Purdue University students turned out in record numbers recently to elect a local rock musician to head their student government. Junior Chris Clark is better known as Dow Jones, leader of the rock group "Dow Jones and the Industrials." He admits running for president of the Purdue Student Association was originally just a promotion for an album that his rock group cut. The album, called "Hoosier Hysteria," will be released this summer. Clark's campaign platform was aimed at ridiculing stu-dent government and the Purdue Greek community which has dominated past elections. Clark told students he would change the school colors to hot pink and green "to make an opposing team too sick to play," and would move Purdue's location farther south for warmer weather. He also favored taxing fraternity and sorority members and converting the campus music building into a disco. - Collegiate Hedlines

Secret Service questions prof

The U.S. Secret Service joined in the investigation of a letter to the editor of the University of Florida student newspaper. The letter urged students to join in the violent overthrow of the govern-ment and advocated assassination of President Carter and Sen. Edward Kennedy. The letter carried the name of a USF professor, but he denied writing it when contacted by the student editor, who then turned the letter over to the university police. A month later, says the professor, two Secret Service agents questioned him in his office and took extensive handwriting samples. - Collegiate Hedlines
