### Gas cost up, demand less

United Press International  
LOS ANGELES — Gasoline prices are rising at a slower pace than before the 1979 oil shortage because of a record gasoline surplus and drop in demand, industry analyst Dan Lundberg said.

Prices increased by 0.4 of a cent per gallon between March 21 and April 11, compared with 1 cent per gallon a week during the preceding year, Lundberg said.

Retailers in some areas of the country, he said, are beginning to make price cuts attempting to sell all their gasoline for fear of having their allocations reduced in the future.

Demand for gasoline was down 8.6 percent in the first quarter of 1980 from a year ago, Lundberg said.

As a result, he said, gasoline stocks in the United States grew to a record high, despite a reduction in refinery operations to 77.8 percent.

### Catholics seek out 'miraculous' shrine

United Press International  
SAN JUAN, Texas — More than 100,000 Roman Catholics traveled to this Rio Grande Valley community for the dedication of a shrine to the Virgin Mary, which includes a statue thought to have miraculous powers.

The \$5 million shrine, built almost entirely from small contributions, was built to replace one damaged 10 years ago in an airplane crash.

At the center of the new La Virgen de San Juan shrine is a small, doll-like statue of the Virgin Mary that

was rescued from the old shrine by a former schoolteacher who crashed a rented plane into it in 1970.

The statue is a copy of one brought by 17th century Spanish missionaries to the Mexican town of San de los Lagos, which later was the site of an injured child's miraculous recovery that was credited to the Virgin Mary.

"There was another miracle attributed to our statue," a shrine spokeswoman who identified herself as Joanne said Sunday.

"The founder of the original shrine, Father Jose Aspiasu — came over from Spain especially for this dedication — had gone down Mexico with three or four paraders," she said.

"He said he was saved from a fatal automobile accident in 1970, and because of Our Lady's intercession, he and the other people in the car were saved."

The statue, which had been housed in a temporary shrine since 1970, was transferred to the shrine at a Saturday evening Mass on Sunday, Cardinal Humberto Medeiros of Boston and other members of the Roman Catholic hierarchy celebrated a noon mass.

### E-Systems continues the tradition of the world's great problem solvers.

Developing the analytical theory known by his name, Joseph Fourier gave the world a basic tool for engineering analysis and system design.

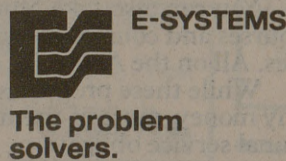

Today, E-Systems engineers are carrying on his tradition. They're using Fourier's mathematical accomplishments to solve some of the world's toughest electronics problems

via computer-designed circuitry.

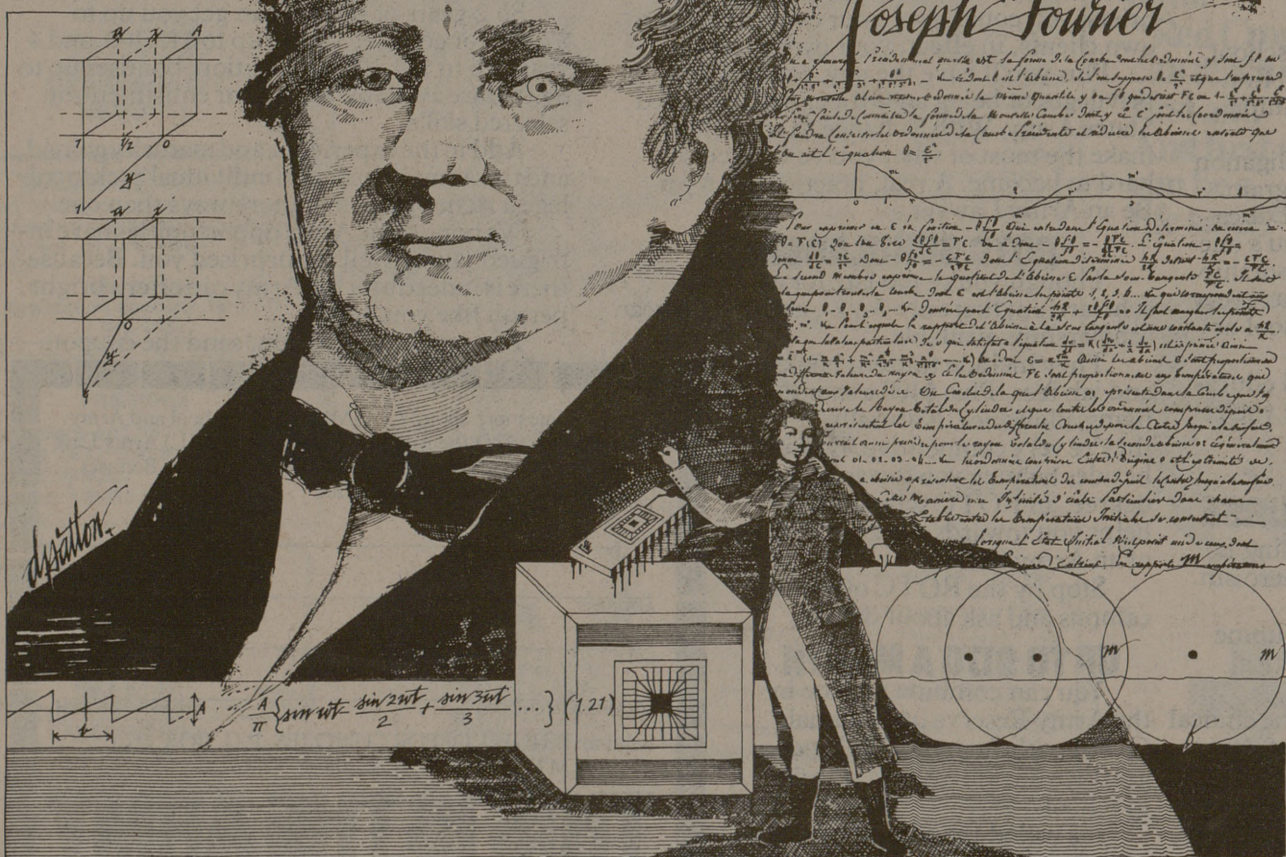

E-Systems designs and produces communications systems, data systems, antenna systems, intelligence and reconnaissance systems that are often the first-of-a-kind in the world.
