnal is a 1956 graduate.

"These two men have gone beyond the call of duty," added Dr. Perry L. Adkisson, the university's vice president for agriculture and renewable resources, who coordinated the program.

The large plaques presented Wells and Presnal cited the legislators for "dynamic leadership and outstanding contributions to the growth and excellence of Texas A&M University...and for stimulating the state's agricultural industry by strengthening the programs of the Texas Agricultural Extension Service, the Texas Agricultural Experiment Station, and the University's academic agricultural endeavor."

Each citation also noted major

milestones and honors accorded the honoree.

Sen. Moore, "Dean of the Senate," has served in the Legislature since 1946 and has been a member of upper house for 31 years. He received Texas A&M's Distinguished Alumni Award in 1976 and last year

was named recipient of the Texas Agricultural Extension Service's Knapp-Porter Award.

Presnal, who received the Junior Chamber of Commerce's Outstanding Young Man in America Award in 1966, has served in the House of Representatives since 1969. He has

been chairman of the House Appropriations Committee for the past three legislative sessions.

Also honored at the program were Claudia G. Williams, Texas Agricultural Extension Service state agent for home economics; Yo Etta Yori, home economics district agent; Dr.

Tom Longnecker, director of the Texas A&M University Agricultural Research and Extension Center at Corpus Christi, and Huey Whitehurst, superintendent of the Texas A&M University Research and Extension Center at Dallas.

The Corps of Cadets gets its news from the Batt.

Scientists to try to raise warship

Preparations to raise a Civil War ironclad warship which has harassed shipping in Savannah harbor for 115 years, are being made by a team of scientists and students from Texas A&M University.

The project to salvage and partially restore the 200-foot Confederate warship Georgia, could take five years to complete and would be the first successful attempt in over a century to raise a sunken Civil War ironclad.

Erv Garrison, research scientist with Texas A&M's Cultural Resources Laboratory, said the University is already doing detailed consulting on the project and operates a magnetometer that detects metal underwater and through shallow layers of silt.

solid wood, four of 10 large guns and all their ammunition when she went down.

Garrison says Texas A&M may eventually use its two-man submarine Diaphus on the project if the Army Corps of Engineers gives the go-ahead.

The Georgia project could "easily take five years," notes Garrison, and the wreck would serve as an underwater classroom for training underwater archeologists and other scientists from Texas A&M.

The Cultural Resources Laboratory offers several services to scientists at Texas A&M, especially underwater recovery and preservation. Off-campus, the lab takes on such varied tasks as finding helicopters that crash into the sea and locating navigational hazards.

WHY RENT?

BUY a compact refrigerator!

- Five year warranty on compressor
- Full 2.0 cubic foot capacity
- New units—not used
- Pays for itself in 2 years
- 2 shelves, thermostat dial, freezer, ice tray

\$99⁹⁵ each

Delivery the week of September 3rd
