Gauge saves gas

United Press International
NEW YORK — Installation of a manifold vacuum gauge can be a help in conserving gasoline in cars, according to Popular Mechanics magazine.

"The gauge, mounted on the dash, allows you to determine when the engine is operating at its greatest efficiency," the article in the March issue of the magazine says. "When manifold vacuum is high, fuel consumption is lowest. Conversely, when manifold vacuum is low, as it is during rapid acceleration, fuel consumption is the highest."

United Press International
NEW YORK — A profile of the "average" chief executive officer of a company has been compiled by Herbert T. Mines, chairman of Business Careers Ind., an executive recruiting firm based in New York and Chicago.

The top man (or woman) in a company is likely to show these characteristics, Mines says:

— He is a "loner" who prefers not to socialize with supportive staff persons.

— He seldom thinks about being removed from office.

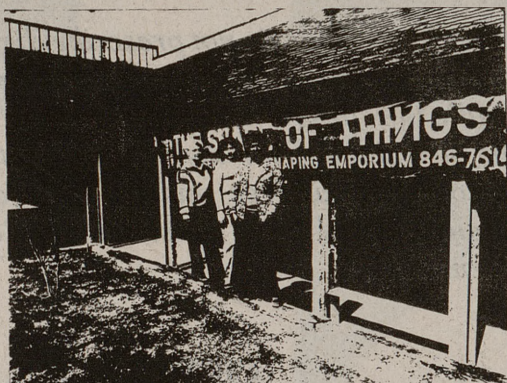

— In order, he worries about inflation, competition, government regulation, and management.
