If fractions fracture you or 'T calculus kills you: call Blun ar

United Press International SEATTLE — The people Peter Blum deals with range from youngsters who become mentally fractured trying to handle fractions to graduate scholars struggling over calculus.

"I've had some nurses who can't do percentages — something that can be vital to their job," Blum said. 'I've had carpenters who couldn't use geometry to figure out how much material to use. I get people who want to go back to school after 25 years and are afraid they can't pass a

"And I get a lot of parents who don't want to transmit their own bad feelings about math to their chil-

Blum is a mathematician who earned his doctorate at the University of California at Berkeley. In the basement of his Seattle home he operates a service called Math Counseling Institute. He mixes math and psychology into transactional analyis techniques designed to cure whatever it is in the world of numbers that ails his clients.

"Transactional analysis (TA) is a form of group therapy invented by Eric Berne," Blum said in an interview. "Its use is well illustrated in such books as 'I'm OK, You're OK'

Blum is working on a book of his own, showing how to use TA to help people cope with math. Its title is Everybody Counts.

Enrollment in Blum's school, now about four years old, has about as many ups and downs as a sine curve.

'I probably get more students (from elementary to graduate level) than anyone else, but there is a pretty close balance between students and people who are looking to another career or advancement in their jobs, and I get more women

Blum said the reason women outnumber men students has nothing to do with basic intellect.

Catholic Left affects church

United Press International WASHINGTON — The antiwar protests of the so-called Catholic Left during the 1960s and early 1970s made the Roman Catholic church more politically liberal but left many activists alienated from the institutional church.

generation generally were brought

became disenchanted with math

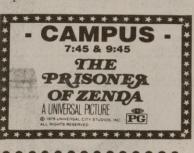

dents) associate math with bad feel-

Charles A. Meconis represents that irony. He was a young priest active in the Catholic Left who has since left the priesthood and is now program director for the Seattle Peace Action Coalition.

But he stressed that the cutting of institutional ties, for himself as well as others in the movement, did not mean losing religion.

'For myself, while my institutional connection has been weakened in the sense that I'm no longer active in the priesthood, I've found my own Catholicism strengthened and deepened and found that it was only when I was at a point where I was up to my eyeballs in activism that I'm driven to pray," he said in an inter-

Meconis, whose thesis on the sub-ject was published as "With Clumsy Grace," said that while he would not give the Catholic Left sole credit for moving the church from conservative positions in the 1950s to more liberal ones at the end of the 1970s, the movement "did have a significant

Led by such activists as the Berrigan brothers, Daniel and Philip, the Catholic Left was known for antiwar protest centering around civil disobedience that included draft card burnings and pouring blood on draft

But the Catholic Left had its most important impact on the church on another level.

"A lot of people not in the core of the movement but who sympathized with it are now in middle management positions within the church," Meconis said. "And there are literally thousands of nuns, who didn't get arrested but who were sympathizers, who made sandwiches and things like that, who have now been teaching children for a decade. That has to have an impact.'

'In the hierarchy, too, there has been a shift. Archbishop (John) Quinn (president of the National Conference of Catholic Bishops) now speaks out aginst the neutron bomb. It is not only the Catholic Left that produced this, clearly," Meconis said. "But, again, it had an impact.

Meconis believes lawbreaking separated the Catholic Left from traditional Catholic social movements such as the Catholic Worker and the secular antiwar movement. "The Catholic Worker people had drawn the line at action in a clearly pacifist Meconis said, "and that was precisely the birth of the Catholic

On the other hand, the secular movement criticized the Catholic Left as "moralistic, mindless and masochistic," saying its lack of a sophisticated economic analysis and
