T-STAR: Will hold a general meeting at 7:30 p.m. in Room 502, Rudder.

A&M club to sponsor water ski tournament

By BECKY MATTHEWS
Battalion Reporter

Texas A&M University's Water Ski Club will sponsor its 13th tournament in five years when the Goldrush Intercollegiate Tournament is held this weekend at Aqua Gardens, a private lake in Centerville.

One hundred to 140 students from at least 10 Texas universities are expected to compete in the slalom, trick and jump events.

In the slalom, the skier must zig-zag between buoys. Trick skiing involves performing a series of turns and tricks in a 20-second period.

In yet another event, skiers jump for distance from a ramp.

Each event is divided into male and female divisions.

The 25 members of the Texas A&M Water Ski Club who will participate in the tournament do not expect to win, said Mark Burton, team captain.

Burton said that many teams have

an advantage over his team because "they have more backing up by their universities."

Water ski teams at other universities, he said, are given access to the P.E. equipment and facilities. One university built a lake in the center of the campus and the water ski team practices in the lake, according to Burton.

The major problem he said, is that the Texas A&M team has been unable to get enough practice. The team has to go to Lake Somerville to practice and that is almost impossible to do during the school week.

Registration for the tournament will begin at 7 a.m. Saturday. Fees are \$10 for participation in one event, \$11 for two events and \$12 for three events. Competition will begin at 8 a.m. with the slalom. The trick event will follow the slalom at about 1 p.m. The jump competition will begin at 8 a.m. Sunday.

Final day to submit poems to student contest is Nov. 5

Nov. 5 is the closing date for submission of manuscripts from college students to the College Poetry Review.

Any student attending a junior or senior college is eligible.

Each poem must be typed or printed on a separate sheet, and must have the name of the student,

home address, college he attends and name of English instructor.

There is no limitation as to form or theme, but shorter works are preferred.

Manuscripts should be sent to the Office of the Press, National Poetry Press, Box 218, Agoura, Calif. 91301.

Cattle spread near Houston

Somozas own Texas ranch

United Press International
HEMPSTEAD — Relatives of Anastasio Somoza own a 1,200-acre cattle ranch west of Houston where the former Nicaraguan president apparently planned an experimental feeding program before he was removed from office, a cattle dealer and court records disclosed.

The Santa Isabel Ranch was sold by Houston businessman William S.

Farish III for \$1.1 million cash through Sodinella International, a Dutch Antilles based company representing two Somoza nephews, said Bill Sartwelle, executive vice president of the Port City Stockyards at Sealy.

Workers at the ranch said the nephews, Luis Somoza of Houston and Bernabe Somoza of New York City, regularly visit on weekend and

holidays. "We weren't too concerned about whose money it was because it was a cash transaction," said R.A. Seale Jr., a lawyer involved.

Sartwelle said Somoza visited Texas in 1972 and 1973 and proposed a program whereby the stockyard would buy livestock and feed them different rations to see which worked best.

FLASH!

INTRODUCING THE PROFESSIONAL HP-41C.

A CALCULATOR. A SYSTEM. A WHOLE NEW STANDARD.

Pulsating pulsars! The new HP-41C has more than any handheld programmable Hewlett-Packard has ever offered. More capability, flexibility, easy-to-use features and options: Plug-in Memory Modules—for storing programs and data; and "extra smart" Card Reader; a Printer; The Wand—a new input device; and Application Modules—preprogrammed solutions to all kinds of problems. The HP-41C is a system you can grow with. You can start with the basic handheld unit and add on options as you need them.

The HP-41C handheld unit has a 12-character LCD display with alphanumeric capability. So you can name and label programs, functions, variables, constants, and prompt for data with words or sentences. Plus: over 130 resident functions; continuous memory; more than 400 lines of program memory or 63 data storage registers—expandable to over 2,000 lines or 319 registers with Memory Modules.

Great galaxies! The HP-41C also lets you assign a function to any keyboard location you want; any standard function; any programs you've written; or programs in Application Modules.

The HP-41C really is a new standard of design for all handheld calculators. But is it right for you? Zip over to your nearest HP dealer for a "hands-on" demonstration—and for a free copy of HP's booklet, "A buyer's guide to HP professional calculators." For the address, CALL TOLL-FREE 800-648-4711 except from Alaska or Hawaii. In Nevada, call 800-992-5710.
