**A&M research funds
reach record level**

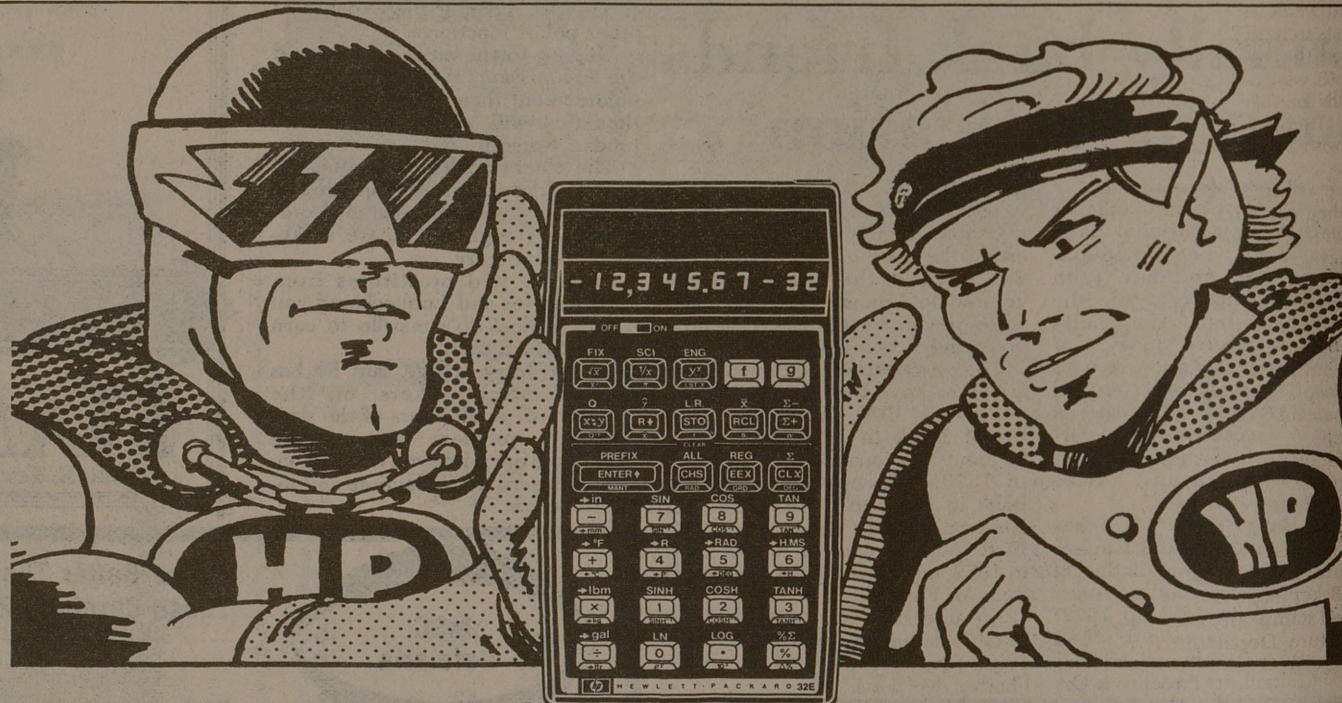

Texas A&M University received a record \$63.6 million in research funds for the fiscal year ending Aug. 31, a \$3.5 million increase over the previous year.

Dr. Robert R. Berg, director of the Office of University Research, said the money was provided by federal, state and private sources.

Agriculture, engineering, geosciences and science headed the fields

in which the funds were utilized. Funded projects ranged from the development of the new plant varieties to enhanced highway safety.

National Science Foundation tabulations ranked Texas A&M in the nation last year in research development expenditures by colleges and universities.

HOLY HYPERBOLICS!

HP makes professional scientific calculators students can afford.

Bet that bit of news really elevated your equations! Hewlett-Packard, the people who make some of the world's most dynamic calculators, now makes models just for your needs and budget—Series E.

Wow! The first one is the HP-31E. Scientific, now available at a NEW LOW PRICE—\$50.* It's a real corker of a basic scientific calculator. It has all the trigonometric, exponential and math functions you need most. Not only that, it handles metric conversions. And if that's not enough, it has both Fixed and Scientific display modes and 4 separate user memories.

Want more? Then take the HP-32E Advanced Scientific with Statistics, also at a NEW LOW PRICE—\$70.* It's everything the HP-31E is—and more! More math and metric, comprehensive statistics, decimal degree conversions, Engineering/Scientific/Fixed display modes and 15 user memories to boot. Sufficient to handle any "would-be" brain busters!

And now, for those who meet the challenge of repetitious riddles, problems, and scientific equations—the HP-33E Programmable Scientific! Likewise available at a NEW LOW PRICE—\$90.*

A multi-faceted scientific, math and statistical calculator with the added punch of programmability. It gives you at your command:

49 program lines of fully merged keycodes; a dazzling array of program control keys; and 8 user memories. Never again shy away from a sinister calculation!

And listen to this: every Series E calculator comes with a new larger, 10-digit display with commas to separate thousands for easier reading; diagnostic systems to help you catch and correct errors; a low battery warning light; rechargeable batteries and more.

Surely, there is a Series E calculator that is right for you. Which one? I suggest that you stop by your HP dealer for a "hands-on" demonstration and a free copy of "A buyer's guide to HP professional calculators." For your dealer's address, CALL TOLL-FREE 800-648-4711 except from Alaska or Hawaii. In Nevada, call 800-992-5710. Get your HP—and solve another one for freedom, ingenuity and correct answers!

HEWLETT hp PACKARD

Dept. 658L, 1000 N.E. Circle Blvd., Corvallis, OR 97330 6/19/79

*Suggested retail price excluding applicable state and local taxes—Continental U.S.A., Alaska & Hawaii.
