CHRISTIAN SCIENCE ORGANIZATION: Will meet at 7:15 p.m. in the MSC.

the city

Tabor Road traffic to be slowed?

By SYLVIA FELLOWS
Battalion Reporter

Lakeview Club fans will need to drive a little slower on the stretch of Tabor Road around the East By-pass.

Monday night, the Bryan City Council approved the first reading of an ordinance lowering the speed limit from 55 mph to 35 mph on Tabor Road west of the By-pass, 40 mph under the By-pass, and 50 mph out to the city limits. The speed limit will stay 55 mph on the rest of Tabor Road.

The new speed limits can not go into affect until after the council approves the second reading of the ordinance at its next meeting in two weeks.

The original speed limit was set before the by-pass was built, said city planner Hubert Nelson. Now there is an elementary school located off of Tabor west of the By-pass and about 35 school buses pull out on that road daily, he said. It is necessary to slow down the traffic in this area, he said.

The council also awarded a contract to Trees, Inc., a tree trimming company based in Houston, for handling all of Bryan's tree trimming around electrical wires. The new city budget allocated twice as much money for this service as last year's.

The action was prompted by the severe ice storm Bryan suffered last

January. Heavy electrical damages occurred by breaking limbs and trees falling on electrical wires.

This year, the city will spend up \$300,000 trimming trees around wires and other electrical equipment.

Mayor Richard Smith also proc-

laimed today "Bill Moore Appreciation Day" in honor of Senator Bill Moore's public service as Bryan's State senator.

Moore will be in Bryan today as the honored guest of a barbecue supper at the Brazos Center tonight.

32,500 tons of materials recycled

Texas industry and individuals recycled more than 65 million pounds of glass, aluminum and steel during the first half of 1979, according to figures compiled by the Texas Resources and Environmental Council.

This figure includes materials recycled by major industries and independent recyclers who are estimated to recycle an additional 5 to 10 percent of the total.

Aluminum cans, which are worth nearly 1 cent each when returned for recycling, are the largest part of total recycled materials. The beverage industry in Texas reported that 37.1 million pounds of aluminum were recycled during the first half of 1979.

An additional 21 million pounds of glass were recycled, nearly equaling the 29 million pounds recycled during all of 1978.

Combined efforts of a Houston plant and an Odessa facility daily recover 35 to 37 tons of steel and other ferrous materials by magnetically separating processed solid waste.

we're

SORRY

GET SHOT!

An unexpected illness caught one of our photographers on the last day of scheduled AGGIELAND '80 CLASS PICTURE makeup days for your classes. Your time spent in line would have been much shorter if you hadn't waited until the last day--but nevertheless we apologize.

But if you didn't get in at all, CALL TODAY and make an appointment. Do it NOW!

This special makeup is being provided because of our special problem--but it can be offered for only a very limited time if we're to meet our deadlines.

Call 845-3771 anytime this week between 8:30 a.m. and 4:30 p.m.

Two premium reasons for using Maxell in every cassette deck.

Yes, two. Because Maxell gives you a choice of premium cassettes. To match the capabilities of your cassette deck.

UD-XL I is designed for the

lowest distortion of any cassette using normal bias and equalization.

UD-XL II gives you the extra benefit of reduced background noise when you switch your

deck to the high bias and equalization setting.

So choose your reason for choosing Maxell. And you'll be sure to select super sound, every time.
