

What's Up

MONDAY

MSC MBA/LAW DAY: Ticket sales will continue through November 7 at the MSC Box Office.

FINANCE ASSOCIATION: Will meet at 6 p.m. in 145 MSC.

STUDY ABROAD SEMINAR: Will begin at noon in 206 MSC. Topics will include information on student tours, work permits and international student cards.

SOIL CONSERVATION SOCIETY OF AMERICA: Will meet at 7 p.m. in 103 Soil and Crop Sciences-Entomology.

CHRISTIAN SCIENCE ORGANIZATION: Will be giving out free copies of the Christian Science Monitor through Friday in the main hall of the MSC.

CATHOLIC STUDENT ASSOCIATION: Will meet for a Bible study at 7:30 p.m. and the work committee will meet at 8 p.m., both in St. Mary's Student Center. A night prayer service will be held at 10 p.m. in St. Mary's Church.

STUDENT Y ASSOCIATION: Delta Y will meet at 7:30 p.m. in 100 Heldenfels.

TUESDAY

ENGLISH LECTURE: Professor Floyd Watkins, from the Department of English, Emory University, will speak on "Some Modern American Authors and Their Home Towns" at 7:30 p.m. in 204-C Sterling C. Evans Library.

COLLEGE REPUBLICANS: Will meet at 7:30 p.m. in 502 Rudder. The Aggeland picture will be taken at 8 p.m. in the MSC Lounge.

PHI THETA KAPPA ALUMNI ASSOCIATION: Will meet at 7 p.m. in 342 Zachry.

WEDNESDAY

MSC HOSPITALITY FASHION SHOW: Will be held at noon at Rudder Fountain.

AMERICAN SOCIETY OF SAFETY ENGINEERS: Will meet at 7:30 p.m. in 342 Zachry.

CATHOLIC STUDENT ASSOCIATION: Will meet for Bible study at 7:30 p.m. in Corps Area Lounge E and for a night prayer service at 10 p.m. at St. Mary's Church.

CHRISTIAN SCIENCE ORGANIZATION: Will meet at 7 p.m. in 305 Physics.

SOCIETY OF AUTOMOTIVE ENGINEERS: Will meet at 7:30 p.m. in 127-B Zachry.

STUDENTS FOR ED CLARK: Will meet at 8 p.m. in 410 Harrington.

TAMU COLLEGIATE FFA: Will meet at 7:30 p.m. in 105 Harrington. The Aggeland picture will be taken.

TEXAS A&M STUDENT CHAPTER OF THE AMERICAN METEOROLOGICAL SOCIETY: Will meet at 7 p.m. in the O&M Building Observatory.

MBA/LAW DAY COMMITTEE: Will meet at 7 p.m. in the MSC Council Conference Room.

SOCIETY OF MANUFACTURING ENGINEERS: Will meet at 7:30 p.m. in 103 Zachry.

PRE-MED/DENT SOCIETY: Will meet at 7:30 p.m. in 200 Harrington.

CHILDREN'S HALLOWEEN PARTY: Will begin at 7 p.m. in 201 MSC.

No conflict with Silver Taps

IM change planned

By NANCY ANDERSEN
Battalion Staff

The Department of Intramural Athletics is trying to stop scheduling intramural games during Silver Taps.

"We're attempting to stop such games at least over at the intramural complex," said Dennis Corrington, director of intramurals.

"We haven't looked at the possibility of not scheduling the indoor

games like volleyball and basketball," he said.

Corrington said that the scheduling of events during Silver Taps, a memorial ceremony held for Aggies who have died, was an oversight.

Last spring the student senate changed the frequency of Silver Taps from the Tuesday following a student's death to the first Tuesday of each month.

"This is the first year they've scheduled this type of Silver Taps," Corrington said. "I don't know why it (complaints) didn't happen with softball last spring, but it'll be easy to schedule. We'll be able to do it without any problems."

Corrington said he looked into the situation after a student came in and talked to him about the scheduling.

"A gentleman, not representing anyone but himself, came in and visited with me about it," he said. "I told him we'd look into it and see what we can do to avoid it (scheduling games during Silver Taps)."

"I talked to Dr. Koldus the next day and he said they should go ahead and try to change it," Corrington said.

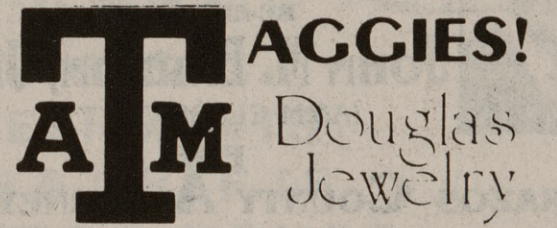

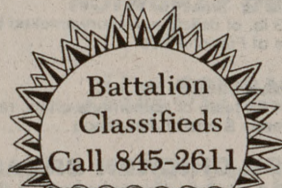

Eric Langford, vice president for student services, said he also spoke with Corrington about the problem. A Battalion editorial also criticized the dual scheduling.

Jewelry stolen in dorm theft

University Police are investigating the theft of \$2,000 worth of jewelry from a dormitory room last Thursday.

The jewelry, all 14-karat gold, was discovered missing from a Krueger Hall resident's jewelry box at about 7 p.m., police said.

There were no signs of forced entry and nothing else in the room was bothered, including another jewelry box which was sitting out on a desk police said.

Vet takes cannon for 5-mile ride

LAWTON, Okla. — A Vietnam veteran who drove a 26-ton self-propelled howitzer down the main streets of this Army post city was in a mental health center Sunday and FBI agents investigated the bizarre theft.

The man, identified as Larry Joe Sales, 29, kept police, sheriff's deputies and Highway Patrol troopers at bay Saturday during a chase that lasted more than an hour.

Sales' wife called police Friday night and said her husband had left the house, telling her he had to get some important papers and "go to Vietnam." She said he had been under treatment recently at the Veterans Administration Medical Center psychiatric ward in Oklahoma City.

After Sales was arrested, with the help of tear gas, he told police he remembered nothing about the rampage. He said the last thing he knew he was in bed at home, Deputy Sgt. Jay Lowell said.

Lowell said the man was "extremely cooperative and a little bit ashamed when it was over."

The 155 mm howitzer was unarmed and was sitting in a motor pool maintenance section at Fort Sill, an artillery training center, when the man somehow got into the fenced compound, Army spokesman Jon Long said.

It rolled through the base, knocking down fences before rumbolling onto Lawton streets.

Lowell pulled his car next to the gun at about 40 mph to try to get Sales to stop, but he swung the gun barrel over the top of the patrol car.

"That fellow could have decided he was in downtown Hanoi and City Hall wouldn't be standing now," Lowell said. "The guy's capable of making his own doors with that tank."

Orchestra tryouts set

Auditions for positions in the Brazos Symphony Orchestra will be Wednesday, Oct. 29 in the Bryan High School Orchestra room.

Positions to be filled include french horn, first clarinet, second oboe, timpani and section string players of violin, viola, cello and bass.

To obtain more information or to arrange an audition, call conductor Harold Turbyfill at 822-3711 from 8 a.m. to 5 p.m., or 779-1914 evenings.

Oil squeeze can be avoided, says oilman

DALLAS — The United States can be energy self-sufficient if the federal government acts to step up domestic oil and gas exploration, an independent Texas oil producer said Sunday.

"The most important energy issues in this nation today center around the domestic production of oil and gas," M.B. "Duke" Rudman, head of Rudman Resources, Inc., of Dallas, told a meeting of the Anti-Defamation League of B'nai B'rith.

Rudman called for increased exploration of basin areas in the U.S. "We cannot afford to rely on the capricious and sometimes hostile price and supply policies of OPEC," he said.

This country has three million square miles of basin that have been identified as having "sediments of oil and gas potential," he said, but production is taking place on only 50,000 square miles.

"The bureaucrats and some of our congressmen would have us walk away from this," the Texas oilman said.

The federal government controls about a third of all land in the U.S., and all of the outer continental shelf beyond state jurisdiction, he said, but only about a third of the onshore public lands and less than five percent of the outer shelf has been opened for energy development.

Debates cancel speech

A speech by former ambassador to Russia Malcom Toon, scheduled for Tuesday night, has been canceled because of the presidential debates slated for the same night.

Political Forum Committee, which was sponsoring Toon's appearance, said the speech has been rescheduled for Monday, November 10.

Toon will speak on Soviet policy in the third world.

Campus Interviews

TI Corporate Research, Development & Engineering

What You Need

You should have an MS or PhD degree in one of the following:
Mechanical Engineering Computer Science Chemical Engineering
Chemistry Electrical Engineering Physics
Materials Science

What We Do

The Central Research Laboratories ensure the timely availability of technologies required by present and future business opportunities.
The Corporate Manufacturing Technology Center is responsible for the development and implementation of manufacturing automation systems.
The Corporate Engineering Center is charged with identifying, developing and prototyping new products by the opportunistic applications of emerging technologies.

Areas of Activity

Component Development including:
Analog MOS Signal Processors
Charge Coupled Imagers
Infrared Sensors
Liquid Crystal, Plasma and Electroluminescent Displays
Magnetic Bubbles
Microwave Devices
Semiconductor Logic and Memory Devices
Surface Acoustic Wave Devices
VLSI Devices
Solar Energy Development, including:
Basic Electrochemistry
Fuel Cells
Photoelectrochemical Devices

Photovoltaics
Systems Development
Systems Development, including:
Artificial Intelligence
Computer Systems
Speech and Image Processing
Video, Printing & Display Systems
Materials Characterization
Materials Preparation/Crystal Growth
Process Development, including:
Chemical Vapor Deposition
Electron Beam Patterning
Ion Implantation
Plasma Processing
X-ray Lithography

Live in Dallas

Enjoy the facilities afforded by the country's 8th largest city, including 20 colleges and an abundance of entertainment. At the same time, take advantage of Dallas' low cost of living and no state income tax.

CAMPUS INTERVIEWS November 3

If unable to interview at this time, send your resume in confidence to: Steve Byars/P. O. Box 225474, M.S. 217/Dallas, TX 75265.
